Marianne E. Krasny

Garbage Land Elizabeth Royte,2007-10-15 Out of sight, out of mind ... Into our trash cans go dead batteries, dirty diapers, bygone burritos, broken toys, tattered socks, eight-track cassettes, scratched CDs, banana peels.... But where do these things go next? In a country that consumes and then casts off more and more, what actually happens to the things we throw away? In *Garbage Land*, acclaimed science writer Elizabeth Royte leads us on the wild adventure that begins once our trash hits the bottom of the can. Along the way, we meet an odor chemist who explains why trash smells so bad; garbage fairies and recycling gurus; neighbors of massive waste dumps; CEOs making fortunes by encouraging waste or encouraging recycling-often both at the same time; scientists trying to revive our most polluted places; fertilizer fanatics and adventurers who kayak amid sewage; paper people, steel people, aluminum people, plastic people, and even a guy who swears by recycling human waste. With a wink and a nod and a tightly clasped nose, Royte takes us on a bizarre cultural tour through slime, stench, and heat-in other words, through the back end of our ever-more supersized lifestyles. By showing us what happens to the things we've disposed of, Royte reminds us that our decisions about consumption and waste have a very real impact-and that unless we undertake radical change, the garbage we create will always be with us: in the air we breathe, the water we drink, and the food we consume. Radiantly written and boldly reported, *Garbage Land* is a brilliant exploration into the soiled heart of the American trash can.

Google Apps: The Missing Manual Nancy Conner,2008-05-27 Among its many amazing applications, Google now has web-based alternatives to many of the applications in Microsoft Office. This comprehensive and easy-to-follow new book enables you to explore Google's new office applications in detail. Once you do, you'll be in good company -- more than 100,000 small businesses and some corporations are already looking to take advantage of these free Google offerings. *Google Apps: The Missing Manual* teaches you how to use three relatively new applications from Google: Docs and Spreadsheets, which provide many of the same core tools that you find in Word and Excel; and Google Calendar and Gmail, the applications that offer an alternative to Outlook. This book demonstrates how these applications together can ease your ability to collaborate with others, and allow you access to your documents, mail and appointments from any computer at any location. Of course, as remarkable as these applications are, Google's office suite is definitely a work-in-progress. Navigating what you can and can't do and -- more importantly -- understanding how to do it isn't always easy. And good luck finding enough help online. *Google Apps: The Missing Manual* is the one book you need to get the most out of this increasingly useful part of the Google empire. This book: Explains how to create, save and share each of Google's web-based office applications Offers separate sections for Docs and Spreadsheets, Google Calendar, and Gmail Demonstrates how to use these applications in conjunction with one another Gives you crystal-clear and jargon-free explanations that will satisfy users of all technical levels Many of you already use Gmail, but do you know its full potential? Do you know how you can increase its power by using Gmail with Doc and Spreadsheets and Google Calendar? You'll find out with *Google Apps: The Missing Manual*. You'll also come to understand why large corporations such as General Electric and Proctor & Gamble are taking a long, hard look at these applications.

Guidelines for the Implementation of MARPOL International Maritime Organization,2012 The Marine Environment Protection Committee (MEPC) of IMO, at its sixty-second session in July 2011, adopted the Revised MARPOL Annex V, concerning Regulations for the prevention of pollution by garbage from ships, which enters into force on 1 January 2013. The associated guidelines which assist States and industry in the implementation of MARPOL Annex V have been reviewed and updated and two Guidelines were adopted in March 2012 at MEPC's sixty-third session. The 2012 edition of this publication contains: the 2012 Guidelines for the implementation of MARPOL Annex V (resolution MEPC.219(63)); the 2012 Guidelines for the development of garbage management plans (resolution MEPC.220(63)); and the Revised MARPOL Annex V (resolution MEPC.201(62)).

Trash Talk Michelle Mulder,2015-04-01 Humans have always generated garbage, whether it's a chewed-on bone or a broken cell phone. Our landfills are overflowing, but with some creative thinking, stuff we once threw away can become a collection of valuable resources just waiting to be harvested. *Trash Talk* digs deep into the history of garbage, from Minoan trash pits to the Great Pacific Garbage Patch, and uncovers some of the many innovative ways people all over the world are dealing with waste.

Garbage Donna Latham,2011 Introduces waste and recycling, examines the effectiveness of recycling, and uses projects to investigate the world of trash.

Garbage Trucks Mary Lindeen,2010-08-01 Where does our garbage go after we throw it away? These huge machines pick up our garbage and transport it to landfills. Learn how garbage trucks lift garbage cans, pack down garbage, and get rid of their smelly cargo!

Trash Is Treasure JDIV,2023-12-19 Follow the life of Taiya, a female waste collector, as she navigates the world in search of many treasures. Adventure with her through the dating world while she attempts to help various people with the opportunities that are available to her. Visit my website: www.jdiv.net

All That Trash Meghan McCarthy,2018-02-27 An ALA Notable Book "The year was 1987 and a ship full of trash was about to become famous...The narrative is immensely readable...A fresh take on a story of old garbage guaranteed to spark conversations and a desire for actions among students. Highly recommended." –School Library Journal (starred review) A garbage barge that can't find a place to welcome it sparks a recycling movement in the United States in this smart and smelly picture book

from the author of Earmuffs for Everyone. Lowell Harrelson wanted to turn trash into methane gas so he rented a barge called Morbo 4000. His plan was to ship the garbage from New York to North Carolina, but as the barge floated down the coast, no state would let him dock because of smelly waste on board! The barge became a mockery and the butt of many jokes in the media. What started as an attempted business venture turned into quite the predicament for Mr. Harrelson. Mobro 4000 roamed the seas for forty-five days and traveled a distance of 6,000 miles. While awaiting its fate, the trash floated in New York's harbor, garnering much attention by onlookers. Green Peace activists put up a large banner across the barge that read, "NEXT TIME...TRY RECYCLING." Even though the garbage barge was a farce, the unintended consequence inspired America to find a new way to deal with its trash.

In This Together Marianne E. Krasny,2023-03-15 In This Together explores how we can harness our social networks to make a real impact fighting the climate crisis. Against notions of the lone environmental crusader, Marianne E. Krasny shows us the power of network climate action—the idea that our own ordinary acts can influence and inspire those close to us. Through this spread of climate-conscious practices, our individual actions become collective ones that can eventually effect widespread change. Weaving examples of everyday climate-forward initiatives in with insights on behavioral and structural change, Krasny demonstrates how we can scale up the impact of our efforts through leveraging our community connections. Whether by inviting family, friends, or colleagues to a plant-rich meal or by becoming activists at climate nonprofits, we can forge the social norms and shared identities that can lead to change. With easy-to-follow dos and don'ts, In This Together shows us a practical and hopeful way forward into our shared future.

Garbage Donna Latham,2011 Introduces waste and recycling, examines the effectiveness of recycling, and uses projects to investigate the world of trash.

Where Does the Garbage Go? Lincoln James,2012-01-01 Banana peels, apple cores, candy wrappers, and dirty diapers—it's all garbage. No one wants garbage piling up around their homes, so we put it at the curb for the garbage truck. The answers to where that garbage ends up might surprise readers. Informative photographs and a summarizing diagram show readers where our garbage goes. The text also offers ideas on how to help protect the planet by reducing the amount of garbage we throw away.

Garbage Goes Out! Riley Flynn,2018 Garbage looks disgusting and smells worse, but what happens to it after the garbage truck takes it away? Discover where our trash travels after we throw it away. From facts on landfills to information about how our trash habits affect the world around us. Readers will learn about why we need sanitation and the dirty truth about what happens to our garbage.

Follow That Garbage! Bridget Heos,2016-08 A child watching a garbage truck pick up the trash wonders where it goes, and the story follows two garbage bags as they travel to a transfer station and then to a landfill. Includes Recycle it Yourself activity and further resources.

Garbage Trucks Beth Bence Reinke,2018 Have you ever thought about what happens to your trash every week? And the big trucks you see on trash day? Read more about garbage trucks and their important job! Carefully leveled text teaches young readers about this machine, with age-appropriate critical thinking questions and fresh photos.

Low-Carbon Smart Cities Kwi-Gon Kim,2017-07-10 This book aims to integrate climate mitigation and adaptation tools into conventional urban planning. It emphasizes the value and importance of ICT as connected technology. The author believes that ICT and IOT can facilitate controlling climate change attributes when deployed with appropriate ingredients and composition in cities in an integrated comprehensive manner. It was written with the author's firm belief that cities play an important role in mitigating climate change by reducing energy consumption, promoting the use of renewable energy sources, or by trading emission permits and selling Certified Emission Rights (CERs). This book looks at green growth based on the circular economy using green smart technology as a sustainable tool for green economic development. Also for climate change adaptation, cities have to take actions to reduce the adverse impacts of climate change on people, property and ecosystems in the urban planning process. It has been written with the author's works for Urban Environment Accords (UEA) and International Urban Training Center (IUTC) in collaboration with UNEP, World Bank, UNFCCC and UN-HABITAT. It can be used as a training source book for city climate planners and urban practitioners of local governments. It will be utilized as a more practical guidebook for climate change policy makers as well as a futuristic research agenda for next generations.
