The Bonfire Moment Martin Gonzalez, Joshua Yellin, 2024-05-14
Unique insights from pioneers of Google's Startup Accelerator on why building teams is harder than building tech—and a proven way to develop a strong, resilient and effective team. Most startups fail not because of a bad product, poor timing, or mismanaged cash, but because of people problems: conflicts over strategy, decision-making, and team culture. Even the smartest entrepreneurs have been derailed by these soft problems: How do you fire a loyal friend who's not up to par? How do you motivate your team to give their all? What happens when egos and emotions overpower facts and reason? The soft stuff can be shockingly hard. Martin Gonzalez and Josh Yellin outline the common traps startup teams fall into, and share their powerful one-day workshop that helps teams escape those traps. The unique process of The Bonfire Moment brings colleagues together for a full day of facing hard truths, noticing hidden dynamics, and gearing up for the intense challenges of startup life. When the constant hustle feels overwhelming, a team's Bonfire Moment pulls them out of the day-to-day intensity to reflect and reboot. The Bonfire Moment has proven effective with hundreds of teams of all sizes around the world—from the smallest startups to large organizations—significantly improving their cohesion, focus and effectiveness. Now this book will teach leaders the principles behind The Bonfire Moment and how to run the workshop on their own. It's ideal for anyone who needs to build an extraordinary team to achieve big goals.

Accelerate This! Ryan Kushner, 2018-07-05 Soooo, what is an accelerator?! And should you do one to grow your business? What's an accelerator versus an incubator? How do you find a good one, get in, and make the most of it? If you're running a program, how can you do that more effectively? Accelerate This! will cut through all the confusion so you can: - Decide if you want to join a program - Learn how to grow your idea into a business - Create a program (or run yours better!) Accelerate This! covers the whole shebang, tip to tail, inside out, and outside in. We've collected quotes, insights and best practices from the world's best

programs (Y Combinator, 500 Startups, Techstars, Cleantech Open, Google/Alphabet X, The Buckminster Fuller Institute, XPrize, Elemental Excelsator, Free Electrons and a TON more), most interesting entrepreneurs (Justin Rosenstein, Casey Fenton, and more), gathered some of the most useful tools (Lean Startup, Four Steps To The Epiphany, and so on) and put it all together a super NOT boring format for you to learn, work smarter and create change. The book is written by Ryan Kushner (The Accelerator Guru), and is full of anecdotes and perspectives from his experience working around the world, in various industries, and with hundreds of startups, corporate clients and accelerators, prizes and incubators. Supported by New Energy Nexus (the global association of clean energy incubators and accelerators), The World Bank, Asian Development Bank and the World Wildlife Fund, the book takes a deep dive into clean energy/cleantech entrepreneurship as a test case for what accelerators can (and can't) do. Bonus! This is a carbon neutral/impact free book! We worked with CQuest Capital (www.cquestcapital.com), calculated the impact of each book, then offset that impact through their program installing improved cookstoves with families in rural Zambia, which reduces deforestation and indoor air pollution (which mainly effects women and children). Carbon offsets are the new hot hotness... get on it! Did we mention it's not boring? Buy, enjoy, share, turn into paper airplanes and throw at your friends. Just get busy doing, creating and making positive change in the world. We need it -and we hope Accelerate This! gives you the kick in the pants you need. Waaaabam! :)

The Great Accelerator Paul Virilio, 2012-06-11 On 10 September 2008, amid much fanfare, the Great Collider run by CERN in Geneva was turned on. The Collider was supposed to fire protons around a seventeen-mile loop of tunnels, causing them to crash into one another at close to the speed of light and break into even tinier particles. Nine days later the Collider broke down and had to be switched off, the accelerator temporarily silenced, the reckless search for 'God's particle' put on hold. At the same time the speeded-up markets of global finance, with screens of multi-coloured numbers designating the rapid flows of capital, are suddenly thrown into confusion when news spreads that the great Titan of Wall Street, Lehman Brothers, has filed for bankruptcy. Investors panic, share prices plunge and the accelerated markets

of global finance seize up. In his latest book, Paul Virilio - the leading theorist of our obsession with technology, speed and power - rewrites 'The Book of Exodus', but the exodus he talks about is no longer conducted in a single file of people headed for some possible Promised Land. It is a closed-circuit exodus within a cramped world, where reduction in human stocks will suddenly look like the only solution to the lockdown of history.

Challenges and Goals for Accelerators in the XXI Century Oliver Brüning, Stephen Myers, 2015 The past 100 years of accelerator-based research have led the field from first insights into the structure of atoms to the development and confirmation of the Standard Model of physics. Accelerators have been a key tool in developing our understanding of the elementary particles and

the forces that govern their interactions. This book describes the past 100 years of accelerator development with a special focus on the technological advancements in the field, the connection of the various accelerator projects to key developments and discoveries in the Standard Model, how accelerator technologies open the door to other applications in medicine and industry, and finally presents an outlook of future accelerator projects for the coming decades.--Provided by publisher.

Big Data for Big Pharma Malena Johannes, 2016-06-16 Raising costs, ever-increasing regulatory hurdles, and mounting difficulties in finding the next blockbuster drug are just a few of the

challenges Big Pharma currently has to face for its research and development process, the heart of its risky business. Big Data claims to be full of insights that Big Pharma need to find a way of harvesting, which could lead to new compounds. Academics, Big Data start-ups, and pharmaceutical companies have focused their research efforts on analytic tools and data technologies to store, collect, analyse, and extract these insights from massive data sets. However, the key question is whether the Big Data hype really does have the claimed accelerating effect on the complex research and development process or if it actually creates another hurdle for Big Pharma innovation. Malena Johannes' timely book sheds light on this question by examining the top 5 pharmaceutical companies and provides an overview on the status quo of Big Data applications within the pharmaceutical industry.

Fermilab Lillian Hoddesson, Adrienne W. Kolb, Catherine Westfall, 2009-08-01 Fermi National Accelerator Laboratory, located in the western suburbs of Chicago, has stood at the frontier of high-energy physics for forty years. Fermilab is the first history of this laboratory and of its powerful accelerators told from the point of view of the people who built and used them for scientific discovery. Focusing on the first two decades of research at Fermilab, during the tenure of the laboratory's charismatic first two directors, Robert R. Wilson and Leon M. Lederman, the book traces the rise of what they call "megascience," the collaborative struggle to conduct large-scale international experiments in a climate of limited federal funding. In the midst of this new climate, Fermilab illuminates the growth of the modern research laboratory during the Cold War and captures the drama of human exploration at the cutting edge of science.
