Google basic product is their engine used for searching and the generation of results that are relevant is of utmost attraction. The most fundamental thing is that Google involves their users in the search lists. Thus, the results are not only the works of Google but also those of their users. The acting and thinking system of Google Company provides a lot of distributed materials to the users offering ideas on businesses and even entrepreneurship. Majority of people prefer using Google instead of developing their own search sites. According to this report the marketing strategies that I will explain are the ones being applied by Google in their efforts to keep their visitors coming back and also getting new visitors. In the recent years Google and other internet companies have made a few strategic choices which have included the adoption of different marketing strategy and also advertising of its products. Through this report we also realize that the rise of Google is linked to adoption of certain perspectives over the other balanced scorecard perspectives due to the fact that it is through these perspectives that his company has been able to be adopted and grown in all the departments that is in the customer care department, internal operations department, human resource department and finance department. These measures are all about putting the people in the front or giving them priority. In doing these Google was able to make great strides in improving its profits through increase in revenue.
