Italian Science Fiction Simone Brioni,Daniele Comberiati,2019-07-18 This book explores Italian science fiction from 1861, the year of Italy's unification, to the present day, focusing on how this genre helped shape notions of Otherness and Normalness. In particular, Italian Science Fiction draws upon critical race studies, postcolonial theory, and feminist studies to explore how migration, colonialism, multiculturalism, and racism have been represented in genre film and literature. Topics include the role of science fiction in constructing a national identity; the representation and self-representation of "alien" immigrants in Italy; the creation of internal "Others," such as southerners and Roma; the intersections of gender and race discrimination; and Italian science fiction's transnational dialogue with foreign science fiction. This book reveals that though it is arguably a minor genre in Italy, science fiction offers an innovative interpretive angle for rethinking Italian history and imagining future change in Italian society.

Health Care Systems in Europe and Asia Christian Aspalter, Yasuo Uchida, Robin Gauld, 2012-06-25 This book addresses the global need for more comparative studies on health policy and health care systems, given the rise in recent decades of societal aging, modern mass diseases, economic globalization, and resulting permanent fiscal austerity of governments which have fundamentally altered the status quo of health care systems. The book examines the healthcare experiences of the most developed countries in Asia (Japan, South Korea, Taiwan and Singapore) and compares these with four of the most important health care systems in Europe (UK, France, Germany and Italy). Focusing on the public health care systems the contributors discuss the rising need for reforms in health care and health insurance administration, delivery systems, financing and overall health care policy strategies, particularly in fast-aging societies in Asia, and highly aged societies in Europe. This book will appeal to students and scholars of health care policy, health and social administration, social policy, public policy and social work.
