Ransomware Revolution: The Rise of a Prodigious Cyber Threat Matthew Ryan, 2021-02-24 This book explores the genesis of ransomware and how the parallel emergence of encryption technologies has elevated ransomware to become the most prodigious cyber threat that enterprises are confronting. It also investigates the driving forces behind what has been dubbed the 'ransomware revolution' after a series of major attacks beginning in 2013, and how the advent of cryptocurrencies provided the catalyst for the development and increased profitability of ransomware, sparking a phenomenal rise in the number and complexity of ransomware attacks. This book analyzes why the speed of technology adoption has been a fundamental factor in the continued success of financially motivated cybercrime, and how the ease of public access to advanced encryption techniques has allowed malicious actors to continue to operate with increased anonymity across the internet. This anonymity has enabled increased collaboration between attackers, which has aided the development of new ransomware attacks, and led to an increasing level of technical complexity in ransomware attacks. This book highlights that the continuous expansion and early adoption of emerging technologies may be beyond the capacity of conventional risk managers and risk management frameworks. Researchers and advanced level students studying or working in computer science, business or criminology will find this book useful as a reference or secondary text. Professionals working in cybersecurity, cryptography, information technology, financial crime (and other related topics) will also welcome this book as a reference.

Cultural Tourism Research Methods Greg Richards, Wil Munsters, 2010 The consumption of

culture is one of the most important aspects of tourism activity. Cultural tourism includes experiencing local culture, traditions and lifestyle, participation in arts-related activities, and visits to museums, monuments and heritage sites. This book reviews a wide range of qualitative and quantitative research methods applied to the field of cultural tourism, including surveys, mystery tourist visits, visitor tracking, grand tour narratives, collage, researcher-created video, photo-based interviews, ethnographic and actor-network approaches. It provides a practical guide on how to conduct research as well as a discussion and evaluation of the methods.

Camera Trapping Peter Fleming,Paul Meek,Guy Ballard,Peter Banks,Andrew Claridge,Jim Sanderson,Don Swann,2014-11-20 Camera trapping in wildlife management and research is a growing global phenomenon. The technology is advancing very quickly, providing unique opportunities for collecting new biological knowledge. In order for fellow camera trap researchers and managers to share their knowledge and experience, the First International Camera Trapping Colloquium in Wildlife Management and Research was held in Sydney, Australia. Camera Trapping brings together papers from a selection of the presentations at the colloquium and provides a benchmark of the international developments and uses of camera traps for monitoring wildlife for research and management. Four major themes are presented: case studies demonstrating camera trapping for monitoring; the constraints and pitfalls of camera technologies; design standards and protocols for camera trapping surveys; and the identification, management and analyses of the myriad images that derive from camera trapping studies. The final chapter provides future directions for research using camera traps. Remarkable photographs are included, showing interesting, enlightening and entertaining images of animals 'doing their thing'.

US Firms' Business Competence in the Taiwanese IT Industry Pi-Chi Chen,Young-Chan Kim,2016-06-24 This book offers an in-depth analysis of the roles and strategies of subsidiaries of American multinational companies (MNCs) in Taiwan's IT industry. Based on semi-structured interviews with 16 managing directors of the different foreign-owned subsidiaries and 100 functional unit managers, the authors investigate (1) the roles of functional units in evaluating strategy formulation and change in foreign subsidiaries; (2) the factors that determine strategy formulation and change in foreign subsidiaries and their functional units; and (3) the linkages between cross-functional units. The research underscores the view that MNCs' strategies are composed of assorted heterogeneous elements.

Overlander Rupert Guinness,2018-08-01 A powerful memoir about an epic bike race across one of the most challenging landscapes in the world Rupert Guinness set out on the trip of a lifetime: to race across Australia in the inaugural Indian Pacific Wheel Race. This was no ordinary bike race. Unlike the Tour de France, which Guinness had made his name reporting on for decades, competitors rode completely unassisted from Fremantle in Western Australia to the Opera House in Sydney on the other side of the country - a gruelling distance of over 5000 kilometres that would not only test riders' physical endurance but their psychological resilience. Dubbed 'The Hunger Games on Wheels', there would be no help, just riders and their bikes crossing one of the most beautiful - and often most inhospitable - places on earth. Rupert's mission was to test his own grit, physical and emotional, as he followed the trail of the pioneering men and women whose historic rides over the last two centuries unveiled a largely unknown interior. But when a terrible tragedy stopped everyone in their tracks, what he discovered was the extraordinary power of the human spirit. Rupert and his fellow competitors were forced to make some of the toughest decisions they had ever faced.

Emergence of Pharmaceutical Industry Growth with Industrial IoT Approach Valentina E. Balas,Vijender Kumar Solanki,Raghvendra Kumar,2019-09-24 Emergence of Pharmaceutical Industry Growth with Industrial IoT Approach uses an innovative approach to explore how the Internet of

Things (IoT) and big data can improve approaches, create efficiencies and make discoveries. Rapid growth of the IoT has encouraged many companies in the manufacturing sector to make use of this technology to unlock its potential. Pharmaceutical manufacturing companies are no exception to this, as IoT has the potential to revolutionize aspects of the pharmaceutical manufacturing process, from drug discovery to manufacturing. Using clear, concise language and real world case studies, this book discusses systems level from both a human-factors point-of-view and the perspective of networking, databases, privacy and anti-spoofing. The wide variety of topics presented offers readers multiple perspectives on a how to integrate the Internet of Things into pharmaceutical manufacturing. Covers efficiency improvements of pharmaceutical manufacturing through IoT/Big Data approaches Explores cutting-edge technologies through sensor enabled environment in the pharmaceutical industry Discusses the systems level from both a human-factors point-of-view and the perspective of networking, databases, privacy and anti-spoofing

Internet of Things and Big Data Applications Valentina E. Balas,Vijender Kumar

Solanki,Raghvendra Kumar,2020-02-24 This book provides essential future directions for IoT and Big Data research. Thanks to rapid advances in sensors and wireless technology, Internet of Things (IoT)-related applications are attracting more and more attention. As more devices are connected, they become potential components for smart applications. Thus, there is a new global interest in these applications in various domains such as health, agriculture, energy, security and retail. The main objective of this book is to reflect the multifaceted nature of IoT and Big Data in a single source. Accordingly, each chapter addresses a specific domain that is now being significantly impacted by the spread of soft computing

Intelligent Internet of Things for Smart Healthcare Systems Durgesh Srivastava,Neha

Sharma,Deepak Sinwar,Jabar H. Yousif,Hari Prabhat Gupta,2023-02-23 The book focuses on developments in artificial intelligence (AI) and internet of things (IoT) integration for smart healthcare, with an emphasis on current methodologies and frameworks for the design, growth, implementation, and creative use of such convergence technologies to provide insight into smart healthcare service demands. Concepts like signal recognition, computation, internet of health stuff, and so forth and their applications are covered. Development in connectivity and intelligent networks allowing for social adoption of ambient intelligence is also included. Features: •Introduces Intelligent IoT as applicable to the key areas of smart healthcare. •Discusses computational intelligence and IoT-based optimizations of smart healthcare systems •Explores effective management of healthcare systems using dedicated IoT-based infrastructures •Includes dedicated chapters on securing patient's confidential data •Reviews diagnosis of critical diseases from medical imaging using advanced deep learning-based approaches This book is aimed at researchers, professionals, and graduate students in intelligent systems, big data, cloud computing, information security, and healthcare systems.

Using the Google Places API and Google Trends Data to Develop High Frequency Indicators of Economic Activity Mr. Paul A Austin,Mr. Marco Marini,Alberto Sanchez,Chima Simpson-Bell,James Tebrake,2021-12-17 As the pandemic heightened policymakers' demand for more frequent and timely indicators to assess economic activities, traditional data collection and compilation methods to produce official indicators are falling short—triggering stronger interest in real time data to provide early signals of turning points in economic activity. In this paper, we examine how data extracted from the Google Places API and Google Trends can be used to develop high frequency indicators aligned to the statistical concepts, classifications, and definitions used in producing official measures. The approach is illustrated by use of Google data-derived indicators that predict well the GDP trajectories of selected countries during the early stage of COVID-19. To this end, we developed a methodological toolkit for national compilers interested in using Google data to enhance the timeliness and frequency of economic indicators.
