Meeting Common Core Technology Standards Valerie Morrison, Stephanie Novak, Tim Vanderwerff, 2016-04-30 Have you ever wished you had an instructional coach at your side to help align your curriculum with the tech-related indicators found in the Common Core State Standards (CCSS)? You're not alone. Nearly all U.S. states have adopted the Common Core, and teachers across the country are redesigning their lessons to meet the standards, including the ed tech component. In this book, you'll learn how to shift your educational practice and integrate technology standards found within the Common Core into your curriculum. The authors clearly explain the standards and demonstrate how to incorporate them through classroom-tested examples that harness a robust list of student-friendly software, websites and apps.

Infusing Technology in the 6-12 Classroom Valerie Morrison, Stephanie Novak, Tim Vanderwerff, 2022-08-24 6-12 teachers will discover how to integrate the tech requirements found within today's academic standards into their everyday curriculum. Perhaps your district provides current technology development for staff on a regular basis and has instructional coaches to help teachers infuse technology into their curriculum to meet various academic standards. But in reality, most districts don't have this kind of support. In this book (the second in a two-book series), you'll learn how to shift your instructional practice and leverage technology to meet today's curriculum education standards for grades 6-12. This book doesn't cover every 6-12 national standard, but identifies the standards with a technology component and provides resources and lessons to help you teach those standards effectively. This book includes:

- Classroom-tested lesson ideas in English language arts, math, science and social studies mapped to ISTE and tech-related standards to support college- and career-readiness.
- Lists of technology-embedded college- and career-readiness standards for each grade level, along with practical ideas and up-to-date resources (apps, software and websites) that can be used in meeting these standards.
- Suggestions for addressing roadblocks to incorporating technology in the classroom.
- Ways to incorporate staff development and parental support at the school level.
- Access to a companion website with information on the tools referenced in the text.

With the implementation of these strategies, you'll help your students become self-directed and critical readers, writers and thinkers so they're better prepared for the future!

Movie-Making in One Hour Oleg Burkov, Today, video-shooting is accessible to almost everyone—most modern cell phones are equipped with a video camera of some sort. And even professional directors often use the video recording capabilities of digital SLR cameras for cinematography. However, just putting a few pieces of video footage together does not instantly create a masterpiece. This book will set you in the right direction by explaining the basics of video shooting and montage and providing extensive illustrated guidelines to help you create content-rich, exciting movies to share with your friends and family.

The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Video Marketing Made Simple For Business Owners Raymond Wayne,2020-09-18 Video Marketing is literally on fire! Embrace the Power and Potential of Video Marketing And use this medium to catapult your web business to the next level. Check out on “ Video Marketing Made Simple For Business Owners ” Finally, you have this once in lifetime opportunity to get your hands on the video marketing tools & Strategies that are generating million dollar revenues . Businesses invest a lot of time determining who their target demographic is, and for good reason. When a business knows which demographic is buying and using their product, it’s going to be easier to market to that demographic. Middle-aged women are going to respond to ads differently than millennials; and what one group finds engaging and interesting, another may not. So it’s important for businesses to understand what demographic they are targeting so they get the marketing just right for them. But, businesses don’t have to go to such trouble when they’re using video marketing because video marketing reaches every demographic and is interesting to every demographic. And this is because men and women, and people of every age, love video. As long as it’s interesting and creative, people will like a video regardless of their background or history. This can be a bonus for businesses that know who their demographic is, simply because more people will share it and like it, even if they don’t make up part of the business’ demographic. But it’s also especially good news for businesses with a shifting demographic, or for those that don’t know how makes up their demographic. That happens sometimes when a business changes directions or changes their product or service slightly, and then they have to start back at square one with their marketing efforts. But when a business has already created videos as part of their marketing plan, they don’t have to change a thing because those videos will already be suitable for every demographic. Imagine one type of marketing that appeals to every single demographic. It seems too good to be true, but it’s not. That type of marketing is video marketing, and reaching every demographic is just one very good reason why every business should be investing in it.
