IV. ASC-2022/Fall Congress Hosted by - Change & Shaping The Future Assoc. Prof. Hamza Şimşek - Prof. Dr. Susran Erkan EROĞLU - Prof. Dr. Avdhesh Jha- Prof. Dr. Muhammad Ashfaq - Dr. Iwona Florek- Dr. Logaiswari Indiran,2023-01-03 We were established in 2020 as an academic studies group. The purpose of our group is to share academic information, write academic books, and share new views and ideas. Our group, which started its activities with this mission, has become an association in 2022. The Academic Studies Group is a group formed by faculty members from more than 20 countries. Our group consists of 800 academicians, 500 of whom are from Turkey and 300 from various countries of the world. We held our first congress together with Çağ University in May 2021. We held our second congress together with Karabuk University in October 2021 . We held our third congress together with Osmaniye Korkut Ata University in May 2022. IV. The International Congress of Academic Studies (ASC-2022 / FALL) held in Poland between 3-5 November 2022, hosted by Alcide De Gasperi University of Euroregional Economy, POLAND, face-to-face and online. As the Academic Working Group, we are getting stronger with each congress. We would like to thank the organizing committee and our authors for their support at the congress. We hope to unite this cooperation under the roof of an institute or university in the coming years.

All About Autism: A Practical Guide for Secondary Teachers Lynn McCann,2023-05-26 All About Autism is an accessible and informative guide for secondary school teachers, designed to increase their knowledge and understanding of autism and enhance their toolkit with practical, adaptable strategies to support autistic learners in their care. The book initially explores key traits and terminology, debunks myths and misconceptions, and shines a light on the strengths and abilities of autistic learners. It then introduces readers to a range of easy-to-implement ideas for practice and concrete solutions to provide further support, all with the child at the heart. All About Autism includes: Practical strategies tailored to the secondary key stages with current research broken down into easily digestible chunks A focus on adaptive teaching and how to implement key strategies in different subject areas Guidance on a range of topics, from supporting students with mental health and anxiety to managing group work, class work, writing difficulties, homework and exams Strategies to support an understanding of puberty, relationships and sex education Approaches to foster autistic pride and to promote positive attitudes to diversity in all its forms Easy to dip in and out of chapters with signposting to further research, resources and support Taking a celebratory approach, the guide focuses on difference rather than deficit and weaves together the voices of autistic learners and parents alongside practical examples of what high-quality and adapted teaching should look like. It will be essential reading for all secondary school educators, SENCOs and parents who are supporting autistic learners aged 11-16.

The Applied AI and Natural Language Processing Workshop Krishna Sankar,Jeffrey Jackovich,Ruze Richards,2020-07-27 With the help of engaging activities, learn how to leverage Amazon Web Services for building serverless intelligent applications that can process information in no time Key FeaturesLearn how to integrate Amazon's Simple Storage Services with AI and NLP projectsGet to grips with serverless computing and its applicationsCreate intelligent applications such as chatbots and image recognition modelsBook Description Are you fascinated with applications like Alexa and Siri and how they accurately process information within seconds before returning accurate results? Are you looking for a practical guide that will teach you how to build

intelligent applications that can revolutionize the world of artificial intelligence? The Applied AI and NLP Workshop will take you on a practical journey where you will learn how to build artificial intelligence (AI) and natural language processing (NLP) applications with Amazon Web services (AWS). Starting with an introduction to AI and machine learning, this book will explain how Amazon S3, or Amazon Simple Storage Service, works. You'll then integrate AI with AWS to build serverless services and use Amazon's NLP service Comprehend to perform text analysis on a document. As you advance, the book will help you get to grips with topic modeling to extract and analyze common themes on a set of documents with unknown topics. You'll also work with Amazon Lex to create and customize a chatbot for task automation and use Amazon Rekognition for detecting objects, scenes, and text in images. By the end of The Applied AI and NLP Workshop, you'll be equipped with the knowledge and skills needed to build scalable intelligent applications with AWS. What you will learn

- Grasp the fundamentals of AI, ML, and AWS
- Explore the AWS command line, its interface, and its applications
- Import and export data to Amazon S3
- Perform topic modeling on a set of documents to analyze common themes
- Develop a custom chatbot to get the latest stock market quotes
- Create a personal call center and connect it to the chatbot

Who this book is for If you are a machine learning enthusiast, data scientist, or programmer who wants to explore AWS's artificial intelligence and machine learning capabilities, this book is for you. Although not necessary, a basic understanding of AI and NLP will assist with grasping key topics quickly.

Linux Firewalls Michael Rash, 2007-09-07 System administrators need to stay ahead of new security vulnerabilities that leave their networks exposed every day. A firewall and an intrusion detection systems (IDS) are two important weapons in that fight, enabling you to proactively deny access and monitor network traffic for signs of an attack. Linux Firewalls discusses the technical details of the iptables firewall and the Netfilter framework that are built into the Linux kernel, and it explains how they provide strong filtering, Network Address Translation (NAT), state tracking, and application layer inspection capabilities that rival many commercial tools. You'll learn how to deploy iptables as an IDS with psad and fwsnort and how to build a strong, passive authentication layer around iptables with fwknop. Concrete examples illustrate concepts such as firewall log analysis and policies, passive network authentication and authorization, exploit packet traces, Snort ruleset emulation, and more with coverage of these topics:

- Passive network authentication and OS fingerprinting
- iptables log analysis and policies
- Application layer attack detection with the iptables string match extension
- Building an iptables ruleset that emulates a Snort ruleset
- Port knocking vs. Single Packet Authorization (SPA)
- Tools for visualizing iptables logs

Perl and C code snippets offer practical examples that will help you to maximize your deployment of Linux firewalls. If you're responsible for keeping a network secure, you'll find Linux Firewalls invaluable in your attempt to understand attacks and use iptables—along with psad and fwsnort—to detect and even prevent compromises.

Passive Circuit Analysis with LTspice® Colin May, 2020-11-12 This book shows readers how to learn analog electronics by simulating circuits. Readers will be enabled to master basic electric circuit analysis, as an essential component of their professional education. The author's approach enables readers to learn theory as needed, then immediately apply it to the simulation of circuits based on that theory, while using the resulting tables, graphs and waveforms to gain a deeper insight into the theory, as well as where theory and practice diverge!

Assessment of Story Comprehension Trina Spencer,Howard Goldstein,2018-10 Available in packs of ten, these are the forms needed to conduct the complete the Assessment of Story Comprehension (ASC(TM)). The record forms contain six brief tests, each with a teacher script, story, and eight literal and inferential comprehension questions. Listening comprehension during shared storybook reading is a foundational skill--and an indicator that children are ready for the language demands of kindergarten. With the Assessment of Story Comprehension (ASC), pre-K programs finally have a fast, easy way to measure the story comprehension of children ages 3-5 identify children who may need language intervention monitor the progress of children receiving intervention determine when comprehension has meaningfully improved A quick check that takes just 3 minutes to complete, the ASC is the sensitive, reliable tool that programs need to test the comprehension skills of all young learners and pick up even small improvements as the school year progresses. It's an essential tool for assessing and monitoring a wide range of young children, including those with language impairments and developmental disabilities, children at risk for early literacy difficulties, and young English language learners (ELLs). Used on its own or in tandem with Story Friends(TM) and Path to Literacy, the ASC is the key to assessing and improving an essential building block of reading success and school readiness. Handbook of Item Response Theory Wim J. van der Linden,2017-12-15 Drawing on the work of internationally acclaimed experts in the field, *Handbook of Item Response Theory, Volume 3: Applications* presents applications of item response theory to practical testing problems. While item response theory may be known primarily for its advances in theoretical modeling of responses to test items, equal progress has been made in its providing innovative solutions to daily testing problems. This third volume in a three-volume set highlights the major applications. Specifically, this volume covers applications to test item calibration, item analysis, model fit checking, test-score interpretation, optimal test design, adaptive testing, standard setting, and forensic analyses of response data. It describes advances in testing in areas such as large-scale educational assessment, psychological testing, health measurement, and measurement of change. In addition, it extensively reviews computer programs available to run any of the models and applications in Volume One and Three. Features Includes contributions from internationally acclaimed experts with a history of advancing applications of item response theory Provides extensive cross-referencing and common notation across all chapters in this three-volume set Underscores the importance of treating each application in a statistically rigorous way Reviews major computer programs for item response theory analyses and applications. Wim J. van der Linden is a distinguished scientist and director of research and innovation at Pacific Metrics Corporation. Dr. van der Linden is also a professor emeritus of measurement and data analysis at the University of Twente. His research interests include test theory, adaptive testing, optimal test assembly, parameter linking, test equating, and response-time modeling as well as decision theory and its applications to problems of educational decision making.

Network Security Assessment Chris McNab, 2007-11 How secure is your network? The best way to find out is to attack it. Network Security Assessment provides you with the tricks and tools professional security consultants use to identify and assess risks in Internet-based networks-the same penetration testing model they use to secure government, military, and commercial networks. With this book, you can adopt, refine, and reuse this testing model to design and deploy networks that are hardened and immune from attack. Network Security Assessment demonstrates how a determined attacker scours Internet-based networks in search of vulnerable components, from the network to the application level. This new edition is up-to-date on the latest hacking techniques, but rather than focus on individual issues, it looks at the bigger picture by grouping and analyzing threats at a high-level. By grouping threats in this way, you learn to create defensive strategies against entire attack categories, providing protection now and into the future. Network Security Assessment helps you assess: Web services, including Microsoft IIS, Apache, Tomcat, and subsystems such as OpenSSL, Microsoft FrontPage, and Outlook Web Access (OWA) Web application technologies, including ASP, JSP, PHP, middleware, and backend databases such as MySQL, Oracle, and Microsoft SQL Server Microsoft Windows networking components, including RPC, NetBIOS, and CIFS services SMTP, POP3, and IMAP email services IP services that provide secure inbound network access, including IPsec, Microsoft PPTP, and SSL VPNs Unix RPC services on Linux, Solaris, IRIX, and other platforms Various types of application-level vulnerabilities that hacker tools and scripts exploit Assessment is the first step any organization should take to start managing information risks correctly. With techniques to identify and assess risks in line with CESG CHECK and NSA IAM government standards, Network Security Assessment gives you a precise method to do just that.
