The Noon Fix James N. Wilson,2009-03-01 The Lord is my shepherd, I shall not want. - Psalm 23 To Stanley Parkman, these humble words represent much more than the very first he placed into every new linotype machine purchased during his newspaper career. To Stanley Parkman they represent an unwavering faith and commitment to God, family and community. This is not a story about how a newspaper was born but rather of a man born out of adversity. With faith as his beacon, Stanley walked through both personal tragedies and business failures to create one of Georgia's most successful newspapers, the Times-Georgian in Carrollton, Georgia. Stanley Parkman: In His Own Words is a very personal journey of over nine decades of living with adversity - and trusting in his faith to lead him though it all.

Real-World Wireless Sensor Networks Koen Langendoen,Wen Hu,Federico Ferrari,Marco Zimmerling,Luca Mottola,2013-12-19 This edited book presents

the results of the 5th Workshop on Real-world Wireless Sensor Networks (REALWSN). The purpose of this workshop was to bring together researchers and practitioners working in the area of sensor networks, with focus on real-world experiments or deployments of wireless sensor networks. Included were, nonetheless, emerging forms of sensing such as those that leverage smart phones, Internet of Things, RFIDs, and robots. Indeed, when working with real-world experiments or deployments, many new or unforeseen issues may arise: the network environment may be composed of a variety of different technologies, leading to very heterogeneous network structures; software development for large scale networks poses new types of problems; the performance of prototype networks may differ significantly from the deployed system; whereas actual sensor network deployments may need a complex combination of autonomous and manual configuration. Furthermore, results obtained through simulation are typically not directly applicable to operational networks; it is therefore imperative for the community to produce results from experimental research. The workshop collected the state of the art in emerging and current research trends dealing with Real-world Wireless Sensor Networks, with the aim of representing a stepping stone for future research in this field.
