The Hexagon Story Frederic C. E. Oder,2012 The United States developed the Gambit and Hexagon programs to improve the nation's means for peering over the iron curtain that separated western democracies from east European and Asian communist countries. The inability to gain insight into vast denied areas required exceptional systems to understand threats posed by US adversaries. Corona was the first imagery satellite system to help see into those areas. Hexagon began as a Central Intelligence Agency (CIA) program with the first concepts proposed in 1964. The CIA's primary goal was to develop an imagery system with Corona-like ability to image wide swaths of the earth, but with resolution equivalent to Gambit. Such a system would afford the United States even greater advantages monitoring the arms race that had developed with the nation's adversaries. The system that became Hexagon faced three major challenges. The first was development of the technology, which was eventually overcome by the Itek and Perkin-Elmer Corporations. The second was bureaucratic, deciding how the CIA and Air Force would cooperate in building such a system because they each had strengths and weaknesses in the development of national reconnaissance systems. The third challenge was to secure the resources that were required to build the most complicated and largest reconnaissance satellites at the time. By 1971, the NRO overcame the challenges to successfully launch the Hexagon satellite and fulfill, or even exceed, expectations for unparalleled insight into capabilities of US adversaries.

Hexagons Teddy Borth,2015-12-15 These six-sided wonders are hiding all around us! Bees and turtles both love them. Easy text and large pictures help early readers discover hexagons are fun!

Hexagon Ann-Marie Kishel,Sheila Rivera,2007-01-01 These simple books for beginning readers introduce students to two-dimensional shapes and the vocabulary to describe these geometric concepts. The repetitive sentence structure familiarize students with sight words while vocabulary is reinforced with interesting full-color images. These books address both mathematics and reading standards.

A History of the Hexagon Program Richard J. Chester,2012 In late 1965, the stage was being set for the final study of a new generation photographic satellite. It would be required to provide the resolution of earlier close-look satellites while simultaneously providing the broad area coverage capability of previous search/surveillance systems. On July 21, 1966 proposals for the Hexagon sensor were submitted to the government by both Itek and the Perkin-Elmer Corporation. At 1700 on October 10, Mr. Robert Sorensen, then Senior Vice President, Optical Group, received an important phone call from Mr. John J. Crowley, Director of Special Projects, CIA, -- Perkin-Elmer's proposal was accepted by the government. This is a story of the events that followed.--Introduction.

Meeting the Challenge Philip Pressel,2013 Presents the recently declassified story of the design, development, production, and operation of the Hexagon KH-9 reconnaissance satellite, that provided photographic intelligence to the United States government, and it stands as one of the most complicated systems ever put into space.

The Hexagon Robert Kelly, 2016 Internationally recognized poet Robert Kelly, author of over 80 published works, newest book: *The Hexagon*. From the author: If the Pentagon is war, then the hexagon inner chamber of the hive is peace. In abstract painting, only the mark is real; resemblances are trivial or unwelcome. The Hexagon is the middle term of the five long poems of this last decade of my writing [Fire Exit, Uncertainties, The Hexagon, Heart Thread, Calls] and it is the most abstract of all my works. Each line is self-contained, inhabiting six-line stanzas, subject like any mark to contingency and proximity. Each line full of particulate matter, neither insists on nor resists connection, accepts the silence at the end of every line of poetry as its meaningful goal

Hexagon Group (Volume 1): The Dark Hive Jean-Marc Lofficier, Jose Luis Ruiz, Juan Roncagliolo, 2020 The Hexagon Group was born either in 2002, when they made their first retroactive appearance in *Strangers #1*, or in the 1960s, depending upon how one looks at it. Like The Justice Society of America and The Avengers, the group gathered together a single team of different heroes published by Editions Lug in their own series between 1964 and 1974. There is Aster from the negative dimension of Zhud; Jeff Sullivan, a.k.a. the Man of Brass, descended from a long line of heroes; the powerful Dark Flyer; the beautiful Black Lys from France; Dax, the Mysterious Archer; and White Mask from the African Republic of Zambola, all brought together to fight the evil Melanos, Aster's archenemy. Later Hexagon finds itself in Zambola facing a terrifying new threat... A mysterious insect-like civilization threatens to overwhelm the Earth, turning its inhabitants into a hive. What past secret connects the Dark Flyer to the Hive Queen? What fateful decision must Black Lys take to save the planet? And what compels White Mask to leave Hexagon forever? Art by Juan Roncagliolo Berger and José Luis Ruiz Pérez.
