Two Hawks from Earth Philip José Farmer,2021-06-29 From the New York Times–bestselling author of the Riverworld series: An alternate history classic in which the American continents never existed. Two Hawks from Earth, an expanded and revised version of Philip José Farmer’s The Gate of Time, is the story of an Iroquois pilot in World War II. First Lt. Roger Two Hawks is on a bombing run over Romania when his aircraft is shot down and collides with a German plane midair. Two Hawks bails out and survives, but when he reaches the ground, gone are the suburbs he saw from the sky. Instead, there are dirt roads, trees, farms, and an unsettling quiet. Then Two Hawks sees the soldiers: fur-clad men with shiny steel helmets shaped like wolf heads and armed with swords and arrows. Soon he comes to understand that, though a world war still rages, the Americans are absent—because they don’t exist, and neither does the land they’d come from. With his modern-day military and technical knowledge, Two Hawks becomes a prize that both armies covet. But he’ll have to learn to play by the rules of a new realm in order to survive—and live to see another world . . . Praise for Philip José Farmer “An excellent science fiction writer.” —Isaac Asimov “[Farmer’s work is a] blend of intellectual daring and pulp fiction prose.” —The New York Times “Farmer offers his audience a wide-screen adventure that never fails to provoke, amuse, and educate. . . . His imagination is certainly of the first rank.” —Time on The World of Tiers

Sometimes being big isn't all about being a grown-up. Intimate Landscapes Eliot Porter,1979 Intimate Landscapes, an exhibition of fifty-five color photographs by Eliot Porter, is the first one-man exhibition of color photographs ever presented at The Metropolitan Museum of Art. Works by Eliot Porter entered the Museum's collection as far back as 1949, when Georgia O'Keeffe presented from the Estate of Alfred Stieglitz an important collection of photographs assembled by Stieglitz himself. This collection included three early black and white prints by Eliot Porter, one of which is reproduced in this catalogue. All the photographs in the present exhibition brilliantly reflect the standards of excellence that are Eliot Porter's greatest contribution to the field of color photography. Upon seeing these photographs, the viewer is immediately struck by the artist's distinctly individual and intimate interpretation of the natural world.

Creating Self-Regulated Learners Linda B. Nilson,2023-07-03 Most of our students neither know how learning works nor what they have to do to ensure it, to the detriment both of their studies and their development as lifelong learners.The point of departure for this book is the literature on self-regulated learning that tells us that deep, lasting, independent learning requires learners to bring into play a range of cognitive skills, affective attitudes, and even physical activities – about which most students are wholly unaware; and that self-regulation, which has little to do with measured intelligence, can be developed by just about anyone and is a fundamental prerequisite of academic success.Linda Nilson provides the theoretical background to student self-regulation,the evidence that it enhances achievement, and the strategies to help students develop it. She presents an array of tested activities and assignments through which students can progressively reflect on, monitor and improve their learning skills; describes how they can be integrated with different course components and on various schedules; and elucidates how to intentionally and seamlessly incorporate them into course design to effectively meet disciplinary and student development objectives. Recognizing that most faculty are unfamiliar with these strategies, she also recommends how to prepare for introducing them into the classroom and adding more as instructors become more confident using them.The book concludes with descriptions of courses from different fields to offer models and ideas for implementation. At a time of so much concern about what our students are learning in college and how well prepared they are for the challenges of tomorrow’s economy and society, self-regulated learning provides a reassuring solution, particularly as studies indicate that struggling students benefit the most from practicing it.

Seek You Kristen Radtke,2021-07-13 From the acclaimed author of *Imagine Wanting Only This*—a timely and moving meditation on isolation and longing, both as individuals and as a society. There is a silent epidemic in America: loneliness. Shameful to talk about and often misunderstood, loneliness is everywhere, from the most major of metropolises to the smallest of towns. In *Seek You*, Kristen Radtke's wide-ranging exploration of our inner lives and public selves, Radtke digs into the ways in which we attempt to feel closer to one another, and the distance that remains. Through the lenses of gender and violence, technology and art, Radtke ushers us through a history of loneliness and longing, and shares what feels impossible to share. Ranging from the invention of the laugh-track to the rise of Instagram, the bootstrap-pulling cowboy to the brutal experiments of Harry Harlow, Radtke investigates why we engage with each other, and what we risk when we turn away. With her distinctive, emotionally-charged drawings and deeply empathetic prose, Kristen Radtke masterfully shines a light on some of our most vulnerable and sublime moments, and asks how we might keep the spaces between us from splitting entirely.

Confessions for a Son David Bornfriend,Patrick Aguilar,2014-09-26 In 2010, photographer McNair Evans returned to his childhood home in Laurinburg, North Carolina to retrace his father's life and legacy after his death nine years earlier. His father's passing had exposed the looming insolvency of their family businesses, ending five generations of family and financial stability. The economic impact on the family was immediate but the emotional impact lingered with Evans.Seeking to comprehend how the man he admired could have hidden the impending disaster from those he loved, McNair Evans delved into his family origins and his father's history to create a multi-layered photographic narrative about love and loss. The artist's poignant and lyrical photographs are presented in his first monograph, *Confessions for a Son* (Owl & Tiger Books, October 15, 2014). The book's themes are universal--the complex relationship between fathers and sons, the strength of family bonds and the disappearance of an American agrarian way of life.Visiting the farms where he and his

father hunted, his father's college dorm rooms, and his oldest friends, Evans photographed family members and businesses while researching his father's character and actions. Through this personal and photographic journey Evans moved from anger to empathy, and grew to love his father again. Evans' photographs are documentary and ethnographic, using light and evocative symbolism to convey the metaphorical in the abandoned businesses, totemic objects, and portraits of family and friends.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

The History of Visual Magic in Computers Jon Peddie,2013-06-13 If you have ever looked at a fantastic adventure or science fiction movie, or an amazingly complex and rich computer game, or a TV commercial where cars or gas pumps or biscuits behaved liked people and wondered, “How do they do that?”, then you’ve experienced the magic of 3D worlds generated by a computer. 3D in computers began as a way to represent automotive designs and illustrate the construction of molecules. 3D graphics use evolved to visualizations of simulated data and artistic representations of imaginary worlds. In order to overcome the processing limitations of the computer, graphics had to exploit the characteristics of the eye and brain, and develop visual tricks to simulate realism. The goal is to create graphics images that will overcome the visual cues that cause disbelief and tell the viewer this is not real. Thousands of people over thousands of years have developed the building blocks and made the discoveries in mathematics and science to make such 3D magic possible, and The History of Visual Magic in Computers is dedicated to all of them and tells a little of their story. It traces the earliest understanding of 3D and then foundational mathematics to explain and construct 3D; from mechanical computers up to today’s tablets. Several of the amazing computer graphics algorithms and tricks came of periods where eruptions of new ideas and techniques seem to occur all at once. Applications emerged as the fundamentals of how to draw lines and create realistic images were better understood, leading to hardware 3D controllers that drive the display all the way to stereovision and virtual reality.

What to Expect When No One's Expecting Jonathan V. Last,2014-06-10 Look around you and think for a minute: Is America too crowded? For years, we have been warned about the looming danger of overpopulation: people jostling for space on a planet that’s busting at the seams and running out of oil and food and land and everything else. It’s all bunk. The “population bomb” never exploded. Instead, statistics from around the world make clear that since the 1970s, we’ve been facing exactly the opposite problem: people are having too few babies. Population growth has been slowing for two generations. The world’s population will peak, and then begin shrinking, within the next fifty years. In some countries, it’s already started. Japan, for instance, will be half its current size by the end of the century. In Italy, there are already more deaths than births every year. China’s One-Child Policy has left that country without enough women to marry its men, not enough young people to support the country’s elderly, and an impending population contraction that has the ruling class terrified. And all of this is coming to America, too. In fact, it’s already here. Middle-class Americans have their own, informal one-child policy these days. And an alarming number of upscale professionals don’t even go that far—they have dogs, not kids. In fact, if it weren’t for the wave of immigration we experienced over the last thirty years, the United States would be on the verge of shrinking, too. What happened? Everything about modern life—from Bugaboo strollers to insane college tuition to government regulations—has pushed Americans in a single direction, making it harder to have children. And making the people who do still want to have children feel like second-class citizens. What to Expect When No One’s Expecting explains why the population implosion happened and how it is remaking culture, the economy, and politics both at home and around the world. Because if America wants to continue to lead the world, we need to have more babies.

They found themselves in a dense forest. The trees were tall and bulky; dense foliage everywhere; and the canopy was so thick, it was quite dark beneath the bright sun. It was the characteristic of Esterwood the Land of Forests. Everything was still. It was like calm before the storm. It portended evil. Suddenly the forest seemed to come alive. An eerie sound came and surrounded them. Wind blew violently; they could not stand on their feet. The tree branches wildly swayed in that wind. The trees and creepers were suddenly moving from their positions. The trees seemed to be closing in on the four friends with their branches. They indeed were. The four friends came to a standstill, and looked in all directions to ward off danger. The trees picked up speed. They closed in from all directions. Naren, and his friends Bulli Mantrik, and Answer the Lamb were all caught in the branches of the trees, and were unable to move. Penny the Parrot tried to fly away. The trees chased him, jumped, and caught him with their branches. Naren tried to move, but the trees and creepers so tightly clasped him, he could not move even an inch. So he could not lay hands on his sword. He felt suffocated by a twig holding him tightly by the neck. The trees seemed to kill them all, suffocating to death. An even queerer thing happened. Then was heard an eerie voice from the heavens. Come to me. ... Please scroll up and grab your copy now.
