**Computational Techniques in Neuroscience** Kamal Malik,Harsh Sadawarti,Moolchand

Sharma,Umesh Gupta,Prayag Tiwari,2023-11-14 The text discusses the techniques of deep learning and machine learning in the field of neuroscience, engineering approaches to study the brain structure and dynamics, convolutional networks for fast, energy-efficient neuromorphic computing, and reinforcement learning in feedback control. It showcases case studies in neural data analysis.

Features: Focuses on neuron modeling, development, and direction of neural circuits to explain perception, behavior, and biologically inspired intelligent agents for decision making Showcases important aspects such as human behavior prediction using smart technologies and understanding the modeling of nervous systems Discusses nature-inspired algorithms such as swarm intelligence, ant colony optimization, and multi-agent systems Presents information-theoretic, control-theoretic, and decision-theoretic approaches in neuroscience. Includes case studies in functional magnetic resonance

imaging (fMRI) and neural data analysis This reference text addresses different applications of computational neuro-sciences using artificial intelligence, deep learning, and other machine learning techniques to fine-tune the models, thereby solving the real-life problems prominently. It will further discuss important topics such as neural rehabilitation, brain-computer interfacing, neural control, neural system analysis, and neurobiologically inspired self-monitoring systems. It will serve as an ideal reference text for graduate students and academic researchers in the fields of electrical engineering, electronics and communication engineering, computer engineering, information technology, and biomedical engineering.

**Directory of Publishers and Booksellers in India** K.r Gupta,2004 This Revised And Enlarged Edition Of The Directory Of Publishers And Booksellers In India Contains Much Larger Number Of Addresses Of Publishers And Booksellers. Further, Much More Information Has Been Given About Them And Their Field Of Operation. The Directory Includes Postal Addresses, Phone Numbers, Fax Numbers, Email Addresses And Websites, Wherever Available, Of More Than Eight Thousand Leading Indian

Publishers, Wholesalers, Booksellers, Importers And Exporters.It Is Hoped That The Directory In Its Present Form Would Be Highly Useful For Publishers And Booksellers In Mailing Their Publicity Material. The Directory Would Be Of Great Value For Librarians For Getting Information About Publishers And Booksellers In India For Their Procurement Of Books.The Directory Would Also Be Useful For Those Who Provide Materials And Services For Publishers And Booksellers E.G. Paper Manufacturers & Distributors, Computers (Software & Hardware) Suppliers, Packaging Machinery & Materials Suppliers, Printers & Binders, Epabx-Manufacturers & Distributors, Office Furniture And Equipment And Photocopy Machines Suppliers, Slotted Angle Racks Manufacturers And Suppliers, Etc.

**English Learning Made Easy- Strategies and Approaches** Dr Reena Mittal,Dr Archana

Rathore,2015-04-03 Books are always our best companion. The idea of writing or editing a book remains always in our mind. Our students come from semi-urban background and not very fluent in English reading, writing and speaking. English is not just a Second language to them, but it is completely a foreign language to the rural background pupils. So, we research innovative techniques to make them familiar. This continuous research motivates us to edit a book on the topic. We can well

see the potential of the book as it is not just about the ‘Teaching’ of English but basically about ‘Learning’ English as such. But of course it will be very helpful for ELT, per se. The book making is a long process and it needs a careful study of area, topics and research methodologies, along with very intensive and extensive genuine research work before we start. The very first thing which struck our mind was to choose the topic which could be beneficial for students and teachers both. Our undergraduate students, who actually lack Basic English speaking, reading and writing standard, gave us many new topics to write. They and their problems motivated us to collect opinions of our fellow colleagues on the wider perspectives of the chosen topic and edit a book on the subject. We have endeavored to cover many areas which need to be given emphasize when we teach or learn English. Our main focus is to give tricks and useful tips to enhance and learn English as a second language.

*Strategic System Assurance and Business Analytics* P. K. Kapur,Ompal Singh,Sunil Kumar

Khatri,Ajit Kumar Verma,2020-06-19 This book systematically examines and quantifies industrial problems by assessing the complexity and safety of large systems. It includes chapters on system performance management, software reliability assessment, testing, quality management, analysis using soft computing techniques, management analytics, and business analytics, with a clear focus on exploring real-world business issues. Through contributions from researchers working in the area of performance, management, and business analytics, it explores the development of new methods and approaches to improve business by gaining knowledge from bulk data. With system performance analytics, companies are now able to drive performance and provide actionable insights for each level and for every role using key indicators, generate mobile-enabled scorecards, time series-based analysis using charts, and dashboards. In the current dynamic environment, a viable tool known as multi-criteria decision analysis (MCDA) is increasingly being adopted to deal with complex business decisions. MCDA is an important decision support tool for analyzing goals and providing optimal solutions and alternatives. It comprises several distinct techniques, which are implemented by

specialized decision-making packages. This book addresses a number of important MCDA methods, such as DEMATEL, TOPSIS, AHP, MAUT, and Intuitionistic Fuzzy MCDM, which make it possible to derive maximum utility in the area of analytics. As such, it is a valuable resource for researchers and academicians, as well as practitioners and business experts.

*International Conference on Advanced Intelligent Systems for Sustainable Development* Janusz Kacprzyk, Mostafa Ezziyyani, Valentina Emilia Balas, 2023-06-09 This book describes the potential contributions of emerging technologies in different fields as well as the opportunities and challenges related to the integration of these technologies in the socio-economic sector. In this book, many latest technologies are addressed, particularly in the fields of computer science and engineering. The expected scientific papers covered state-of-the-art technologies, theoretical concepts, standards, product implementation, ongoing research projects, and innovative applications of Sustainable

Development. This new technology highlights, the guiding principle of innovation for harnessing frontier technologies and taking full profit from the current technological revolution to reduce gaps that hold back truly inclusive and sustainable development. The fundamental and specific topics are Big Data Analytics, Wireless sensors, IoT, Geospatial technology, Engineering and Mechanization, Modeling Tools, Risk analytics, and preventive systems.
