*Submódulo I. Comunidades virtuales* Marco Antonio Herrera Morales, Carlos Rodríguez Gómez, 2020-02-01 Módulo II. Hardware y comunicaciones. Submódulo 1. Comunidades virtuales El contenido de la obra está basado en el plan de estudios del Modelo Educativo para la Educación Obligatoria (MEPEO). El propósito general de la capacitación de Tecnologías de la Información y Comunicación es: Desarrollar la capacidad para proponer soluciones a problemas del contexto laboral y escolar, mediante la aplicación de las Tecnologías de la Información y de la Comunicación, de forma creativa e innovadora, con una postura ética y responsable como ciudadano digital. El uso de las Tecnologías de la Información y Comunicación, desde esta capacitación, destaca el manejo avanzado de las aplicaciones de software y hardware para la resolución de problemas de los diferentes ámbitos de la vida cotidiana, desarrollando los aspectos metodológicos, creativos y comunicativos, sin olvidar un comportamiento propositivo en beneficio personal y dentro de la sociedad. La capacitación de Tecnologías de la Información y Comunicación busca desarrollar en el alumnado las competencias profesionales en las áreas de aplicaciones de oficina, los elementos del hardware, las comunicaciones mediante las redes informáticas, el desarrollo de sistemas y el software de diseño, sin olvidar la promoción de las competencias genéricas, la interdisciplinariedad y los ejes transversales de vinculación laboral, emprendimiento así como la continuación de sus estudios a nivel superior. En el contexto curricular de la capacitación de Tecnologías de la Información y Comunicación, el contenido se divide en cuatro módulos que se imparten a partir del tercer semestre con una carga de 7 horas semanales, cada módulo se integra por dos submódulos en los que se busca desarrollar el manejo de aplicaciones de oficina que permiten elaborar documentos electrónicos con características avanzadas utilizando el procesador de textos y la hoja de cálculo, crear y participar en comunidades virtuales para el intercambio de información incluyendo el ámbito educativo, aplicar mantenimiento al equipo de cómputo; para el desarrollo de sistemas con fundamento en las bases de datos y la programación, mediante la creación de páginas web y el software de diseño lograr comunicar ideas e información, en el entorno laboral y escolar. Todas estas competencias posibilitan al egresado en su incorporación al mundo laboral o bien para desarrollar procesos productivos independientes de acuerdo con sus intereses profesionales o las necesidades de su entorno social como asistente en las siguientes áreas: administrativas, soporte técnico, área de sistemas, publicidad, y otras, en diferentes instituciones tanto públicas como privadas. A través de este contenido se busca integrar comunidades virtuales con la intención de generar la interacción del estudiantado, utilizando software social y educativo favoreciendo un ambiente de comunicación incluyente y ético dentro de su entorno personal, profesional y educativo.

**Miradas a la historia** Juan José Carreras Ares, 2004 Miradas a la historia ofrece al lector una serie de reflexiones de carácter historiográfico, metodológico y didáctico para abarcar diversas facetas del saber y la actividad del historiador. La obra se publica como recuerdo de la Universidad de Murcia a su profesor de Historia Miguel Rodríguez Llopis, fallecido en 2002.

*Sustainability in Public Procurement, Corporate Law and Higher Education* Lela Melon, 2023-12-12 Contemporary changes in law and policy at the global level to efficiently answer to environmental and social issues correspond to the traditional approach of limiting the regulatory and policy changes to a singular field or discipline: tackling the inherent unsustainability of corporate laws or incentivising the offering of sustainable finance to stimulate the transition towards sustainable practices. This book provides a new viewpoint and approach of simultaneously regulating seemingly non-connected fields in order to provide a fertile ground for a truly organic change towards sustainable outcomes. It addresses diverse questions of sustainable transition of the three specific fields to support sustainable practices in public procurement, private market transaction, and in educating future business leaders and legal experts by incorporating sustainable concerns as the underlying guiding principles of their conduct. It translates scientific findings into a practical format that can be used by diverse stakeholders searching for information and solutions in their respective professional fields. The underlying assumption is that a simultaneous action in the three respective fields of public procurement, corporate law, and higher education brings about more coherent and interconnected results that incentivise further action and changes towards sustainable practices. The book furthers the idea of policy coherence by building upon the findings in the field of public procurement, corporate law, and practice and higher education curricula. By identifying the barriers in the three respective fields for sustainable action and proposing solutions for either eliminating or minimising those barriers at the EU level, the book calls for further changes in the respective fields as well as for considering the spillover effects of these policies on other fields.

**Pedagogy of Hope** Paulo Freire, 2021-05-20 With the publication of *Pedagogy of the Oppressed*, Paulo Freire established himself as one of the most important and radical educational thinkers of his time. In *Pedagogy of Hope*, Freire revisits the themes of his masterpiece, the real world contexts that inspired them and their impact in that very world. Freire's abiding concern for social justice and education in the developing world remains as timely and as inspiring as ever, and is shaped by both his rigorous intellect and his boundless compassion. *Pedagogy of Hope* is a testimonial to the inner vitality of generations denied prosperity and to the often-silent, generous strength of millions throughout the world who refuse to let hope be extinguished. This edition includes a substantial new introduction by Henry A. Giroux, University Chair for Scholarship in the Public Interest and the Paulo Freire Distinguished Scholar in Critical Pedagogy at McMaster University, Canada. Translated by Robert R. Barr.

*Integrating Scientific Disciplines* William Bechtel, 2012-12-06 Interdisciplinary research has been a popular idea with many people in the last 20 years. Academic administrators have admonished their faculty to become more interdisciplinary. Students often request the chance to pursue an interdisciplinary degree. While the issue of managing interdisciplinary projects has received a fair amount of attention by those interested in science management, interdisciplinary research has received little attention from historians, philosophers or sociologists of science or from scientists themselves. Yet, there is a number of cases within the life sciences where researchers have been actively engaged in endeavors that take them across disciplinary boundaries. These are ripe for investigation by those interested in the process of science. To provide an in-depth study of some historical or contemporary cases of cross disciplinary research activity in the life sciences, a conference was held at Georgia State University in May, 1984. This conference was supported by the National Endowment for the Humanities (U. S. A. ) through their research conference program. Over a three-day period historians, philosophers, and researchers who were actively engaged in various of the life sciences discussed specific examples of interdisciplinary research and tried to analyze what was needed for successful crossing of disciplinary boundaries. After the conference, each of the participants revised their original presentations, partly in light of the discussion at the conference. The papers in this volume are the fruits of that

endeavor.

Historia de la música en España e Hispanoamérica Juan Angel Vela del Campo,María del Carmen Gómez Muntané,Alvaro Torrente,José Máximo Leza,Juan José Carreras Ares,Consuelo Carredano,Victoria Eli Rodríguez,Alberto González Lapuente,2009 Una aproximación a la historia de la música en España e Hispanoamérica, en ocho tomos, desde una perspectiva de nuestro tiempo, supone un ejercicio de reflexión, o de rigurosa divulgación, para comprender mejor, en términos musicales, de donde venimos y lo que somos. No pretende esta colección sentar cátedra sino invitar a pensar por qué la música ha evolucionado de una manera determinada y no de otra. Los criterios de acercamiento son plurales y abiertos, sin ningún tipo de dogmatismo, buscando más la sugerencia que la tesis, la información precisa que la especulación, el espíritu científico que la ficción. En el fondo pretenden estos sustanciosos ensayos suministrar claves para disfrutar más con la música, situándola en sus contextos, subrayando sus prioridades, indagando sus rebeldías.

**The Boost C++ Libraries** Boris Schäling, The second edition of The Boost C++ Libraries introduces 72 Boost libraries that provide a wide range of useful capabilities. They help you manage memory and process strings more easily. They provide containers and other data structures that go well beyond what the standard library offers. They make it easy to build platform-independent network applications. Simply put, these 72 libraries greatly expand your C++ toolbox. The second edition contains more than 430 examples. All examples are as short as possible, but they are complete, so you can compile and run them as is. They show you what the Boost libraries offer and give you a head start on using the libraries in your own applications. The goal of this book is to increase your efficiency as a C++ developer and to simplify software development with C++. The Boost libraries introduced in this book will help you write less code with fewer bugs and finish projects faster. You code will be more concise and self-explanatory and more easily adapted when requirements change. The second edition is based on the Boost libraries 1.55.0 and 1.56.0 with the latter version having been released in August 2014. The examples are based on C++11 and have been tested with Visual Studio 2013, GCC 4.8 and Clang 3.3 on various platforms. For Boost libraries which were incorporated into the C++11 standard library, differences between Boost and the standard library are highlighted. The Boost libraries are one of the most important and influential open source C++ libraries. Their source code is available under a permissive free software license. Several Boost libraries have been incorporated into the C++11 standard library. The Boost libraries are developed and supported by the Boost community - a worldwide developer community with a strong interest in pushing C++ boundaries further.
