Maker Literacy Lynn Pawloski,Cindy Wall,2016-11-07 This book takes the creativity and inventiveness of the maker movement and applies that energy in a new way to help children learn across all subject areas as well as broaden their world view. Traditional library literacy programs have helped many children foster a love of reading, but to prepare this next generation of learners, this programming needs to be modified to include technology. The inherent creativity and inventiveness of the Maker Movement, embracing both classic and innovative technological activities, provides the perfect bridge to invigorate, expand, and update these programs. This alternative to conventional library literacy programming will help children learn throughout all subject areas, see additional possibilities, and make connections in the world around them. With this guide, readers can discover how to apply maker literacy to introduce connections that help children better understand that their experiences in life are interrelated—that art can be made on a 3D printer and that science and technology are an essential part of design. This holistic approach provides a myriad of creative opportunities for both teaching staff and the children they serve. A great resource for youth services librarians in public libraries, this guide to infusing library programs with technology and maker activities to motivate learning will also appeal to preschool and elementary librarians, educators, and parents.

Makerspaces in School Lacy Brejcha,2021-09-09 Organized into an easy-to-follow, month-by-month plan for implementation, this book provides field-tested and research-based knowledge that will serve educators as they create and maintain a meaningful Makerspace. Makerspaces in School promotes innovative thinking in students that fills this need. Through Makerspaces, project-based learning provides opportunities for credible, legitimate, and authentic growth and development. This book will allow any educator to walk away with a plan to create a Makerspace in his or her classroom or a school- or districtwide model that works for many. Makerspaces are very fluid places—each is unique in its own way! 2020 Teachers' Choice Award for Professional Development Winner

Full STEAM Ahead Cherie P. Pandora,Kathy Fredrick,2017-10-03 This book is a toolkit for youth and young adult librarians—school and public—who wish to incorporate science, technology, engineering, art, and math (STEAM) into their programs and collections but aren't sure where to begin. Most educators are well aware of the reasons for emphasizing STEAM—topics that fall within the broad headings of science, technology, engineering, arts, and mathematics—in the curriculum, regardless of grade level. But how do librarians who work with 'tweens in middle school, high school, and public libraries—fit into the picture and play their roles to underscore their relevance in making STEAM initiatives successful? This book answers those key questions, providing program guidelines and resources for each of the STEAM areas. Readers will learn how to collaborate in STEAM efforts by providing information on resources, activities, standards, conferences, museums, programs, and professional organizations. Emphasis is placed on encouraging girls and minorities to take part in and get excited about STEAM. In addition,

the book examines how makerspaces can enhance this initiative; how to connect your programs to educational standards; where to find funding; how to effectively promote your resources and programs, including how school and public librarians can collaborate to maximize their efforts; how to find and provide professional development; and how to evaluate your program to make further improvements and boost effectiveness. Whether you are on the cusp of launching a STEAM initiative, or looking for ways to grow and enhance your program, this book will be an invaluable resource.

Ask First, Monkey! Juliet Clare Bell,2020-07-21 Meet Monkey. Tickletastic Monkey. He's the best tickler in the world, ever; even his mum says so. And there's nothing he loves more than tickling ALL his friends at playtime! But what happens if some of his friends don't want to be tickled? This picture book shows children aged 3-6 what consent is and why it's so important. With parent and teacher guidance included, it is an ideal resource to use in the classroom to help young children understand issues of consent and personal boundaries, and to teach them to consider the feelings of others. The book can be used in a variety of contexts - as an entertaining story, or as part of a lesson with the included guide for parents and carers - and its fun pictures and humour are guaranteed to keep the attention of young children across multiple readings. An ideal tool to encourage early understanding of consent, *Ask First, Monkey!* helps to empower children to respect themselves and others, and teach them that a reason for 'no' is never needed - it just needs to be respected.

Positive Free Speech Andrew T Kenyon,Andrew Scott,2020-05-28 Freedom of expression is generally analysed as a bare liberty against restraint by state action. Underpinning rationales for freedom of speech very often imply, however, that the concept also has important positive aspects, and that to be truly 'democratic' the modern polity requires more than negative freedom. In contemporary conditions, this understanding of free speech raises matters such as media diversity or pluralism, the concept of voice and access to the public sphere, access to information, and the need to rethink the audience in relation to public speech. Whether securing positive free speech is a matter of politics or of law, a task for legislatures or for courts, is an open question. On one level, any programme of inculcating positive dimensions of free speech might be understood as inherently polycentric and hence political in character. Yet, a number of jurisdictions evince enhanced legal recognition for the principle. The aim of this collection of papers is to interrogate the rationales of positive free speech, to consider the political and juridical methods by which it has or may be more fully reflected in the modern state, and to consider the range of practical contexts in which its valorisation has or would have significant implications. The contributors are drawn from an array of European and international jurisdictions. They include academic lawyers and communications researchers
