Distance Education in Nursing Karen H. Frith, PhD, RN, NEA-BC, Deborah J. Clark, PhD, MSN, MBA, RN, CNE, 2012-10-24 A Doody's Core Title! [This book] addresses issues that cut across a wide range of best practices and the effect of technology on learning. [It includes] sound principles, new and creative ideas, [and] many implications for future research. What can and cannot be taught online? How are faculty best assisted in learning a new role? Who are the students in this geographically and culturally diverse learning community?... I know that you will enjoy this book because it combines current practices and research with building a foundation of knowledge that takes us into the future. Jeanne M. Novotny, PhD, RN, FAAN Dean, School of Nursing Fairfield University This award-winning text, now in its third edition, integrates new digital teaching strategies with current distance education practices. Extensive revisions, seven new chapters, and an innovative format facilitate the planning, design, implementation, and evaluation of distance curriculum in undergraduate and graduate programs. New content promotes mobile computing in distance education, faculty preparation, quality improvement, learning in context, clinical reasoning, ethical comportment, and writing skills, and addresses the challenges of accreditation for distance programs. The text helps teachers assess their teaching strategies and try new methods in selected courses to enhance outcomes. Practical hints and key points focus on supporting learner success, using learning objects, and more.. Special features include an author-hosted blog and website to enhance and extend learning. The text is designed for RN-BSN, MSN, PhD, and DNP levels and will also be beneficial for health care organizations that provide online continuing education. This New Edition: Integrates new, contextually based teaching modalities with current distance education practices Includes seven new chapters with learning objectives, benchmarking, and mobile computing (with Web 2.0 tools) possibilities Provides specific suggestions for overcoming barriers to online classes and other paradigm shifts Features teaching approaches, course and program design, and case examples Offers an author-managed blog and website , updated continually

Special and Gifted Education: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2016-04-25 Diverse learners with exceptional needs require a specialized curriculum that will help them to develop socially and intellectually in a way that traditional pedagogical practice is unable to fulfill. As educational technologies and theoretical approaches to learning continue to advance, so do the opportunities for exceptional children. Special and Gifted Education: Concepts, Methodologies, Tools, and Applications is an exhaustive compilation of emerging research, theoretical concepts, and real-world examples of the ways in which the education of special needs and exceptional children is evolving. Emphasizing pedagogical innovation and new ways of looking at contemporary educational practice, this multi-volume reference work is ideal for inclusion in academic libraries for use by pre-service and in-service teachers, graduate-level students, researchers, and educational software designers and developers.

Data Communications and Networking Global Edition 5e Behrouz A. Forouzan, 2012-05-16 The fifth edition of Behrouz Forouzan's Data Communications and Networking presents a comprehensive and accessible approach to data communications and networking that has made this book a favorite with students and professionals alike. More than 830 figures and 150 tables accompany the text and provide a visual and intuitive opportunity for understanding the material. This unique approach minimizes the need for heavy math content, allowing normally complicated topics to unfold graphically and visually rather than through the presentation of complex formulas. The global edition has been developed specifically to meet the needs of international computer networks students. In addition to a chapter on the peer-to-peer paradigm, a full chapter on quality of service (QoS), generous coverage of forward error correction, coverage of WiMAX, and material on socket-interface programming in Java, we have added new international end-of-chapter questions and problems to make the content more relevant and improve learning outcomes for the international student.

Virtual Coach, Virtual Mentor David Clutterbuck, Zulfi Hussain, 2010-10-01 In the case of virtual coaching and mentoring (or e-mentoring and ecoaching; or coaching/mentoring by wire—choose your own preferred nomenclature!) there are hundreds, perhaps thousands of programs and initiatives across the world. Yet there is comparatively little in the way of comparison of good practice or academic evaluation of what does and doesn't work. We found numerous individual case studies but a dearth of empirical research and no significant collection of cases to illustrate the diversity of applications. Virtual Coach, Virtual Mentor provides a wide variety of perspectives on a rapidly growing phenomenon. We hope and intend that it should make a timely and significant contribution to good practice and to encouraging more practitioners and their clients and more organizations to experiment with using electronic media to enrich coaching and mentoring. The view of ecoaching and e-mentoring is firmly one that these new media are less a replacement for traditional face-to-face than an enhancement of learning alliances in general. We see no evidence of fewer face-to-face coaching or mentoring relationships—on the contrary, they continue to become more popular and widespread. Rather, we see that virtual

coaching and mentoring both enrich predominantly face-to-face relationships, by connecting partners at times between formal meetings, and open up coaching and mentoring to new audiences and new applications.
