*The GPS Paradigm* Nitin Potdar, 2021-04-07 "In this era of the fourth industrial revolution, a monumental disruption led by the fusion of physical, digital and biological domains is pushing organisations towards a new normal of inorganic growth. Nitin unfolds a refreshing and practical framework for steering corporate mergers, acquisitions and joint ventures going forward. The business challenges are lucidly explained, and the strategies to avoid failures are well articulated. A 'must read' for everyone in business and profession" - PR Ramesh, Former Chairman, Deloitte India "The GPS Paradigm is a robust, practical, dependable, and immensely energising master algorithm for achieving measurable and sustainable business success in a post-COVID world thriving on disruptive innovation" - Shailesh Haribhakti. Chartered Accountant "Like Richard Bach's 'Jonathan Livingston Seagull', Nitin deeply believes in the dictum "Look with your understanding, find out what you already know, and you'll see the way to fly" Dive deep into the treasures of this book and soar high!" - Emanuele Sacerdote, Founder, SOULSIDE "For the young turks of the business world, a deep study of the GPS Paradigm is an absolute must if they wish to further their unicorn aspirations in an environment of perpetual uncertainty." - Vishwas Mahajan, Entrepreneur and Ex-Global Trustee TIE.org "A novel way of assessing possible acquisition targets. Out of box thinking tops the traditional metrics. Rare insights from an insider" - Daksesh Parikh, Executive Editor, Business India "Nitin Potdar's GPS Paradigm is a seminal contribution to the futurist and experimentalist literature in law and finance. It is a definitive solution framework for steering successful M&As and JVs in a world of perpetual disruption, whether triggered by constant technological breakthroughs or transient biological invasions like the Covid-19 pandemic". - Robert B. Ahdieh, Dean, Texas A&M University School of Law

**Asian Space Race: Rhetoric or Reality?** Ajey Lele, 2012-10-20 This book explores the character and contours of the Asian Space Powers. At present, Asian states like China, Japan and India are found investing in space technologies with analogous social and scientific and probably with divergent military intents. Other Asian states like Israel, South Korea and Malaysia are also making investments in the space arena. States like Iran and North Korea are faulted for using space launches as a demonstrative tool to achieve strategic objectives. This work examines this entire maze of activities to unearth where these states are making these investments to accomplish their state-specific goal or are they also trying to surpass each other by engaging in competition. Explaining why and how these states are making investments towards achieving their socio-economic and strategic mandate this book infers that the possibility of Asian Space Race exists but is presently fairly diminutive.

**All About Road Maps and GPS** Barbara M. Linde, 2018-12-15 What highways go from Maine to Florida? What's the distance from Los Angeles to San Francisco? How do I get to my friend's house? How does GPS work? As readers enjoy this volume, they will find answers to these questions and more. Readers learn to use the map key to identify different types of roads. They'll plan routes for long and short trips, calculating distances with the scale of miles. After studying diagrams of the GPS, they will give a basic explanation of how it works.

**The Indian Space Programme** Gurbir Singh, 2017-10-17 Fifty years in the making, India's Space Programme is fulfilling the vision of its founders and delivering services from space that touch the lives of 1.3 billion people every day. In addition to operating a collection of satellites for weather, Earth observation, navigation and communication today, India has a spacecraft orbiting Mars and a space telescope in Earth orbit. This book provides the big picture of India's long association with science, from historical figures like Aryabhata and Bhaskara to Homi Bhabha and Vikram Sarabhai, the key architects of its space program. It covers the scientific contribution of Indian scientists during the European Enlightenment and industrial revolution. It traces the technological development of Tipu Sultan's use of rockets for war in the 1780s; the all-but-forgotten contribution of Stephen H Smith's use of rockets as a means of transport in 1935 in northern India; and the emergence of Sriharikota – India's spaceport, the heart of India's modern Space Programme.

- A detailed account of how a fishing village in Kerala was transformed into a space centre and used to launch India's first rocket into space on 21 November 1963.
- A detailed summary of India's space infrastructure – launch vehicles, deep space network, Telemetry, Tracking and Command and space assets in orbit.
- Description of how the ordinary people of India benefit from the services delivered by the space programme
- Why India chose to go to the Moon and Mars and how it got there.
- The prospects for India's ambitions in space for human spaceflight, national security and scientific exploration
- An analysis of how India's Space Programme may play out on the global stage. Will it compete or collaborate with China, USA and Russia in space? This detailed work, in 645 pages, 29 tables and 9 appendices, is richly illustrated with 140+ illustrations (some images published for the first time) and supported by over 1,000 references. It is written for the non-specialist, offering a big-picture view.

The contents of the volume include characterization of conventional and innovative pavement materials, operational effects of road geometry, user impact of multimodal transport projects, spatial analysis of travel patterns, socio-economic impacts of transport projects, analysis of transportation policy and planning for safety and security, technology enabled models of mobility services, etc. This book will be beneficial to researchers, educators, practitioners and policy makers alike.

**India China Space Capabilities** Sanjay Kumar, 2018-01-01 Space capabilities are becoming absolutely essential for national development, economic well-being, commerce, and daily life, besides becoming a crucial component of successful military operations. Space has emerged as an essential component in furthering a nation's Comprehensive National Power. China's progress in space technologies, whether in relative or absolute terms, has larger implications for India. As China's space program increases in capability, it can be expected to wield this power to increase regional dominance and deter countries from pursuing policies that are contrary to Chinese interests. Space the ultimate "High Ground" will play crucial role in all future conflicts. Space force enhancement operations multiply joint effectiveness by increasing the combat potential, operational awareness, and providing needed joint force support. This book brings out the key features of China's Space Program, its future trajectory and how it can impact India's national interest. It further suggests options for India in the given circumstance and how India can secure its geo-political, economic interest and security concerns without getting into space race with China.

**Business Innovation and ICT Strategies** Sriram Birudavolu, Biswajit Nag, 2018-11-13 This book investigates the real process of unleashing the power of Information and Communications Technology (ICT) through Open Innovation and strategic choices. It covers the most important aspects of ICT in a nutshell and details the road to the future through business innovation. ICT, of which telecom and IT constitute the core, is currently permeating and transforming every sphere of life, ranging from commerce, manufacturing, education and healthcare, to agriculture, banking, governance, media and entertainment. Today, telecommunication and ICT, in general, are essential to a country's economic development and competitiveness as recognized both by the World Bank and the Asian Development Bank. Due to the powerful, disruptive and rapid forces unleashed by ICT tsunami, organisations not only struggle to harness the potential of ICT but can also be overwhelmed by the changes, complexity, competition and regulatory environment it brings up. This book provides a clue to organisations on how to sustain and succeed by leveraging ICT in absence of extensive in-house expertise across the breadth and depth of these areas. The driving theme of the book is about opening up organizational and business models, by presenting an integrated roadmap to a future with ICT, by co-opting, cooperating and competing with other organisations. Constructing the right strategy and building the necessary social capital for open innovation through collaboration with partners, government, academia and users (Quadruple Helix Model) are essential steps in such a process.
