The Uncanny Valley Hypothesis and Beyond Marcus Cheetham,2018-05-02 A field of theory and research is evolving around the question highlighted in the Uncanny Valley Hypothesis: How does high realism in anthropomorphic design influence human experience and behaviour? The Uncanny Valley Hypothesis posits that a very humanlike character or object (e.g., robot, prosthetic limb, doll) can evoke a negative affective (i.e., uncanny) state. Recent advances in robotic and computer-graphic technologies in simulating aspects of human appearance, behaviour and interaction have been accompanied, therefore, by theorising and research on the meaning and relevance of the Uncanny Valley Hypothesis for anthropomorphic design. Current understanding of the uncanny idea is still fragmentary and further original research is needed. However, the emerging picture indicates that the relationship between humanlike realism and subjective experience and behaviour may not be as straightforward as the Uncanny Valley Hypothesis suggests. This Research Topic brings together researchers from traditionally separate domains (including robotics, computer graphics, cognitive science, psychology and neuroscience) to provide a snapshot of current work in this field. A diversity of issues and questions are addressed in contributions that include original research, review, theory, and opinion papers.

Human Brain Function Karl J. Friston,Christopher D. Frith,Raymond J. Dolan,Cathy J. Price,Semir Zeki,John T. Ashburner,William D. Penny,2004-01-26 This updated second edition provides the state of the art perspective of the theory, practice and application of modern non-invasive imaging methods employed in exploring the structural and functional architecture of the normal and diseased human brain. Like the successful first edition, it is written by members of the Functional Imaging Laboratory - the Wellcome Trust funded London lab that has contributed much to the development of brain imaging methods and their application in the last decade. This book should excite and intrigue anyone interested in the new facts about the brain gained from neuroimaging and also those who wish to participate in this area of brain science. * Represents an almost entirely new book from 1st edition, covering the rapid advances in methods and in understanding of how human brains are organized * Reviews major advances in cognition, perception, emotion and action * Introduces novel experimental designs and analytical techniques made possible with fMRI, including event-related designs and non-linear analysis

Modern Schools of Linguistic Thought Zeki Hamawand,2020-05-22 This textbook provides a clear and concise overview of the main schools of linguistic thought and scholarship from the late 18th century to the present day, examining the key tenets and leading figures of each approach and assessing their impact on the field. Combining theory with practice, the author aims to familiarise students with the mechanisms used in analysing language structures, to acquaint them with the history of the discipline, and to demonstrate how different - sometimes competing - approaches can be combined to understand language and linguistics today. Written in an engaging and accessible manner, this textbook is an ideal primer for new students of linguistics at any level, as well as more experienced researchers seeking to understand the history of their field or the arguments and theories of other sub-disciplines.

End of Days Sylvia Browne,Lindsay Harrison,2008-06-24 Religious wars, global terrorism, pandemics, and genocide have all helped to usher in the Anxiety Age. Who better to lead the way out than popular psychic Sylvia Browne? In End of Days, Browne tackles the most daunting of subjects with her trademark clarity, wisdom, and serenity, answering such difficult questions as: What's coming in the next fifty years? What do the great prophecies of Nostradamus and the Book of Revelation mean? If the world is really going to end, what will unfold in our final hours? For anyone who's ever wondered where we're headed, and what—if anything—we can do to prevent a catastrophe of biblical proportions, End of Days is a riveting and insightful must-read.

World Cinema On Demand Stefano Baschiera,Alexander Fisher,2022-05-05 World Cinema on Demand brings together diverse contributions by leading film and media scholars to examine world cinema's dialogue with the transformations that took place during 2010-2014, engaging directly with ongoing debates surrounding national cinema, transnational identity, and cultural globalization, as well as ideas about genre, fandom and cinephilia. The contributions look at individual national patterns of online distribution, engaging with archives, SVODS and torrent communities. The essays also investigate the cross-cultural presence of world cinema in non-domestic online markets (such as Europe's, for example). As a result, the volume sheds light on geo-politically specific issues of film circulation, consumption and preservation within a range of culturally diverse filmmaking contexts, including case studies from India, Nigeria, Mexico and China. In this way, the collection maps the impact of different online formats of distribution in the understanding of World Cinema, underlining the links between distribution and media provisions as well as engaging with new forms of intermediation.

The Dynamic of Play and Horror in Adorno's Philosophy Bence Józsuá Kun,2023-10-04 Long before Wittgenstein drew attention to its complexities, the concept of play had captured the interest of theorists for

millennia. How do games contribute to our knowledge of the world? Wherein lies their universal appeal? Play is usually associated with a certain blitheness and buoyancy - could it nevertheless be argued that playfulness is not quite as innocent as it might seem? Bence Kun draws on Adorno's writings to explore the relation between philosophical play (understood here as imaginative thought as well as experimental expression) and an experience of dread Adorno links to children's first encounter with death. By investigating his less familiar works, some of which have not yet been translated, Kun challenges the received view on Adorno's approach to metaphysics, the role of systematic inquiry and the modern condition. As he has Adorno say, the originary impression of shock at the heart of philosophical reflection can only be fully apprehended through an open-ended and defiantly creative intellectual practice.

Brain and Visual Perception David H. Hubel M.D.,Torsten N. Wiesel M.D.,2004-10-14 This is the story of a hugely successful and enjoyable 25-year collaboration between two scientists who set out to learn how the brain deals with the signals it receives from the two eyes. Their work opened up a new area of brain research that led to their receiving the Nobel Prize in 1981. The book contains their major papers from 1959 to 1981, each preceded and followed by comments telling how and why the authors went about the study, how the work was received, and what has happened since. It begins with short autobiographies of both men, and describes the state of the field when they started. It is intended not only for neurobiologists, but for anyone interested in how the brain works-biologists, psychologists, philosophers, physicists, historians of science, and students at all levels from high school to graduate level.

Citrus Fruit Processing Zeki Berk,2016-07-05 Citrus Fruit Processing offers a thorough examination of citrus—from its physiology and production to its processing, including packaging and by-product processing. Choosing the Future for American Juvenile Justice Franklin E. Zimring,David S. Tanenhaus,2014-05-02 This is a hopeful but complicated era for those with ambitions to reform the juvenile courts and youth-serving public institutions in the United States. As advocates plea for major reforms, many fear the public backlash in making dramatic changes. Choosing the Future for American Juvenile Justice provides a look at the recent trends in juvenile justice as well as suggestions for reforms and policy changes in the future. Edited by Franklin E. Zimring and David S. Tanenhaus, two of the leading scholars on juvenile justice, and with contributors who are among the key experts on each issue, this essential volume focuses on the most pressing issues of the day: the impact of neuroscience on our understanding of brain development and subsequent sentencing, the relationship of schools and the police, the issue of the school-to-prison pipeline, the impact of immigration, the privacy of juvenile records, and the need for national policies - including registration requirements - for juvenile sex offenders. Choosing the Future for American Juvenile Justice is not only a timely collection, based on the most current research. It is also a forward-thinking volume that anticipates the needs for substantive changes in juvenile justice, linking the key current tasks of reform with a sustained analyses of the political strategies and rhetorical appeals that can make change happen--Unedited summary from book cover.

The Armenian Genocide Walter C. Bandazian,2024-01-22 About the Book The Armenian Genocide traces developments which led to the arrest, detention, and finally, the release of Young Turks and their allies accused of committing war crimes during and after World War 1 against the Christian population of Ottoman Turkey - and most notably Armenians. The primary focus of Walter Bandazian’s work concerns the role played by British authorities in the Near East in addressing the Armenian Genocide and initiating the first international effort to bring war criminals to trial, even before the Nuremberg trials of 1946-49. However, as Bandazian also shows, the anticipated trials never materialized because of several key factors, including the lack of appropriate legal mechanisms, difficulties in securing evidence on the ground, and political opposition from different quarters. Most of the present work is composed of documents which informed British authorities of the guilt of such civil, parliamentary and military functionaries as Memduh Bey in Erzinjan, Arif Fezi Bey in Diyarbakir, Mustafa Abdul Halik in Bitlis, Suleiman Faik Pasha in Harpoot, and others. About the Author Walter C. Bandazian was born in Brooklyn, NY, and raised in Philadelphia. He was an assistant professor of history and government at Beaver College in Philadelphia (1967-1972); Dean of Haigazian College in Beirut, Lebanon (1972-1975); and executive-director of Karagheusian Foundation based in New York City (1975-2014).
