Creating Electronic Graphic Organizers Philip Wolny, 2010-08-15 Graphic organizers-an important tool in both school and business for visual learning and information processing-are no longer confined to posters, flip pads, or the pages of reports. Graphic organizers have gone digital. Now diagrams, charts, and other mind maps can be generated, posted, viewed, interpreted, and presented on computer. This means that they can be used on one's web site, inserted into a multimedia presentation, and revised or updated with new information on a daily basis. This book is an essential guide for students in how to design, create, and use digital graphic organizers, from the most basic (timelines, pie charts, step-by-step charts) To The more complex and sophisticated (Venn diagrams, flow charts, KWHL charts). This book gives readers an edge in mastering and using these invaluable tools effectively.

*Social Change in Diverse Teaching Contexts* Nancy G. Barron,Nancy Maloney Grimm,Sibylle Gruber,2006 Assumptions based on racial, class, and ethnic identities can undermine our best intentions as teachers, administrators, and scholars. The misguided strategy of colorblindness and the continuing racial segregation of American cities and schools leave teachers and students with little experience for addressing the touchy subject of racial identity in the classroom. This collection, pertinent for teacher preparation, undergraduate and graduate seminars, and reading discussion groups, focuses on new and experienced teachers who confront myths, who negotiate their own identities as well as identity politics in the classroom, and who design new projects, use new tools, and apply new practices.
