Klaus Vogel on Double Taxation Conventions Ekkehart Reimert, Alexander Rust, 2022-01-18 Klaus Vogel on Double Taxation Conventions is regarded as the international gold standard on the law of tax treaties. This article-by-article commentary has been completely revised and updated to give you a full and current account of double tax conventions (DTCs). DTCs form the backbone of international taxation, but they raise many interpretational questions. This market leading work will provide you with the answers. Based on the OECD/G20 Multilateral Instrument, the OECD MC and Commentary published in 2017 and the most recent amendments to the UN MC, the book also includes relevant case law and scholarly literature upto and including 2020. Previous editions of the Vogel have been routinely relied on by courts around the world including Australia, Canada, Germany, India, South Africa, the Netherlands and United Kingdom. What's new in this edition? There have been many important developments in this area since the last edition in 2015. The authors discuss these developments and the effect they will have upon practitioners working in this area. They also provide a wealth of new and revised case law, along with the DTCs of emerging countries. You'll find: Reports about major features in the DTC practice of many leading jurisdictions, such as: the DTC practice of Austria, Canada, France, Germany, India, the Netherlands, Switzerland, the UK and the US Sections on divergent country practice covering their national models and networks of bilateral DTCs Thorough analysis of the OECD and UN model, as well as the implementation of these models in practice Amendments of bilateral DTCs, textual or in substance, on the basis of the 2017 Anti-BEPS Multilateral Instrument Coverage of a full range of the latest tax treaties around the world, including important treaties between OECD and BRICS countries This new Fifth Edition of Klaus Vogel on Double Taxation Conventions continues to reflect the unchallenged role of the OECD. The OECD MC, accompanied by the official Commentary, guidelines, reports and other recommendations, has sustained its position as the most important legal instrument in the area of DTCs. On occasion, the UN MC and Commentary diverge from the OECD texts. When this happens, the authors deal with the specifics of the UN MC in separate annotations and analyses, explaining and making sure you understand the differences. How this will help you: All the information you need to confidently advise on issues such as the taxation of income, taxation of capital and the elimination of double taxation Know that your advice to clients is based on the most up-to-date and respected information available, from an outstanding team of editors and authors The editors, Professors Ekkehart Reimer and Alexander Rust, have worked with the late Professor Vogel as well as an international team of top experts to completely update and enhance the content. The writing team comprises: Editors: Prof. Dr Ekkehart Reimer, Heidelberg University and Prof. Dr Alexander Rust, WU Vienna. Infectious Disease Surveillance Nkuchia M. M'ikanatha, Ruth Lynfield, Chris A. Van Beneden, Henriette de Valk, 2013-03-11 This fully updated edition of Infectious Disease Surveillance is for frontline public health practitioners, epidemiologists, and clinical microbiologists who are engaged in communicable disease control. It is also a foundational text for trainees in public health, applied epidemiology, postgraduate medicine and nursing programs. The second edition portrays both the conceptual framework and practical aspects

of infectious disease surveillance. It is a comprehensive resource designed to improve the tracking of infectious diseases and to serve as a starting point in the development of new surveillance systems. Infectious Disease Surveillance includes over 45 chapters from over 100 contributors, and topics organized into six sections based on major themes. Section One highlights the critical role surveillance plays in public health and it provides an overview of the current International Health Regulations (2005) in addition to successes and challenges in infectious disease eradication. Section Two describes surveillance systems based on logical program areas such as foodborne illnesses, vector-borne diseases, sexually transmitted diseases, viral hepatitis healthcare and transplantation associated infections. Attention is devoted to programs for monitoring unexplained deaths, agents of bioterrorism, mass gatherings, and disease associated with international travel. Sections Three and Four explore the uses of the Internet and wireless technologies to advance infectious disease surveillance in various settings with emphasis on best practices based on deployed systems. They also address molecular laboratory methods, and statistical and geospatial analysis, and evaluation of systems for early epidemic detection. Sections Five and Six discuss legal and ethical considerations, communication strategies and applied epidemiology-training programs. The rest of the chapters offer public-private partnerships, as well lessons from the 2009-2010 H1N1 influenza pandemic and future directions for infectious disease surveillance.

Informational Tracking Sylvie Leleu-Merviel,2018-06-19 "What is colour?", "What is the precise meaning of the statement 'the stock exchange closes at a 5% drop this evening'?", "How are TV viewers defined?", or "How can images produce meaning?" Such everyday questions are examined in this book. To make our analysis intuitive and understandable, numerous concrete examples illustrate our theoretical framework and concepts. The examples include gaming, fictional skits in leisure entertainment, and enigmas. The golden thread running through the text revisits the informational process and places the datum as its pivot. The epistemological perspective of our novel approach is that of "radical relativity". This is based on the precept that a perceptual trace carries with it the spectrum of the process that has engendered it. Given this, the informational tracking endeavour tracks the meaning-making process, notably through interpretive scaffoldings that leads to plausible realities.

Getting Started with Google BERT Sudharsan Ravichandiran,2021-01-22 Kickstart your NLP journey by exploring BERT and its variants such as ALBERT, RoBERTa, DistilBERT, VideoBERT, and more with Hugging Face's transformers library Key FeaturesExplore the encoder and decoder of the transformer modelBecome well-versed with BERT along with ALBERT, RoBERTa, and DistilBERTDiscover how to pre-train and fine-tune BERT models for several NLP tasksBook Description BERT (bidirectional encoder representations from transformer) has revolutionized the world of natural language processing

(NLP) with promising results. This book is an introductory guide that will help you get to grips with Google's BERT architecture. With a detailed explanation of the transformer architecture, this book will help you understand how the transformer's encoder and decoder work. You'll explore the BERT architecture by learning how the BERT model is pre-trained and how to use pre-trained BERT for downstream tasks by fine-tuning it for NLP tasks such as sentiment analysis and text summarization with the Hugging Face transformers library. As you advance, you'll learn about different variants of BERT such as ALBERT, RoBERTa, and ELECTRA, and look at SpanBERT, which is used for NLP tasks like question answering. You'll also cover simpler and faster BERT variants based on knowledge distillation such as DistilBERT and TinyBERT. The book takes you through MBERT, XLM, and XLM-R in detail and then introduces you to sentence-BERT, which is used for obtaining sentence representation. Finally, you'll discover domain-specific BERT models such as BioBERT and ClinicalBERT, and discover an interesting variant called VideoBERT. By the end of this BERT book, you'll be well-versed with using BERT and its variants for performing practical NLP tasks. What you will learn

Understand the transformer model from the ground up
Find out how BERT works and pre-train it using masked language model (MLM) and next sentence prediction (NSP) tasks
Get hands-on with BERT by learning to generate contextual word and sentence embeddings
Fine-tune BERT for downstream tasks
Get to grips with ALBERT, RoBERTa, ELECTRA, and SpanBERT models
Get the hang of the BERT models based on knowledge distillation
Understand cross-lingual models such as XLM and XLM-R
Explore Sentence-BERT, VideoBERT, and BART
Who this book is for

This book is for NLP professionals and data scientists looking to simplify NLP tasks to enable efficient language understanding using BERT. A basic understanding of NLP concepts and deep learning is required to get the best out of this book.

Solved Andrew Wear, 2020-08-06 Denmark is set to achieve 100 per cent renewable energy by 2030. Iceland has topped the gender equality rankings for a decade and counting. South Korea's average life expectancy will soon reach ninety. How have these places achieved such remarkable outcomes? And how can we apply those lessons to our own communities? The future we want is already here - it's just not evenly distributed. By bringing together for the first time tried and tested solutions to society's most pressing problems, from violence to inequality, Andrew Wear shows that the world we want to live in is already within reach. *Solved* is a much-needed dose of optimism in an atmosphere of doom and gloom. Informative, accessible and revelatory, it is a celebration of the power of human ingenuity to make the future brighter for everyone.

Coughing the Distance Walter van Praag, Megan Rozynski, 2009-10 Walter's life is a struggle to survive, there are times when he has to fight for every breath. This book will impress, inspire and enlighten readers on how extreme obstacles can be overcome by sheer guts and determination in the face of a chronic illness. It is also an entertaining travelogue of parts of Eastern Europe that few of us would visit, and certainly not on a 4,000 Km journey by bicycle with a less than 50% lung capacity. The story covers the planning and execution of an amazing journey by a small band of people, some of whom had not met each other before and who are thrown together in funny, poignant, and sometimes almost unendurable and frustrating circumstances. Central is the

author, Walter who is 42 and has cystic fibrosis, which as many will know is a chronic and debilitating condition from which most people are lucky to survive into their 30's.

Eating in Eighteenth-century Provence Barbara Santich, 2023-08-10 'We have two cuisines in France, that of the north and that of the south', boldly stated the first cookbook directly concerned with southern French cuisine in 1830. This book investigates the reasons for and background to these differences, specifically in Provence. In the absence of cookbooks for the region in the 18th century, it uses innovative methodologies relying on a range of hitherto unexplored primary resources, ranging from household accounts and manuscript recipes to local newspapers and gardening manuals that focus on the actuality of the 18th century Provençal table. The sources emphasise the essentially seasonal and local nature of eating in Provence at this time. In many ways eating habits echoed generalised French patterns, according to class, but at the same time the use of particular foods and culinary practices testified to a distinctive Provençal food culture, partly related to geographic and climatic differences but also to cultural influences. This food culture represented the foundation for the Provençal cuisine which was recognised and codified in the early 19th century. From a diverse archive of documents has emerged new evidence for the cultivation and consumption of potatoes and tomatoes in Provence and for the origins and evolution of emblematic dishes such as bourride, bouillabaisse and brandade. In linking the coming-of-age of Provençal cuisine to post-Revolutionary culture, in particular the success of restaurants and the flourishing of gastronomic discourse, this book offers a new understanding of the development and evolution of regional cuisines.

Walking and Mapping Karen O'Rourke, 2013 In 'Walking and Mapping', Karen O'Rourke explores a series of walking/mapping projects by contemporary artists. Some chart emotional GPS; some use GPS for creating datascares while others use their legs to do speculative mapping. Many work with scientists, designers, and engineers. O'Rourke offers close readings of these works and situates them in relation to landmark works from the past half-century. She shows that the infinitesimal details of each of these projects take on more significance in conjunction with others. Together, they form a new entity, a dynamic whole greater than the sum of its parts. By alternating close study of selected projects with a broader view of their place in a bigger picture, Walking and Mapping itself maps a complex phenomena.

Internet Service Provider Liability for Copyright and Trade Mark Infringement Zoi Krokida, 2022-06-16 This book critically evaluates the EU regulatory framework for the liability of host Internet Service Providers (ISPs) for copyright and trade mark infringements and provides a cluster of novel recommendations for its improvement. The book recommends the imposition of a duty of care to host ISPs to curb the dissemination of unauthorised works and counterfeit goods, the ascription of a transparency obligation to host ISPs towards their users, and the establishment of a supervisory authority for host ISPs. Host ISPs have facilitated the dissemination of content amongst users and the purchase of goods online, enabling copyright holders and brand owners to attract a greater audience for their works and goods. However, their services have attracted a high number of copyright and trade mark violations, too. Neither Article 14 of the e-Commerce Directive nor Article 17 of the Copyright in the Digital Single Market Directive provide a solid response to the issue of host ISPs' liability. This book is a valuable resource for researchers in IT and IP law and offers a new perspective for resolving online IP disputes.
