Cambodia Robin Yong,2015-02-12 Robin Yong is a no-frills photographer who uses natural light to create stunning and captivating images. In his new photography collection, Cambodia: The Legends Live On, he takes readers on a dazzling journey of discovery with the people and lesser-known places in this beautiful land. Through his lens, you are invited to travel through the glistening lotus flower fields, where you will meet local children cooling off in the hot sun. Inspired by the mystical waterfalls of Phnom Kulen, the Khmer boxers, and the Cambodian Circus, where students have transformed their lives through performing art, Yong showcases the unique beauty and power of his subjects. Rather than focus on the ancient temples, the ubiquitous stars of most collections of Cambodian photography, Yong prefers to celebrate the quiet beauty of the country and its people, including the saffron-robed monks at Tonle Sap and the rice fields, or the traditional Apsara dancers. The result is a set of photographs that reflect the splendour of this country that many travelers do not usually see. Cambodia is a dynamic and developing country with a promising future. After seeing these images, those who have been lucky enough to visit Cambodia will be tempted to visit this beautiful country again.

The Future of Translation Technology Chan Sin-wai,2016-10-26 Technology has revolutionized the field of translation, bringing drastic changes to the way translation is studied and done. To an average user, technology is simply about clicking buttons and storing data. What we need to do is to look beyond a system's interface to see what is at work and what should be done to make it work more efficiently. This book is both macroscopic and microscopic in approach: macroscopic as it adopts a holistic orientation when outlining the development of translation technology in the last forty years, organizing concepts in a coherent and logical way with a theoretical framework, and predicting what is to come in the years ahead; microscopic as it examines in detail the five stages of technology-oriented translation procedure and the strengths and weaknesses of the free and paid systems available to users. The Future of Translation Technology studies, among other issues: The Development of Translation Technology Major Concepts in Computer-aided Translation Functions in Computer-aided Translation Systems A Theoretical Framework for Computer-Aided Translation Studies The Future of Translation Technology This book is an essential read for scholars and researchers of translational studies and computational linguistics, and a guide to system users and professionals.

Digital Review of Asia Pacific 2007/2008 Idrc,2008-01-07 The biennial Digital Review of Asia Pacific is a comprehensive guide to the state-of-practice and trends in information and communication technologies for development (ICT4D) in Asia Pacific This third edition (2007-2008) covers 31 countries and economies, including North Korea for the first time. Digital Review of Asia Pacific 2009-2010 Shahid Akhtar,2009-06-03 The biennial Digital Review of Asia Pacific is a comprehensive guide to the state-of-practice and trends in information and communication technologies for development (ICTD) in the Asia Pacific region.This fourth edition (2009-2010) features 30 economies and four sub-regional groupings. The chapters provide updated information on ICT infrastructure, industries, content and services, key programs, enabling policies and regulation, education and capacity building, open source, and research and development initiatives, as well as ICTD challenges in each of the economies covered. The common framework that underpins these reports allows readers to undertake a comparative analysis and assess progress across Asia Pacific.In addition, regional overviews provide a synthesis of ICTD trends, regulatory issues, and lessons for managing innovation in the network economy. The thematic chapters focus on issues in ICT in education, a key area in ICTD.The authors are drawn from government, academe, industry and civil society, providing a broad perspective on the use of ICTs for human development.

Human Language Technology Challenges for Computer Science and Linguistics Zygmunt Vetulani,Joseph Mariani,2014-07-25 This book constitutes the refereed proceedings of the 5th Language and Technology Conference: Challenges for Computer Science and Linguistics, LTC 2011, held in Poznan, Poland, in November 2011. The 44 revised and in many cases substantially extended papers presented in this volume were carefully reviewed and selected from 111 submissions. The focus of the papers is on the following topics: speech, parsing, computational semantics, text analysis, text annotation, language resources: general issues, language resources: ontologies and Wordnets and machine translation.

Routledge Encyclopedia of Translation Technology Sin-Wai Chan,2014-11-13 The Routledge Encyclopedia of Translation Technology provides a state-of-the art survey of the field of computer-assisted translation. It is the first definitive reference to provide a comprehensive overview of the general, regional and topical aspects of this increasingly significant area of study. The Encyclopedia is divided into three parts: Part One presents general issues in translation technology, such as its history and development, translator training and various aspects of machine translation, including a valuable case study of its teaching at a major university; Part Two discusses national and regional developments in translation technology, offering contributions covering the crucial territories of China, Canada, France, Hong Kong, Japan, South Africa, Taiwan, the Netherlands and Belgium, the United Kingdom and the United States Part Three evaluates specific matters in translation technology, with entries focused on subjects such as alignment, bitext, computational lexicography, corpus, editing, online translation, subtitling and technology and translation management systems. The Routledge Encyclopedia of Translation Technology draws on the expertise of over fifty contributors from around the world and an international panel of consultant editors to provide a selection of articles on the most pertinent topics in the discipline. All the articles are self-contained, extensively cross-referenced, and include useful and up-to-date references and information for further reading. It will be an invaluable reference work for anyone with a professional or academic interest in the subject.

The Implementation Game Carolyn Deere,2011-06-16 With the launch of the World Trade Organization (WTO) in 1995, its Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) emerged as a symbol of coercion in international economic relations. In the decade that followed, intellectual property became one of the most contentious topics of global policy debate. This book is the first full-length study of the politics surrounding what developing countries did to implement TRIPS and why. Based on a review of the evidence from 1995 to 2007, this book emphasises that developing countries exhibited considerable variation in their approach to TRIPS implementation. In particular, developing countries took varying degrees of advantage of the legal safeguards and options-commonly known as TRIPS 'flexibilities'-that the Agreement provides. To explain this variation, this book argues that TRIPS implementation must be understood as a complex political game played out among developing country governments and a range of stakeholders-developed countries, non-governmental organisations (NGOs), intergovernmental organisations (IGOs), and industry groups. The contested nature of the TRIPS bargain spurred competing efforts to revise the terms of TRIPS and to influence global IP regulation more broadly. The intensity of the implementation game was amplified by an awareness among the various stakeholders that the IP reforms developing countries pursued would influence these ongoing international negotiations. The book attributes the variation in TRIPS implementation to the interplay between these global IP debates, international power pressures, and political dynamics within developing countries. The book includes historical analysis, compilations of evidence, and analysis supported by examples from across the developing world. The Implementation Game will be of interest both to

scholars of international relations, law, and international political economy as well as to policymakers, commentators, and activists engaged in debates on the global governance of intellectual property.

The Executive Guide to Artificial Intelligence Andrew Burgess,2017-11-15 This book takes a pragmatic and hype-free approach to explaining artificial intelligence and how it can be utilised by businesses today. At the core of the book is a framework, developed by the author, which describes in non-technical language the eight core capabilities of Artificial Intelligence (AI). Each of these capabilities, ranging from image recognition, through natural language processing, to prediction, is explained using real-life examples and how they can be applied in a business environment. It will include interviews with executives who have successfully implemented AI as well as CEOs from AI vendors and consultancies. AI is one of the most talked about technologies in business today. It has the ability to deliver step-change benefits to organisations and enables forward-thinking CEOs to rethink their business models or create completely new businesses. But most of the real value of AI is hidden behind marketing hyperbole, confusing terminology, inflated expectations and dire warnings of ‘robot overlords’. Any business executive that wants to know how to exploit AI in their business today is left confused and frustrated. As an advisor in Artificial Intelligence, Andrew Burgess regularly comes face-to-face with business executives who are struggling to cut through the hype that surrounds AI. The knowledge and experience he has gained in advising them, as well as working as a strategic advisor to AI vendors and consultancies, has provided him with the skills to help business executives understand what AI is and how they can exploit its many benefits. Through the distilled knowledge included in this book business leaders will be able to take full advantage of this most disruptive of technologies and create substantial competitive advantage for their companies.

Media Ruins Margaret Jack,2023-05-16 How a generation of tech-savvy young Cambodians is restoring historical media artifacts from before the war—and, in the process, helping to repair the Khmer Rouge’s cultural destruction. During the Khmer Rouge regime (1975–1979), an estimated quarter to a third of the Cambodian population perished from execution, starvation, or disease. The regime especially targeted artists and intellectuals and their work, including films, photographs, and audio recordings. In Media Ruins, Margaret Jack charts the critical role of media in the historical political landscape of Cambodia as well as in its post-conflict reconstruction and reconciliation. Along the way, Jack tells the remarkable stories of resourceful Cambodians in the decades that followed the end of the regime—those who worked to reconstruct their country’s media infrastructure and restore their damaged cultural heritage. Jack describes the crucial role that media has played in helping the nation grapple with the traumas of its past and imagine brighter futures. She explores how tech-savvy Cambodian media creators have engaged in practices of infrastructural restitution—work that is both emotionally cathartic and politically vital. She also examines the ways these media creators have used digital tools to restore and disseminate lost media artifacts, while embracing an aesthetic of material decay as a visible reminder of loss. As these creators reconcile with the past, they are also finding ways to navigate the country’s increasingly authoritarian media landscape. Bringing media and technology studies into conversation with trauma and memory studies, the book provides a unique, and necessary, perspective on post-conflict reconstruction.
