Unity 5 from Zero to Proficiency (Advanced) Patrick Felicia,2016-10-14 In this book, the fourth book in the series, you will learn to create a simple network game, generate levels procedurally, and optimize the performance of your game. This book can be read as a standalone (you don't need to have read the previous books in the series, although it may help) and focuses on four aspects: procedural level creation, database access, multi-player networked games, and code and project optimization (i.e., memory and speed).The main idea behind this book is to save you some headaches when you need to maintain your code or expand your game, and to help you to find the time to actually code your game, by explaining simple and effective ways and best coding and organizational practices that you can use easily to create more code (and games) in less time with less stress and more fun.The content of each chapter is as follows: Chapter 1 explains how you can create procedural levels, using arrays, text files, XML files, or images, and avoid spending a lot of time creating your scene manually. Chapter 2 explains how you can read and write data from/to a database through Unity to save and update user preferences. Chapter 3 explains how to create a simple (but fun) network tank game that can be played by two remote players. Chapter 4 explains advanced techniques to boost the performance of your game, and to make your code and project easily maintainable. Chapter 5 provides answers to frequently-asked questions. The book includes: Step-by-step activities. Challenges at the end of each chapter. Quizzes. Code solutions for each chapter. Cheat-sheets (i.e., shortcuts, best practice, etc.) that you can download.

Game-Based Marketing Gabe Zichermann,Joselin Linder,2010-02-18 Harness the power of games to create extraordinary customer engagement with Game-Based Marketing. Gamification is revolutionizing the web and mobile apps. Innovative startups like Foursquare and Swoopo, growth companies like Gilt and Groupon and established brands like United Airlines and Nike all agree: the most powerful way to create and engage a vibrant community is with game mechanics. By leveraging points, levels, badges,

challenges, rewards and leaderboards – these innovators are dramatically lowering their customer acquisition costs, increasing engagement and building sustainable, viral communities. Game-Based Marketing unlocks the design secrets of mega-successful games like Zynga's Farmville, World of Warcraft, Bejeweled and Project Runway to give you the power to create winning game-like experiences on your site/apps. Avoid obvious pitfalls and learn from the masters with key insights, such as: Why good leaderboards shouldn't feature the Top 10 players. Most games are played as an excuse to socialize, not to achieve. Status is worth 10x more than cash to most consumers. Badges are not enough: but they are important. You don't need to offer real-world prizing to run a blockbuster sweepstakes. And learn even more: How to architect a point system that works Designing the funware loop: the basics of points, badges, levels, leaderboards and challenges Maximizing the value and impact of badges Future-proofing your design Challenging users without distraction Based on the groundbreaking work of game expert and successful entrepreneur Gabe Zichermann, Game-Based Marketing brings together the game mechanics expertise of a decade's worth of research. Driven equally by big companies, startups, 40-year-old men and tween girls, the world is becoming increasingly more fun. Are you ready to play?
