Coming Home ,2002 This study is different from other researches on migration in the sense that this study was an action research. It did not only seek to gain insight on the situation of migrant women and the effects of their separation from their families and communities, it also made efforts to pool minds together on the issue of reintegration. This action research involved the various stakeholders in validating the preliminary research findings and conceptualizing reintegration and its programmes.

Video Game Spaces Michael Nitsche,2008-12-05 An exploration of how we see, use, and make sense of modern video game worlds. The move to 3D graphics represents a dramatic artistic and technical development in the history of video games that suggests an overall transformation of games as media. The experience of space has become a key element of how we understand games and how we play them. In Video Game Spaces, Michael Nitsche investigates what this shift means for video game design and analysis. Navigable 3D spaces allow us to crawl, jump, fly, or even teleport through fictional worlds that come to life in our imagination. We encounter these spaces through a combination of perception and interaction. Drawing on concepts from literary studies, architecture, and cinema, Nitsche argues that game spaces can evoke narratives because the player is interpreting them in order to engage with them. Consequently, Nitsche approaches game spaces not as pure visual spectacles but as meaningful virtual locations. His argument investigates what structures are at work in these locations, proceeds to an in-depth analysis of the audiovisual presentation of gameworlds, and ultimately explores how we use and comprehend their functionality. Nitsche introduces five analytical layers—rule-based space, mediated space, fictional space, play space, and social space—and uses them in the analyses of games that range from early classics to recent titles. He revisits current topics in game research, including narrative, rules, and play, from this new perspective. Video Game Spaces provides a range of necessary arguments and tools for media scholars, designers, and game researchers with an interest in 3D game worlds and the new challenges they pose.

Learning Environment and Design Will W.K. Ma,Kar-wai Tong,Wing Bo Anna Tso,2020-11-07 This special edition of the Educational Communications and Technology Yearbook Series bears a title of “Learning Environment and Design: Current and Future Impact”. It provides a timely forum to share theoretical and practical insights in both the local and international contexts in response to the fact that new media and technologies have infiltrated and shaped the learning environments from mere physical spaces into multifaceted possibilities, impacting the ways individuals teach and learn. Designs of learning environments to harness technologies appropriately to engage learners better, as well as the roles of learners and educators play in this changing learning environment, are examples of important global issues in the discourse of the contemporary educational developments. Having gathered a diverse collection of research papers written by scholars and practitioners in the fields of education, communication and humanities across Asia, Australasia, Europe and the United States, this book gives readers a cross-cultural background on the developments of technological designs and educational practices, investigating areas in redefining of quality education; online learning and blended learning; new media in education; gamification, AI, and innovative learning technologies. Aimed to catalyze knowledge exchanges and provide fresh views on interdisciplinary research, the book sheds light on how emerging technologies can be adapted in the fields of education and communication, so as to facilitate the current and future designs of learning environments to improve learners’ performances.

The French Formula Ronaldo Siète,2023-01-03 The best spy story; the worst spy. If you play with G.O.D., you'll always win. Luxembourg wants to be Number One on the list of most influential countries. The war zone is Brest. The battlefield is the European Games. The LSD checks the rumours about a secret weapon, a new untraceable drug that turns losers into winners. When Bugs, The Runner, saves the life of Doc, he gets an unexpected chance to enter the VIP-zone and look behind the cameras. But a spy-mission is not a game; it's serious business. Does winning The Great Game compensate for losing your life? What's the price of that pot of gold at the end of the rainbow? And how can we play with G.O.D. and win?

China's Next Strategic Advantage George S. Yip,Bruce McKern,2017-09-15 A book for everyone who does business with China or in China. The history-making development of the Chinese economy has entered a new phase. China is moving aggressively from a strategy of imitation to one of innovation. Driven both by domestic needs and by global ambition, China is establishing itself at the forefront of technological innovation. Western businesses need to prepare for a tidal wave of innovation from China that is about to hit Western markets, and Chinese businesses need to understand the critical importance of innovation in their future. Experts George Yip and Bruce McKern explain this epic transformation and propose strategies for both Western and Chinese companies. This book is for everyone who does business with China or in China, or is interested in the development of the world's fastest-growing economy. Western CEOs can learn from Chinese companies and can create an effective innovation process in China, for China and the world. Chinese CEOs can benefit from understanding the strategies of their peers as they strive to enter foreign markets. And all Western businesses should prepare for disruption from their new competitors. Yip and McKern provide case studies of successful firms, outline ten ways in which the managerial and innovative capabilities of these firms differ from those of Western firms, and describe how multinationals doing business in China can become part of the Chinese ecosystem of new knowledge and technology. Yip and McKern argue that these innovation capabilities will be the basis for creating world-class products and services to meet the

challenges of a new era of global competition.

European Integration and Postcolonial Sovereignty Games Rebecca Adler-Nissen,Ulrik Pram Gad,2013 This book examines how sovereignty works in the context of European integration and postcolonialism. Focusing on a group of micro-polities associated with the European Union, it offers a new understanding of international relations in the context of modern sovereignty. This book offers a systematic and comparative analysis of the Overseas Countries and Territories (OCTs), the EU and the four affected Member States: UK, France, the Netherlands and Denmark. Contributors explore how states and state-like entities play 'sovereignty games' to understand how a group of postcolonial entities may strategically use their ambiguous status in relation to sovereignty. The book examines why former colonies are seeking greater room to manoeuvre on their own, whilst simultaneously developing a close relationship to the supranational EU. Methodologically sophisticated, this interdisciplinary volume combines interviews, participant observation, textual, legal and institutional analysis for a new theoretical approach to understanding the strategic possibilities and subjectivity of non-sovereign entities in international politics. Bringing together research on European integration and postcolonial theory, *European Integration and Postcolonial Sovereignty Games* will be of interest to students and scholars of International Relations, EU studies, Postcolonial studies, International Law and Political Theory.
