Aging Easy Mondresia Carver,2021-07-19 People often ask, Why Seniors? My response is always the same, Why NOT Seniors? I have always had an unwavering desire to serve and protect the elderly. Even as a child, when given the opportunity to choose, my choice was always to be in the company of the older folk. I have found their wisdom and conversation to be priceless. For Seniors, living independently during their golden years can be an enjoyable and rewarding time of life. Most desire to maintain their dignity, quality of life, and independence while living at home. Sounds simple enough. However, what I have found to be true, both professionally and personally, is that things aren't always so simple. As a very young adult, I can recall experiencing the loss of my maternal great-grandmother. Having not been afforded the knowledge that I currently possess, watching her cognitive decline over a 5-year span was painful. On the day of her funeral, I can still recall feeling as though I'd lost my grandmother several years prior. A better understanding of her diagnosis would have added more quality to the time we shared. Experiencing the loss of my paternal grandmother was another taxing experience. Though her diagnosis did not rob her of her cognitive ability, Cancer certainly took everything else. During this experience, my knowledge base for the situation was greater. Therefore, medical attention, placement, and long-term planning were much easier. Most recently, the loss of my maternal grandfather was a challenge that tugged on every ounce of knowledge, experience, and emotion possible. Within a 7-month period, I watched my grandfather drift from what most called, The World's Oldest Teenager to being completely bedridden and dependent on others for care. Heart attack, stroke, cancer, kidney failure, dialysis, feeding tube, tracheostomy, cardiac arrest, and resuscitation were only among the most significant challenges that he endured. Fortunately, my family and I were able to make informed decisions to assure that he maintained quality of life. Working in Senior care for over 20 years, I have been exposed to all aspects. I have consoled weeping widows. I have found placement for seniors who have no family. I have advocated for seniors who were mistreated by family and/or professionals. I have found assistance for seniors that wanted to remain at home but needed a little help. I have helped family to understand that Hospice is actually very beneficial and not death sentence. I have hired good caregivers. I have terminated poor caregivers. I have also provided Psychotherapy for seniors who suffer from depression and anxiety. In short, Seniors and their families experience the same issues as those in other populations. For me, it is a God-given charge that I do all that is within my power to assure that this population is provided with the supports needed to be safe, healthy, and happy.

In Taiwan, strippers are hired to entertain funeral guests throughout the ceremony. Undertakers for the Tongan royal family weren't allowed to use their hands for 100 days after preparing a king's body. In the late 1800s, New Englanders would gulp down a cocktail of water and their family member's ashes in order to keep them from returning as vampires. Whether you fear being buried alive or just have a morbid curiosity of the other side, *Funerals to Die For* examines what may happen when another person dies.

Wikipedia @ 20 Joseph Reagle, Jackie Koerner, 2020-10-13 Wikipedia's first twenty years: how what began as an experiment in collaboration became the world's most popular reference work. We have been looking things up in Wikipedia for twenty years. What began almost by accident--a wiki attached to an nascent online encyclopedia--has become the world's most popular reference work. Regarded at first as the scholarly equivalent of a Big Mac, Wikipedia is now known for its reliable sourcing and as a bastion of (mostly) reasoned interaction. How has Wikipedia, built on a model of radical collaboration, remained true to its original mission of free access to the sum of all human knowledge when other tech phenomena have devolved into advertising platforms? In this book, scholars, activists, and volunteers reflect on Wikipedia's first twenty years, revealing connections across disciplines and borders, languages and data, the professional and personal.

Change We Can Believe In Obama for Change, 2008-09-08 At this defining moment in our history, Americans are hungry for change. After years of failed policies and failed politics from Washington, this is our chance to reclaim the American dream. In these pages you will find bold and specific ideas about how to fix our ailing economy and strengthen the middle class, make health care affordable for all, achieve energy independence, and keep America safe in a dangerous world. *Change We Can Believe In* asks you not just to believe in Barack Obama's ability to bring change to Washington, it asks you to believe in yours.

Here Comes Everybody Clay Shirky, 2008-02-28 "A fascinating survey of the digital age . . . An eye-opening paean to possibility." —The Boston Globe "Mr. Shirky writes cleanly and convincingly about the intersection of technological innovation and social change." —New York Observer An extraordinary exploration of how technology can empower social and political organizers For the first time in history, the tools for cooperating on a global scale are not solely in the hands of governments or institutions. The spread of the internet and mobile phones are changing how people come together and get things done—and sparking a revolution that, as Clay Shirky shows, is changing what we do, how we do it, and even who we are. Here, we encounter a woman who loses her phone and recruits an army of volunteers to get it back from the person who stole it. A dissatisfied airline passenger who spawns a national movement by taking her case to the web. And a handful of kids in Belarus who create a political protest that the state is powerless to stop. *Here Comes Everybody* is a revelatory examination of how the wildfirelike spread of new forms of social interaction enabled by technology is changing the way humans form groups and exist within them. A revolution in social organization has commenced, and Clay Shirky is its brilliant chronicler.
