**The Metaphysics of Philosophical Daoism** Kai Zheng,2020-11-09 Drawing on evidence from a wide range of classical Chinese texts, this book argues that xingershangxue, the study of beyond form, constitutes the core argument and intellectual foundation of Daoist philosophy. The author presents Daoist xingershangxue as a typical concept of metaphysics distinct from that of the natural philosophy and metaphysics of ancient Greece since it focusses on understanding the world beyond perceivable objects and phenomena as well as names that are definable in their social, political, or moral structures. In comparison with other philosophical traditions in the East and West, the book discusses the ideas of dao, de, and spontaneously self-so, which shows Daoist xingershangxue's theoretical tendency to transcendence. The author explains the differences between Daoist philosophy and ancient Greek philosophy and proposes that Daoist philosophy is the study of xingershangxue in nature, providing a valuable resource for scholars interested in Chinese philosophy, Daoism, and comparative philosophy.

*Zuo Tradition / Zuozhuan* ,2017-05-01 Zuo Tradition (Zuozhuan; sometimes called The Zuo Commentary) is China's first great work of history. It consists of two interwoven texts - the Spring and Autumn Annals (Chunqiu, a terse annalistic record) and a vast web of narratives and speeches that add context and interpretation to the Annals. Completed by about 300 BCE, it is the longest and one of the most difficult texts surviving from pre-imperial times. It has been as important to the foundation and preservation of Chinese culture as the historical books of the Hebrew Bible have been to the Jewish and Christian traditions. It has shaped notions of history, justice, and the significance of human action in the Chinese tradition perhaps more so than any comparable work of Latin or Greek historiography has done to Western civilization. This translation, accompanied by the original text, an introduction, and annotations, will finally make Zuozhuan accessible to all.

As a result, it has postpositions rather than prepositions, branching is to the left. rather than to the right, and inflectional endings are added to the right rather than to the left. The goal of the editors of this series is to provide references works for a number of languages which will be uniform in appearance and content.

*Indonesia's Changing Political Economy* Jamie S. Davidson,2015-01-22 Indonesia is Southeast Asia's largest economy and freest democracy yet vested interests and local politics serve as formidable obstacles to infrastructure reform. In this critical analysis of the politics inhibiting infrastructure investment, Jamie S. Davidson utilizes evidence from his research, press reports and rarely used consultancy studies to challenge mainstream explanations for low investment rates and the sluggish adoption of liberalizing reforms. He argues that obstacles have less to do with weak formal institutions and low fiscal capacities of the state than with entrenched, rent-seeking interests, misaligned central-local government relations, and state-society struggles over land. Using a political-sociological approach, Davidson demonstrates that 'getting the politics right' matters as much as getting the prices right or putting the proper institutional safeguards in place for infrastructure development. This innovative account and its conclusions will be of interest to students and scholars of Southeast Asia and policymakers of infrastructure investment and economic growth.

**Feedback Control for Personalized Medicine** Esteban A. Hernandez-Vargas,2022-04-21 Feedback Control for Personalized Medicine provides ideas on ongoing efforts and obstacles by members of the control engineering community in different biological and medical applications. In addition, the book presents key challenges, insights, tools and theoretical developments that arise from personalized medicine, along with medical concepts that are explained by engineers to help non-experts follow research topics. Several clinical trials have tried to find therapeutic approaches to achieve eradication or at least lifelong, therapy-free, host control of the infection. This has been performed integrating clinical observations, empirical knowledge and information from medical tests to treat patients. As this “trial and error approach is becoming more challenging and unfeasible by the steep increase in the number of different pieces of information and the complexity of large datasets, a systematic and tractable approach that integrates a variety of biological and medical research data into mathematical models and computational algorithms is crucial to harness knowledge and to develop new therapies towards personalized medicine. Presents the most recent research in personalized medicine using control theoretical tools Offers numerical simulations that are analyzed in detail and compared with control experiments Brings the most recent research of control theory in medicine

**Of Self and Nation** C. W. Watson,2000-01-01 Recent scholarly work on nationalism has revealed the importance of the nation imagined as a community. The subjects of these works, however, have been largely political speeches, polemical essays, and radical journalism. Missing has been the one literary genre where the individual's commitment to the imagining of the nation is most explicitly addressed: autobiography. In looking critically at eight autobiographical works, all concerned in one way or another with the question of what it means to be an Indonesian in the twentieth century, C.W. Watson demonstrates the value of reading autobiographies as accounts of nation-building. Opening with a critique of a turn-of-the-century collection of letters by an aristocratic Javanese now celebrated as the founder of the women's movement in Indonesia, Watson goes on to consider the autobiography of another Javanese who was coopted into the Dutch colonial service and whose reflections on his relationships with senior Dutch officials lay bare the dynamics of the process of twentieth-century colonialism. Other autobiographies by writers and religious figures from Sumatra and Java who actively participated in the struggle of the nationalist movement in the 1930s and 1940s are also carefully scrutinized. The final chapter considers how autobiographies written by a younger generation of Indonesians in the late 1980s reconsider Indonesian nationalism in the light of a commitment to a modernist Muslim perspective on the nation.
