Paranormal Technology David M. Rountree, 2010-08-26 Paranormal Technology is the first book to provide a scientific method for ghost hunting, which includes in-depth explanations of what the collected data means. Paranormal Technology offers new techniques, answers questions, and provides experiments, which will help bridge the gap between the paranormal and science. Written in everyday language, it offers keen insights into the nature of paranormal phenomena, the protocols required for collecting evidence that will stand up to scientific scrutiny, and the possible theories that may explain the source of Ghosts. Currently employed test equipment is examined and proper use is covered in great detail. Paranormal Technology is an indispensable aid to any scientific researcher or ghost hunting group, whether you are a beginner, or with many years of experience. This book is not a means to an end, but rather, an invitation to a fresh beginning.

Global Mobile Media Gerard Goggin, 2010-10-18 Gerard Goggin has produced an incisive and penetrating overview of the world according to mobiles. Covering sight, sound and status, plus a host of other issues, he provides a provocative analysis of how mobile communication gadgets come to play such a prominent role in our lives. Any scholar of New Media will want to read this book – James Katz, Department of Communication, Rutgers University, USA With billions of users worldwide, the cell phone is not only a successful communications technology; it is also key to the future of media. Global Mobile Media offers an overview of the complex topic of mobile media, looking at the emerging industry structures, new media economies, mobile media cultures and network politics of cell phones as they move centre-stage in media industries. The development, adoption and significance of cell phones for society and culture have been registered in a growing body of work. Where existing books have focused on communication, and on the social and cultural aspects of mobile media, Global Mobile Media looks at the media dimensions. Goggin provides a pioneering yet measured evaluation of how cell phone corporations, media interests, users and policy makers are together shaping a new media dispensation. Global Mobile Media successfully places new mobile media historically, socially and culturally in a wider field of portable media technologies through extensive case studies, including: the rise of smartphones, with a detailed discussion of the Apple iPhone and how it has catalysed a new phase in convergent media, audiences and innovation the new agenda in cultural politics and media policy, featuring topics such as iPhone apps and control, mobile commons, and open mobile networks a succinct map of the political economy of mobile media, identifying key players, patterns of ownership and control, institutions, and issues a critical account of cell phones' involvement in and contribution to much-discussed new forms of production and consumption, such as user-generated content, p2p networks, open and free source software networks an anatomy of how cell phones relate to other online media, particularly the Internet and wireless technologies. Global Mobile Media is an engaging, accessible text which will be of immense interest to upper-level undergraduates, postgraduates and researchers in Communication Studies, Cultural Studies and Media Studies, as well as those taking New Media courses.

Cultural Adaptation Albert Moran, Michael Keane, 2013-09-13 Cultural borrowing is exploding across the world. Creative ideas are transferred and modified in ever increasing number and complexity making new products ranging from TV shows to architectural style in new cities. But what do we really know about the spread of creative ideas? This intriguing, engrossing, and comprehensive collection looks at the cultural and commercial dimensions of creative borrowing world wide with an international cast of contributors and case studies from India to Ireland, Canada to China. Cultural Adaptation explores how creative ideas are packaged and nationalised to meet

local taste, maps the cultural economy of adaptation in entertainment media ranging from motion pictures to mobile phones, and even probes the role of cultural recipes and formats in mutating participatory experiences of theme parks and sporting spectacles. Written in a lively and accessible manner, the book also provides insight into remaking in lifestyle and consumption cultures including fashion, food, drink, and gambling. Essential for communication, cultural, media, leisure and consumption studies scholars and students alike, this book opens up important new perspectives on how we understand global creativity. This book was published as a special issue of *Continuum: Journal of Media and Cultural Studies*.

Studying Mobile Media Larissa Hjorth, Jean Burgess, Ingrid Richardson, 2012-04-23 The iPhone represents an important moment in both the short history of mobile media and the long history of cultural technologies. Like the Walkman of the 1980s, it marks a juncture in which notions about identity, individualism, lifestyle and sociality require rearticulation. This book explores not only the iPhone's particular characteristics, uses and affects, but also how the iPhone moment functions as a barometer for broader patterns of change. In the iPhone moment, this study considers the convergent trajectories in the evolution of digital and mobile culture, and their implications for future scholarship. Through the lens of the iPhone—as a symbol, culture and a set of material practices around contemporary convergent mobile media—the essays collected here explore the most productive theoretical and methodological approaches for grasping media practice, consumer culture and networked communication in the twenty-first century.

**The Craft of Scientific Films** Lauren Murphy, Michael Alley, 2023-08-31 This book, the first of its kind, helps scientists and engineers of all stages and disciplines share their work in a new way—with movies. Today, much of scientific communication is embedded in papers and presentations, but these documents don't often extend outside of a specific academic field. By adding movies as a medium of communication, scientists and engineers can better communicate with their colleagues while also increasing their reach to students, professors, peers, potential collaborators, and the public. Scientific films help translate complex technical topics into more accessible and consumable messages. By following Lauren Murphy's filmmaking formula – planning, shooting, and editing – readers will create their very own scientific films that look professional and polished. Using tools as simple as a smartphone, readers can develop short, personal stories with no cost or experience needed. This book will guide readers through all steps of the movie making process to a finished product. Readers will evolve their creative thinking skills and use their movies to improve classroom presentations, network across student organizations, present at conferences, recruit students for their labs, secure grant money, and more. Adding a movie to your body of work can be the tool that sparks interest in audiences to learn more—driving traffic to your publications, research projects, and websites. This book will help you develop new skills to become a better communicator while spreading your ideas and research to new audiences.

**Pints with Aquinas** Matt Fradd, 2016-08-10 If you could sit down with St. Thomas Aquinas over a pint of beer and ask him any one question, what would it be? Pints With Aquinas contains over 50 deep thoughts from the Angelic doctor on subjects such as God, virtue, the sacraments, happiness, alcohol, and more. If you've always wanted to read St. Thomas but have been too intimidated to try, this book is for you. So, get your geek on, pull up a bar stool and grab a cold one, here we go! He alone enlightened the Church more than all other doctors; a man can derive more profit in a year from his books than from pondering all his life the teaching of others. - Pope John XXII

**Advances in Communication Research to Reduce Childhood Obesity** Jerome D. Williams, Keryn E Pasch, Chiquita A.

Collins, 2013-02-12 Rates of childhood obesity are alarmingly high and increasing each year. Studies have shown that obese children are more likely to become obese adults and are likely to suffer with numerous health consequences like coronary heart disease, high blood pressure, and Type II diabetes, among others. Studies also indicate that television viewing and exposure to advertising for food products influences children's attitudes toward, food preferences and food purchase requests for foods with low nutritional value. It is important to better understand the role of media in childhood obesity and to learn how media may be used to address this issue in a positive way. This book focuses on communication and media research that can have an impact on reducing childhood obesity. Emphasis is placed on topics related to how the media communicate health-related messages about food, nutrition and diet that influence childhood obesity. Particular emphasis is on the new media, given the fact that media now have more central roles in socializing today's children and youth than ever before. Advertising and marketing messages reach young consumers through a variety of vehicles - broadcast and cable television, radio, magazines, computers through the Internet, music, cell phones - and in many different venues - homes, schools, child-care settings, grocery stores, shopping malls, theaters, sporting events, and even airports. In addition, given the disparity in obesity rates between children of color and the general population, special attention is given to research on media targeting these populations.

*Spooky Technology: A reflection on the invisible and otherworldly qualities in everyday technologies* Daragh Byrne, Dan Lockton, Matthew Cruz, Christi Danner, Karen Escarcha, Katherine Giesa, Meijie Hu, Yiwei Huang, Miranda Luong, Anuprita Ranade, Gordon Robertson, Elizabeth Wang, Lisa (Yip Yan) Yeung, Catherine Yochum, 2021-08-31 Spooky Technology explores our understanding of the invisible technologies in our everyday lives, from objects with 'intelligence' to systems in our homes that talk to us (and each other). The book is an inventory of spooky technologies, compiled by Carnegie Mellon students reviewing work across art, design, HCI, psychology, human factors research, and other fields, that has been done in this field, or adjacent to it, both historically and more recently, with commentary, essays, and interviews with creators and artists. We often hear that the technologies in our everyday lives would appear to be 'magic' and potentially terrifying to people in the past—instantaneous communication with people all over the world, access to a vast, ever-growing resource of human knowledge right there in the palm of our hand, objects with 'intelligence' that can sense and talk to us (and each other). But rarely are these 'otherworldly' dimensions of technologies explored in more detail. There

is an often unspoken presumption that the march of progress will inevitably mean we all adopt new practices, and incorporate new products and new ways of doing things into our lives—all cities will become smart cities; all homes will become smart homes. But these systems have become omnipresent without our necessarily understanding them. They are not just black boxes, but invisible: entities in our homes and everyday lives which work through hidden flows of data, unknown agendas, imaginary clouds, mysterious sets of rules which we perhaps dismiss as ‘algorithms’ or even ‘AI’ without really understanding what that means. On some level, the superstitions and sense of wonder, and ways of relating to the unknown and the supernatural (deities, spirits, ghosts) which humanity has felt in every culture throughout history have not gone away, but started to become transferred and transmuted into new forms.

The Routledge Companion to Mobile Media Art Larissa Hjorth, Adriana de Souza e Silva, Klare Lanson, 2020-07-28 In this companion, a diverse, international and interdisciplinary group of contributors and editors examine the rapidly expanding, far-reaching field of mobile media as it intersects with art across a range of spaces—theoretical, practical and conceptual. As a vehicle for—and of—the everyday, mobile media is recalibrating the relationship between art and digital networked media, and reshaping how creative practices such as writing, photography, video art and filmmaking are being conceptualized and practised. In exploring these innovations, The Routledge Companion to Mobile Media Art pulls together comprehensive, culturally nuanced and interdisciplinary approaches; considerations of broader media ecologies and histories and political, social and cultural dynamics; and critical and considered perspectives on the intersections between mobile media and art. This book is the definitive publication for researchers, artists and students interested in comprehending all the various aspects of mobile media art, covering digital media and culture, internet studies, games studies, anthropology, sociology, geography, media and communication, cultural studies and design.

**It's a Ghost's Life** Erin McCarthy, 2019-06-23 When the bitterly cold days of January descend on Cleveland, Bailey Burke finds her "Put It Where?" home staging business is as frozen as her toes. The only bright spot is the return of her friend Ryan after his, ahem, eviction from heaven. Especially since no other dead people seem to be harassing her in recent weeks. Yet when her grandmother's bingo buddy turns up frozen solid in a stranger's back yard, Bailey is the only one who finds the death suspicious. Only Bailey knows fashion and she knows Shirley, a one-time film star, would not be caught dead, literally, in a stained nightgown. Determined it prove it is homicide and not dementia, she enlists Ryan's help to investigate, despite his ghostly limitations. This time Bailey is ready to play it smart, solve the crime, have the bad guy do the time... only all is fair game in bingo and eccentric backstabbing biddies with gobs of cash.
