Find cell phones' area online by cell tower triangulation utilizing LAC (Location Area Code) and Celled from PC, iphone or Androide phone. Cell tower triangulation utilizes the LAC and Cellid to

focus the position of a cellular smartphone. With information from no less than three cell towers, this strategy can ascertain a handset's area exactly. Each one base station covers a certain region, the more cell towers in your general vicinity, the more precise result it delivers. So the thickness of cell towers decides the precision. For the most part, the thickness is higher in the urban zones particularly at downtown. While in country territories, where there are less cell towers, the result is less precise. Chasing the Light Joel Zarley, 2010-07-27 It is a mystery that has existed since the dawn of time. The remnants of primordial light; compressed into a

solitary gem and expelled with man from paradise as punishment for the original sin. It has been possessed by some of the greatest men throughout history, all of whom have reveled in its power. But, that is only part of its story. The past five years have been rough for Gabriel Patrick; recently fired from his academic position at the university, and still reeling at being dumped by the true love of his life. And, dumped not just for any other man, but Gabe's personal and professional mentor--the renowned art historian, Dr. Rudolph Zeffner. But now, Rudy has been murdered and his ex Kevin has shown up unexpectedly, bringing with him a story too outlandish to believe. But, what seems so impossible at first, reveals itself through a series of clues left by Rudy that Gabe and Kevin must now follow. Soon they are consumed by a Transatlantic quest for one of mankind's greatest treasures. But, other factions are also seeking this incredible object, and have already proven that they will kill to possess it. Can Gabe and Kevin find the relic and fulfill the final wishes of the man they both loved, or will they fall to his same fate?

The Right to Privacy in the Light of Media Convergence – Dieter Dörr, Russell L. Weaver, 2012-05-29 The rapid change of the culture of communication constantly poses new threats for the right to privacy. These do not only emanate from States, but also from private actors. The global network of digital information has turned the protection of privacy since a long time into an international challenge. In this arena, national legal

systems and their underlying common values collide. This collection convenes contributions from European, Australian and US experts. They take on the challenge of providing an intercontinental analysis of the issue and answer the question how the right to privacy could be defended in future.

Facebook Nation Newton Lee, 2012-09-15 President Barack Obama, in his 2011 State of the Union Address, called America the nation of Edison and the Wright brothers and of Google and Facebook. U.S. Chief Information Officer, Steven VanRoekel, said that America has become a Facebook nation that demands increased transparency and interactivity from the federal government. Facebook as a nation in 2012 would be the third largest country in the world with over 900 million citizens, after China and India. This book portrays the social media ecosystem as a world of increasing Total Information Awareness, which is essentially a civilian version of the controversial Total Information Awareness program unveiled in 2002 by the Defense Advanced Research Projects Agency (DARPA) at the U.S. Department of Defense. Back in the 60's, DARPA initiated and funded the research and development of Advanced Research Projects Agency Network (ARPANET) that went online in 1969. The success of ARPANET gave rise to the global commercial Internet in the 90's and the new generation of Fortune 500 companies today including Amazon.com, Google, eBay, and Yahoo!. As if life comes full circle in the 21st century, private businesses and the ubiquity of social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies and

infrastructures necessary for the DARPA-proposed Total Information Awareness program. WikiLeaks founder Julian Assange called Facebook the most appalling spying machine that has ever been invented. Indeed, military and civilian technologies have interwoven into every fabric of our society, as Facebook co-founder and CEO Mark Zuckerberg said, We exist at the intersection of technology and social issues. This book offers discourse and practical advice on the privacy issue in the age of big data, the rise of Facebook nation, and Total Information Awareness. Opening with President Ronald Reagan's 1984 National Security Decision Directive and ending with George Orwell's novel 1984, the author takes us on a roller-coaster ride through Facebook's botched IPO, Carrier IQ, Kony 2012, SOPA/PIPA blackout, cyber bullying, crime fighting, and a host of other timely issues facing our Facebook nation. Social media strategists, information architects, social scientists, policymakers, and academic scholars in the Program in Science, Technology, and Society (STS) will find this book a valuable asset.

Privacy-Invasive Technologies and Privacy by Design Demetrius

Klitou, 2014-07-05 Privacy-invasive technologies (PITs) such as Body scanners; Public space CCTV microphones; Public space CCTV loudspeakers and Human-implantable microchips (RFID implants/GPS implants) are dealt with in this book. The book shows how and why laws that regulate the design and development of privacy-invasive technologies (PITs) may more effectively ensure the protection of privacy than laws that only regulate data controllers and the use of such technologies. The premise is supported and demonstrated through a discussion on these four specific PITs as case studies. In doing so, the book overall attempts to explain how laws/regulations that mandate the implementation of Privacy by Design (PBD) could potentially serve as a viable approach for collectively safeguarding privacy, liberty and security in the 21st Century. This book will be of interest to academic researchers, law practitioners, policy makers and technology researchers.
