Action Camera Underwater Video Basics Jeff Goodman,2021-10-26 Action Camera Underwater Video Basics shows how to capture fantastic video and turn it into engaging sequences. The book focuses on small action cameras – the format which includes devices made by GoPro, SeaLife and Paralenz – all of which have more depth to them than one might first imagine. Award-winning underwater cameraman Jeff Goodman shows how versatile they can be and how to get the best out of them. Every one of the 200+ images in the book was shot with an action camera. The book looks at important camera features and cuts through the dizzying array of equipment choices. Homing in on what is useful for underwater videoing, Jeff then provides the vital background knowledge key to achieving great results, time after time, whatever device you use: How to avoid the typical mistakes made by many budding underwater filmmakers. Capture better shots and turn them into engaging sequences. An introduction to the editing process – simple techniques to make the best videos. Jeff also explains how to use action cameras to take better underwater stills, both in the water and later from the video which has been shot. The book concludes with two exercises that put the theory into practice. Although technology moves on at a pace, some things will always remain true. Nowadays shooting exclusively with tiny action cameras, Jeff shares a lifetime of essential underwater video know-how in one handy book.

Influence of Internal States on Ion-Molecule Reactions in a Temperature Variable 22-Pole Ion Trap Sabrina Gärtner,2014-04-24 Chemical reactions between ions and neutral gas are very important in the interstellar medium, since they usually have much lower barriers than neutral-neutral reactions. Thus, they are more likely to take place at low temperatures. In this work, the endothermic reactions of CH₂D⁺, H₂D⁺, and N⁺ with H₂ have been investigated in a temperature variable 22-pole ion trap. Under the chosen conditions inside the trap the chemical processes are comparable to those in typical astrophysical environments. At low temperatures, the reactions mentioned above depend very sensitively on the translational and internal energies of the reaction partners. This dependence can be utilized to gain information on the energy levels or the population of the internal states. Based on this sensitivity, two different types of investigations were performed in this work. High resolution spectra of CH₂D⁺ were obtained, resulting in improved predictions for pure rotational transitions. First steps were made towards a detailed understanding of the processes in laser induced reactions, often leading to non-Gaussian line profiles. In addition, the influence of internal states on ion-molecule reactions allowed to determine the purity of para hydrogen samples and yielded insight into the reaction kinetics of the system N⁺ + H₂.

High Definition and 24P Cinematography Paul Wheeler,2012-10-12 This authoritative new reference demystifies the technologies of high definition and 24P cinematography. It is written for the director of photography, camera crew and producer or director and deals with the subject from their point of view. It provides a thorough and logical description of the five scanning formats 24P, 25P, 30P, 50i and 60i as well as recording formats, editing options, delivery potential and discussions on the financial implications these decisions might have. It looks at comparative costs between different decisions surrounding camera formats, such as 16mm to 35mm shooting for different examples, such as a 100-minute low budget movie or 30 second commercial. There is also considerable discussion on the advantages and disadvantages of using HD versus film, seen from a producer's perspective and what the impact is on all those involved in making a movie. Different delivery systems and camera equipment are discussed as well as editing. Filled with practical advice for tackling everyday decisions and choices, this is a must-have guide for anyone using or considering using high definition technology.
