War of the Spark: Ravnica (Magic: The Gathering) Greg Weisman, 2019-04-23 NEW YORK TIMES BESTSELLER • Experience the first official adventure in Magic: The Gathering's multiverse in nearly a decade as the ultimate battle begins on Ravnica. Teyo Verada wants nothing more than to be a shieldmage, wielding arcane energies to protect his people from his world's vicious diamondstorms. When he's buried alive in the aftermath of his first real tempest, the young mage's life is about to end before it can truly begin—until it doesn't. In a flash, a power he didn't know he had whisks him away from his home, to a world of stone, glass, and wonder: Ravnica. Teyo is a Planeswalker, one of many to be called to the world-spanning city—all lured by Nicol Bolas, the Elder Dragon. Bolas lays siege to the city of Ravnica, hungry for the ultimate prize: godhood itself. His unparalleled magic and unstoppable army appear poised to bring the city to utter ruin. Among those who stand in the way of Bolas's terrifying machinations are the Gatewatch, Planeswalkers sworn to defeat evil, no matter where it's found. But as they work to unite the other mages and mount a defense of the city and its people, the terrifying truth of Bolas's plan becomes clear. The Elder Dragon has prepared a trap to ensnare the most powerful mages from across the Multiverse—and it's too late to escape. As forces great and small converge on the city and the battle rages, the stakes could not be higher. If the Gatewatch falters and the Planeswalkers fail, the curtain will fall on the age of heroes—and rise on the infinite reign of Nicol Bolas.

The Dirty College Game Al Figone, 2019-07-26 Commercial aspects of college football and basketball during the mid- to late 20th century were dominated by a few get rich quick schools. Though the NCAA was responsible for controlling such facets of college sports, the organization was unwilling and unable to control the excesses of the few who opposed the majority opinion. The result was a period of corruption, rules violations, unnecessary injuries and overspending. These events led to the formation of larger conferences, richer bowl games and rules intended to preserve the money-making value of college football and basketball. This book explores gambling, academic fraud, illegal booster activity and the single-minded pursuit of television contracts in college sports, as well as the NCAA's involvement--or lack thereof--in such cases.

Time and Space in Video Games Federico Alvarez Igarzábal, 2019-09-30 Video games are temporal artifacts: They change with time as players interact with them in accordance with rules. In this study, Federico Alvarez Igarzábal investigates the formal aspects of video games that determine how these changes are produced and sequenced. Theories of time perception drawn from the cognitive sciences lay the groundwork for an in-depth analysis of these features, making for a comprehensive account of time in this novel medium. This book-length study dedicated to time perception and video games is an indispensable resource for game scholars and game developers alike. Its reader-friendly style makes it readily accessible to the interested layperson.

Wildlife Diseases Leslie Page, 2013-06-29 The broad spectrum of topics covered in the nine symposia and four open-paper sessions of the Third International Wildlife Disease Conference comprise a remarkable collection of ideas and current research information on diseases of wildlife. The term wildlife is broad in itself and is interpreted by the Conference sponsor, The Wildlife Disease Association, to mean all free-living vertebrate and invertebrate members of the animal kingdom. The Conference's invitational symposia brought to Munich an array of wildlife specialists from around the world who addressed major problems affecting the understanding and control of diseases of wildlife. The open paper sessions attracted many well-known scientists with detailed data from their specialized studies. Over 100 participants were present to hear 84 scientific papers. The Wildlife Disease Association and the Conference editors, through their publisher, are pleased to offer this compilation of presentations as a Conference Proceedings. This volume will be an important data source for the study of diseases of wildlife by students, specialists, and general biologists everywhere. WDA President W. G. Winkler expresses the Association's gratitude to the Conference Chairman, Prof. Dr. H.

Networks, Crowds, and Markets David Easley, Jon Kleinberg, 2010-07-19 Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

A Night at the Gardens Russell Field, 2023-04-28 When Toronto's Maple Leaf Gardens opened in 1931, manager Conn Smythe envisioned an arena that would project an aura of middle-class respectability. In *A Night at the Gardens*, Russell Field shares how this new arena anticipated spectators by examining varying spectator behaviours, who the spectators were, and what the experience of spectating was like. Drawing on archival records, the book explores the neighbourhood in which Maple Leaf Gardens was situated, the design of the arena's interior spaces, and the ways in which the venue was operated in order to appeal to respectable spectators at a particular intersection of class and gender. Oral history interviews with former spectators at Maple Leaf Gardens detail the experience of watching the spectacle that unfolded on the ice during each hockey game. *A Night at the Gardens* tells the fascinating story of how one prominent public building became such an important part of Toronto society.

Mega-regionalism and Great Power Geo-economic Competition Xianbai Ji, 2021-09-22 The regional trade governance architecture is in flux. The latest wave of regionalism in the form of mega-regional trade partnerships between countries with major shares of the world economy occurred in the aftermath of the Global Financial Crisis of 2008-09. The most systematically important mega-FTAs included the Trans-Pacific Partnership led by the United States (US), the China-backed Regional Comprehensive Economic Partnership, and the Transatlantic Trade and Investment Partnership between the European Union (EU) and the US. Drawing on policy diffusion and competitive regionalism literatures, Xianbai Ji develops an innovative model of competitive spill-over to uncover the historical and contemporary sources of mega-regionalism resulting from a temporal clustering of mega-FTA initiatives from great powers. In the book, mega-FTA is conceptualised as an instrument of geo-economic competition between the US, China, and the EU. Each aspired to leverage its mega-FTA to gain an edge over its rivals in economic, geopolitical, and legal terms. Through a mix-method research strategy involving computable general equilibrium modelling, game theory, desk research, and perception survey, Ji generates an impressive chorus of quantitative, qualitative, and perceptual data demonstrating that the rise of mega-regionalism was driven by the multidimensional competition between the US, China, and the EU over international economic benefits, geopolitical influence, and the authority to write rules governing emerging trade issues. This book will attract academics, think tankers, practitioners, and postgraduate students interested in regionalism, international trade, international political economy, applied trade policy analysis, great power competition, geo-economics, and international relations.

Game Engine Black Book: DOOM Fabien Sanglard, It was early 1993 and id Software was at the top of the PC gaming industry. Wolfenstein 3D had established the First Person Shooter genre and sales of its sequel Spear of Destiny were skyrocketing. The technology and tools id had taken years to develop were no match for their many competitors. It would have been easy for id to coast on their success, but instead they made the audacious decision to throw away everything they had built and start from scratch. *Game Engine Black Book: Doom* is the story of how they did it. This is a book about history and engineering. Don't expect much prose (the author's English has improved since the first book but is still broken). Instead you will find inside extensive descriptions and drawings to better understand all the challenges id Software had to overcome. From the hardware -- the Intel 486 CPU, the Motorola 68040 CPU, and the NeXT workstations -- to the game engine's revolutionary design, open up to learn how DOOM changed the gaming industry and became a legend among video games.

How the SEC Became Goliath Ray Glier, 2012-09-25 How the SEC Became Goliath covers the Southeastern Conference and how the league became dominant in college football, winning six straight national championships. Size matters. That's why the SEC is Goliath, because the Southeastern Conference, top to bottom, has better coaches, better stadiums, better bank accounts, and better weather, but the real difference maker is the bigger and better players. For six straight years the SEC has walked off with the big crystal prize and will not give it back. The talk of "big boy football" grinds on the Buckeyes, Sooners, Longhorns, and Ducks. All they can come back with is "Wait until next year." Then next year comes and the SEC tribe is chanting in the closing minutes of the National Championship Game, "SEC, SEC, SEC!" The national championship trophy has been in the South for so long it has sunburn. That is why college football is thick with the acrimony: SEC vs. Everyone Else. The dominance of the SEC has a lot more to do with the South's culture than just the rock-'em, sock-'em of football played one day a week. The South lost the Civil War, and sociologists will tell you that there is still a regional angst, an "us against them" mentality, a spirit of "those damn Yankees." It is not just about championships. The SEC is about culture and competitiveness. . . . It is about players. *** How the SEC Became Goliath provides an inside look at college football's most dominant conference. Four different schools in the SEC have won the last six championship titles: Florida vs. Ohio State in 2006 January 8, 2007 • The Zook-Meyer Gators embarrass the Big Ten. Florida 41 Ohio State 14 LSU vs. Ohio State in 2007 January 7, 2008 • Unbeaten in regulation, the Tigers are good . . . and lucky. LSU 38 Ohio State 24 Florida vs. Oklahoma in 2008 January 8, 2009 • One of the best teams in history, these Gators are all Meyer's. Florida 24 Oklahoma 14 Alabama vs. Texas in 2009 January 7, 2010 • The Tide make it four in a row for the SEC. Alabama 37 Texas 21 Auburn vs. Oregon in 2010 January 10, 2011 • Cam Newton and Auburn cap a perfect season. Auburn 22 Oregon 19 Alabama vs. LSU in 2011 January 9, 2012 • Saban wins his third title and the SEC makes it six in a row. Alabama 21 LSU 0
