Is Free TV for Federal Candidates Constitutional? Lillian R. BeVier, 1998 This author critiques the constitutionality and wisdom of proposals to provide free television time to candidates for federal office as a means of reforming campaign finance practices.

Digital inclusion in Wales Great Britain: Parliament: House of Commons: Welsh Affairs Committee, 2009-08-04 The Wales Office and the Welsh Assembly Government must ensure UK digital inclusion initiatives meet Welsh needs and build on existing good work to deliver on Welsh digital ambitions, says the Welsh Affairs Committee in a report published today. This report Digital Inclusion in Wales, examines the use of digital technologies in Wales, highlights the urgent need for the eradication of broadband 'notspots' - areas with limited or no access to high speed internet connections - and says this issue must continue to receive priority attention. There should be more support to help a wider range of people use technology effectively. Employers told the Committee they need staff with better IT skills and more training opportunities. The Committee recommends the Welsh Assembly Government explicitly includes this issue in its digital inclusion strategy. The digital inclusion agenda is a complex mix of reserved and devolved matters. This brings a risk that key issues can be overlooked, for example no account has been taken of Welsh language speakers' needs in the Government's Digital Inclusion Action Plan. The Secretary of State for Wales must ensure that bodies in Wales across all sectors are fully engaged with initiatives and that the next stage of Digital Britain adequately reflects Welsh needs. Higher education institutions also have a vital role to play and should be involved in any new research opportunities. The Welsh Assembly already has successful digital inclusion projects in Wales and it should find a way to become fully involved with the UK digital inclusion and Digital Britain work so it does not miss out on policy

developments and funding opportunities. The Committee also recommends the creation of a one-stop shop providing advice on the risks for young people using technology, and commends the Assembly's work tackling internet related crimes which it says should be promoted as part of the economic development strategy in Wales.

Controlling Access to Content Natali Helberger,2005-01-01 Control of access to content has become a vital aspect of many business models for modern broadcasting and online services. Using the example of digital broadcasting, the author reveals the resulting challenges for competition and public information policy and how they are addressed in European law governing competition, broadcasting, and telecommunications. Controlling Access to Content explores the relationship between electronic access control, freedom of expression and functioning competition. It scrutinizes the interplay between law and technique, and the ways in which broadcasting, telecommunications, and general competition law are inevitably interconnected.

Sex in Public Lauren Rosewarne, 2009-03-26 Despite decades of feminist awareness and activism, women continue to be portrayed in outdoor advertising in a limited and sexist manner. The fact that in public space audiences are exposed to such images without choice, renders the issue an important public policy concern. Sex in Public utilises a large outdoor advertising data collection to examine the contemporary outdoor advertising landscape, documenting the routine portrayal of women as thin, white, young and idle. This book examines why such portrayals are concerning for feminists as well as for public policy, and explores the advertising self-regulation systems that facilitate the display of such images. This book criticises sexist outdoor advertising as a form of

sexual harassment given that imagery often bearing very strong semblance to pin-ups which would be outlawed in a workplace are readily displayed in public space, reflecting a troublesome public policy double standard. Understanding sexist outdoor advertising as a form of sexual harassment is a new framework that Sex in Public offers to understand, critique and condemn such images.

Disability and Digital Television Cultures Katie Ellis, 2019-01-18 *Disability and Digital Television Cultures* offers an important addition to scholarly studies at the intersection of disability and media, examining disability in the context of digital television access, representation and reception. Television, as a central medium of communication, has marginalized people with disability through both representation on screen and the lack of accessibility to this medium. With accessibility options becoming available as television is switched to digital transmissions, audience research into television representations must include a corresponding consideration of access. This book provides a comprehensive and critical study of the way people with disability access and watch digital TV. International case studies and media reports are complimented by findings of a user-focused study into accessibility and representation captured during the Australian digital television switchover in 2013-2014. This book will provide a reliable, independent guide to fundamental shifts in media access while also offering insight from the disability community. It will be essential reading for researchers working on disability and media, as well as television, communications and culture; upper-level undergraduate and postgraduate students in cultural studies; along with general readers with an interest in disability and digital culture.

The Media and Communications in Australia Stuart Cunningham, Sue Turnbull, 2020-07-16

Traditional media are being reshaped by digital technologies. The funding model for quality journalism has been undermined by the drift of advertising online, demarcations between different forms of media are rapidly fading, and audiences have fragmented. We can catch up with our favourite TV show on a tablet, social media can be more important than mainstream radio in a crisis, and organisations large and small have become publishers in their own right on apps. Nevertheless mainstream media remain powerful. The Media and Communications in Australia offers a systematic introduction to this dynamic field. Fully updated and revised to take account of recent developments, this fourth edition outlines the key media industries and explains how communications technologies are impacting on them. It provides a thorough overview of the main approaches taken in studying the media, and includes an expanded 'issues' section with new chapters on social media, gaming, apps, the environment, media regulation, ethics and privacy. With contributions from some of Australia's best researchers and teachers in the field, The Media and Communications in Australia remains the most comprehensive and reliable introduction to media and communications available. It is an ideal student text, and a reference for teachers of media and anyone interested in this influential industry.
