Google Apps for Seniors Scott La Counte,2019-08-29 Remember when you used to pay for things?! When computer software was almost as much as your new computer. Times have certainly changed! Today many companies are giving you all that stuff you used to pay hundreds of dollars for—for free! What's the catch? There has to be a catch! Sometimes there definitely is a catch...it's free, but you have to watch a 30 second commercial every five minutes. Or it's free but you have to pay a subscription once you start to really like it. In the case of Google Apps, it truly is free. No annoying ads. No money grabs. Nothing. For the price of nothing you are getting online software that is on par with the Office suite you grew to love—and pay hundreds of dollars for. That means you get writing software, spreadsheet software, presentation software, and more...and you don't pay a dime! Now you see why so many people are making the switch to Google Apps? Who wouldn't want to pay nothing for good software? If you are interested in learning more about it, or you are ready to make the leap and become a free user, then this guide will show you the ropes and get you started as quickly as possible. Let's get started! This book is not endorsed by Alphabet, Inc.

Everything Google for Seniors Scott La Counte,2019-08-26 Google can do pretty much anything--email, word processing, and even hardware. This book will walk you through how to use the most popular Google programs and hardware. It includes Chromebook, Gmail, Google Docs, Google Sheets, and Google Slides.

Going Chromebook Brian Schell, 2020 In the first book, *Going Chromebook: Living in the Cloud*, we looked at Chromebooks and the various software options available for them, and we decided whether or not the cloud lifestyle was for you. If you've gotten this far, then the answer was a confident Yes! Now it's time to look into specific apps and how to use them. In this book, we look at Google's spreadsheet system, Google Sheets. Sheets competes directly with Microsoft Excel, and it is constantly being added to and improved month after month. If you need to do any calculations, record-keeping, list-making, outlining, or anything else where a spreadsheet grid is your tool of choice, then you need to at least consider Google Sheets. This book begins by introducing you to the differences between Google Sheets and the competing online office suites. We'll also look into Google's free and paid tiers for Google Apps/G Suite, and which one works out best for your needs. Next, there's a short review chapter on how to manipulate, delete, copy, and do various file operations within the Google Drive file manager. After that, we'll go through every single command and menu, every toolbar, and all the hidden options of Google Sheets. This is the bulk of the material, and no stone (or menu) is left unturned. This includes pivot tables, conditional formatting, data validation, Slicers, embedding Google Docs and Slides, and all the other special things Sheets can do for you. Lastly, for the things that Google Sheets still just can't do natively, we will look at some of the very best third-party add-ons for Sheets, allowing you to do all sorts of wild tasks. You already know the benefits of working in the cloud-- Now it's time to learn how to get the most out of it! Note: There is a section concerning keyboard commands which applies only to Chromebooks, but the majority of the content within the book applies to Windows, Mac, and most other computers as well. If you're considering switching to Sheets, but don't have a Chromebook, you'll still find plenty here to interest you.
