*Handbook of Mobile Data Privacy* Aris Gkoulalas-Divanis, Claudio Bettini, 2018-10-26 This handbook covers the fundamental principles and theory, and the state-of-the-art research, systems and applications, in the area of mobility data privacy. It is primarily addressed to computer science and statistics researchers and educators, who are interested in topics related to mobility privacy. This handbook will also be valuable to industry developers, as it explains the state-of-the-art algorithms for offering privacy. By discussing a wide range of privacy techniques, providing in-depth coverage of the most important ones, and highlighting promising avenues for future research, this handbook also aims at attracting computer science and statistics students to this interesting field of research. The advances in mobile devices and positioning technologies, together with the progress in spatiotemporal database research, have made possible the tracking of mobile devices (and their human companions) at very high accuracy, while supporting the efficient storage of mobility data in data warehouses, which this handbook illustrates. This has provided the means to collect, store and process mobility data of an unprecedented quantity, quality and timeliness. As ubiquitous computing pervades our society, user mobility data represents a very useful but also extremely sensitive source

of information. On one hand, the movement traces that are left behind by the mobile devices of the users can be very useful in a wide spectrum of applications such as urban planning, traffic engineering, and environmental pollution management. On the other hand, the disclosure of mobility data to third parties may severely jeopardize the privacy of the users whose movement is recorded, leading to abuse scenarios such as user tailing and profiling. A significant amount of research work has been conducted in the last 15 years in the area of mobility data privacy and important research directions, such as privacy-preserving mobility data management, privacy in location sensing technologies and location-based services, privacy in vehicular communication networks, privacy in location-based social networks, privacy in participatory sensing systems which this handbook addresses.. This handbook also identifies important privacy gaps in the use of mobility data and has resulted to the adoption of international laws for location privacy protection (e.g., in EU, US, Canada, Australia, New Zealand, Japan, Singapore), as well as to a large number of interesting technologies for privacy-protecting mobility data, some of which have been made available through open-source systems and featured in real-world applications.

**Transcendent Parenting** Sun Lim, Sun Sun Lim, 2019-12-03 Whether members of the family are

headed to school or work, smartphones accompany family members throughout the day. The growing sophistication of mobile communication has unleashed a proliferation of apps, channels, and platforms that link parents to their children and the key institutions in their lives. While parents may feel empowered by their ability to provide their children assistance with a click on their smartphone, they may also feel pressured and overwhelmed by this need to always be on call for their children. This book focuses on the phenomenon of transcendent parenting, where parents actively use technology to go beyond traditional, physical practices of parenting. In drawing on the experiences of intensely digitally-connected families in Singapore to tell a global story, Sun Sun Lim argues how transcendent parenting can embody and convey, intentionally or not, the parenting priorities in these households. Chapters outline how parents exploit mobile connectivity to transcend the physical distance between themselves and their children, the online and offline social interaction environments, and the timelessness of seemingly ceaseless parenting. Transcendent Parenting further explores how mobile communication allows parents to be more involved than ever in their children's lives, leaving readers to question whether or not parents have become too involved as a result. With its clear discussions of the effects of transcendent parenting on parents' wellbeing and children's personal development, Transcendent Parenting will appeal to a broad audience of readers, from scholars, educators and policy makers to parents and young people across the globe.

**Big Brother** Mark Dice, 2011-01 In *Big Brother: The Orwellian Nightmare Come True*, Mark Dice details actual NSA high-tech spy systems, mind-reading machines, secret government projects, and emerging artificial intelligence programs that seem as if they came right out of George Orwell's novel *Nineteen Eighty-Four*. Orwell's famous book was first published in 1949, and tells the story of a nightmarish future where citizens have lost all privacy and are continuously monitored by the

omniscient Big Brother surveillance system which keeps them obedient to a totalitarian government. The novel is eerily prophetic as many of the fictional systems of surveillance described have now become a reality. Mark Dice shows you the scary documentation that Big Brother is watching you, and is more powerful than you could imagine. - The National Security Agency - Facial Recognition Scanners - Mind Reading Machines - Neural Interfaces - Psychotronic Weapons - Orwellian Government Programs - The Nanny State - Orwellian Weapons - Artificial Intelligence - Cybernetic Organisms - A Closer Look at 1984 - Our Social Structure - The Control of Information - Perpetual State of War - The Personification of the Party - Telescreens - A Snitch Culture - Relationships in Shambles - A Heartless Society - Foreign Countries Painted as Enemies - Power Hungry Officials - An Erosion of the Language - Double Think - And More! Celestial Navigation in the GPS Age John Karl, 2007 Many books on celestial navigation take shortcuts in explaining concepts; incorrect diagrams and discussion are often used for the sake of moving the student along quickly. This book tells the true story-and the whole story. It conveys celestial navigation concepts clearly and in the shortest possible time. It's tailored for navigation in the GPS age-a time of computers, calculators, and web resources. Although it covers all of the traditional methods of 'working a sight, ' the primary thrust is using the (under \$10) scientific calculator. By using equations that you key into your calculator, this book guides you toward a better understanding of the concepts of celestial navigation. You will learn novel ways to plot lines of position, ways to check your sextant accurately by star sights, and how to tell what time it is from a moon sight. The many appendices are a treasure of references and explanations of abstract ideas. Celestial Navigation is a crucial skill for the offshore navigator to know, this book provides the shortest path to that knowledge.

*Untangled* Lisa Damour, Ph.D., 2016-02-09 NEW YORK TIMES BESTSELLER • An award-winning

guide to the sometimes erratic and confusing behavior of teenage girls that explains what's going on, prepares parents for what's to come, and lets them know when it's time to worry. Look for *Under Pressure*, the companion guide to coping with stress and anxiety among girls, available now. In this sane, highly engaging, and informed guide for parents of daughters, Dr. Damour draws on decades of experience and the latest research to reveal the seven distinct—and absolutely normal—developmental transitions that turn girls into grown-ups, including *Parting with Childhood*, *Contending with Adult Authority*, *Entering the Romantic World*, and *Caring for Herself*. Providing realistic scenarios and welcome advice on how to engage daughters in smart, constructive ways, *Untangled* gives parents a broad framework for understanding their daughters while addressing their most common questions, including • My thirteen-year-old rolls her eyes when I try to talk to her, and only does it more when I get angry with her about it. How should I respond? • Do I tell my teen daughter that I'm checking her phone? • My daughter suffers from test anxiety. What can I do to help her? • Where's the line between healthy eating and having an eating disorder? • My teenage daughter wants to know why I'm against pot when it's legal in some states. What should I say? • My daughter's friend is cutting herself. Do I call the girl's mother to let her know? Perhaps most important, *Untangled* helps mothers and fathers understand, connect, and grow with their daughters. When parents know what makes their daughter tick, they can embrace and enjoy the challenge of raising a healthy, happy young woman. BOOKS FOR A BETTER LIFE AWARD WINNER “Finally, there's some good news for puzzled parents of adolescent girls, and psychologist Lisa Damour is the bearer of that happy news. [*Untangled*] is the most down-to-earth, readable parenting book I've come across in a long time.”—The Washington Post “Anna Freud wrote in 1958, ‘There are few situations in life which are more difficult to cope with than an adolescent son or daughter during the attempt to

liberate themselves.’ In the intervening decades, the transition doesn’t appear to have gotten any easier which makes *Untangled* such a welcome new resource.”—The Boston Globe

*Intelligent Systems and Applications* Yaxin Bi,Rahul Bhatia,Supriya Kapoor,2019-08-23 The book presents a remarkable collection of chapters covering a wide range of topics in the areas of intelligent systems and artificial intelligence, and their real-world applications. It gathers the proceedings of the Intelligent Systems Conference 2019, which attracted a total of 546 submissions from pioneering researchers, scientists, industrial engineers, and students from all around the world. As intelligent systems continue to replace and sometimes outperform human intelligence in decision-making processes, they have made it possible to tackle a host of problems more effectively. This branching out of computational intelligence in several directions and use of intelligent systems in everyday applications have created the need for an international conference as a venue for reporting on the latest innovations and trends. This book collects both theory and application based chapters on virtually all aspects of artificial intelligence; presenting state-of-the-art intelligent methods and techniques for solving real-world problems, along with a vision for future research, it represents a unique and valuable asset.

Under Pressure Lisa Damour, Ph.D.,2020-02-11 NEW YORK TIMES BESTSELLER • An urgently needed guide to the alarming increase in anxiety and stress experienced by girls from elementary

school through college, from the author of *Untangled* “An invaluable read for anyone who has girls, works with girls, or cares about girls—for everyone!”—Claire Shipman, author of *The Confidence Code* and *The Confidence Code for Girls* Though anxiety has risen among young people overall, studies confirm that it has skyrocketed in girls. Research finds that the number of girls who said that they often felt nervous, worried, or fearful jumped 55 percent from 2009 to 2014, while the comparable number for adolescent boys has remained unchanged. As a clinical psychologist who specializes in working with girls, Lisa Damour, Ph.D., has witnessed this rising tide of stress and anxiety in her own research, in private practice, and in the all-girls’ school where she consults. She knew this had to be the topic of her new book. In the engaging, anecdotal style and reassuring tone that won over thousands of readers of her first book, *Untangled*, Damour starts by addressing the facts about psychological pressure. She explains the surprising and underappreciated value of stress and anxiety: that stress can helpfully stretch us beyond our comfort zones, and anxiety can play a key role in keeping girls safe. When we emphasize the benefits of stress and anxiety, we can help our daughters take them in stride. But no parents want their daughter to suffer from emotional overload, so Damour then turns to the many facets of girls’ lives where tension takes hold: their interactions at home, pressures at school, social anxiety among other girls and among boys, and their lives online. As readers move through the layers of girls’ lives, they’ll learn about the critical steps that adults can take to shield their daughters from the toxic pressures to which our culture—including we, as parents—subjects girls. Readers who know Damour from *Untangled* or the *New York Times*, or from her regular appearances on CBS News, will be drawn to this important new contribution to understanding and supporting today’s girls. Praise for *Under Pressure* “Truly a must-read for parents, teachers, coaches, and mentors wanting to help girls along the path to adulthood.”—Julie Lythcott-

*God, Family, Country* Craig Morgan,Jim DeFelice,2022-09-27 Country music icon, army veteran, father, outdoorsman—Craig Morgan shares all aspects of his life, revealing stories even his most avid fans don't know. Written with Jim DeFelice, author of the #1 New York Times bestseller *American Sniper* In 1989, as US news outlets declared an end to Operation Just Cause, Craig Morgan was part of an elite group of military operatives jumping into the jungle along the Panamanian border on a covert operation. Fans know the country music star from his hit songs and acclaimed albums, but there's a lot more to him—a soldier who worked with the CIA in Panama, an undercover agent who fought sex traffickers in Thailand, and a dedicated family man who lives the values he sings. Craig details these

many facets of his life and more in God, Family, Country. An on-stage appearance with his father's band at age ten may have planted the seeds for life as a country star, but first he trained as a paratrooper in the army. After earning numerous distinctions, his path to sergeant major was all but assured. Then came a momentous decision: he left the active military to pursue music. With unwavering support from his wife and a pack of part-time jobs, he toughed out the lean years and achieved his first big success with the poignant ballad "Almost Home." Other hits soon followed, from party songs like "Redneck Yacht Club" to the soul-rending "The Father, My Son, and the Holy Ghost." Born from the anguish of his son Jerry's passing, the song's tribute has consoled and inspired millions across the world. Duty to country has been a constant throughout his life and globe-spanning career. In 2006, as "That's What I Love about Sunday" topped country radio charts, Craig was riding in a convoy of Humvees in Iraq. An avid outdoorsman, a former sheriff's deputy who's still a member of the auxiliary, and always a husband and father first, Craig Morgan will inspire you with his life lived by the deepest values: God, family, country.
