Persian Service Annabelle Sreberny,Massoumeh Torfeh,2014-01-16 Rumour and speculation in Iran have been rife for generations that the BBC has had a hand in every political upheaval in the country. In this vein the BBC has become a notable element in the complex and tortured narrative of Anglo-Iranian relations. The BBC Persian Service was initially developed in 1940 to prepare and broadcast British war-time propaganda. And it has since been seen by many in Iran as an integral part of British policy-making in the region. Thirty years ago, the Shah of Iran regarded the BBC Persian Service radio as his 'enemy number one' and held it responsible for promoting the revolution of 1979. Only a couple decades earlier, the BBC Persian Service was widely accused for having been complicit in the CIA-led 1953 coup against Prime Minister Mohammad Musaddiq. And a decade earlier, the BBC Persian Service was strongly linked to the British-planned removal of Reza Shah in 1941. The BBC

Persian service has frequently been perceived as an entity which was not simply a vehicle to record the changes occurring in Iran and throughout the Middle East, but rather an active agent of change. In this book, Annabelle Sreberny and Massoumeh Torfeh track the history of the BBC Persian Service, critically analysing both the assumptions that the BBC is a standard bearer for objective reporting and representations of it as a simple tool of Western interests. Also examining the history of relations between the Foreign Office and the BBC Persian Service, they demonstrate that these have never been pre-defined or rigid. Instead, they explore how both institutions have moved from an interest in what can crudely be called state-orchestrated 'propaganda' to a more subtle advocacy of fair and balanced journalism as the best agent of British values and influence.

Self-Reg Dr. Stuart Shanker, 2016-06-21 There's no such thing as a bad kid. That's what a lifetime of experience has taught Dr. Stuart Shanker. No matter how difficult, out of control, distracted, or exhausted a child might seem, there's a way forward: self-regulation. Overturning decades of conventional wisdom, this radical new technique allows children and the adults who care for them to regain their composure and peace of mind. *Self-Reg* is a groundbreaking book that presents an entirely new understanding of your child's emotions and behavior and a practical guide for parents to help their kids engage calmly and successfully in learning and life. Grounded in decades of research and working with children and parents by Dr. Shanker, *Self-Reg* realigns the power of the parent-child relationship for positive change. Self-regulation is the nervous system's way of responding to stress. We are seeing a generation of children and teens with excessively high levels of stress, and, as a result, an explosion of emotional, social, learning, behavior, and physical health problems. But few parents recognize the "hidden stressors" that their children are struggling with: physiological as well as social and emotional. An entrenched view of child rearing sees our children as lacking self-control or willpower, but the real basis for these problems lies in excessive stress. Self-regulation can dramatically improve a child's mood, attention, and concentration. It can help children to feel empathy,

and to cultivate the sorts of virtues that most parents know are vital for their child's long-term wellbeing. Self-regulation brings about profound and lasting transformation that continues throughout life. Dr. Shanker translates decades of his findings from working with children into practical, prescriptive advice for parents, giving them concrete ways to develop their self-regulation skills and teach their children to do the same and engage successfully with life for optimal learning, social, and emotional growth.
