Climbing Mount Sugarbin Pam Harvey, 2003 Nathan loves pistons, drive shafts and carburettors. And for the new section of the annual Mount Sugarbin Hill Climb Race he's entered Lightning Rager. But is it powerful enough?

The Cutting Edge Rod Millen, 2014-08-15 One of New Zealand's greatest rally drivers and a hill-climbing superstar tells his inspiring story for the very first time. Rod Millen was a hero of New Zealand rallying in the 1970s. Having won several championships he quickly established himself as New Zealand's number one driver. But thereafter Millen went on to do what very few Kiwis have achieved, finding podium success in American motorsport. He won the North American Race and Rally Championship in 1979, 1980 and 1981, then in 1989 Millen achieved perhaps his greatest feat, winning the Pikes Peak International Hill Climb, America's second oldest motor-racing event. Writing his name into history, he went on to win the race more times than any driver. The hill-climb is often referred to as 'Millen's Mountain'.

Rod Millen is also a highly successful businessman. As a continuation of his off-road driving interests, he founded Millenworks in California in 1980, specializing in cutting-edge light tactical vehicles, armored and off-road vehicles and subsystems for the US military and theme parks. Millen has recently returned to New Zealand, building a 140-acre, ocean-front estate at Hahei with a racetrack as a driveway, modeled on his favourite hill-climb corners around the world. He's also established Leadfoot Festival, a unique weekend held every two years at the estate, bringing together a mix of classic cars, vintage motorcycles and motorsport legends, inspired by the famous British Goodwood Festival of Speed. Aside from rallying, Rod is well known for other forms racing such as super touring, drifting and extreme off-road races like the Baja 1000 (often considered the most dangerous race in the world) and Transsyberia rally (which he won in 2007). Rod also won the Race to the Sky hill-climb in New Zealand in 2002 and posted the fastest time at the 2002 Goodwood Festival of Speed in England - and he still has the record up his own front driveway. The Cutting Edge is Rod's story, in his own words, of a life lived pushing the boundaries, of record-breaking off-road driving, working at the forefront of motorsport technology, and of creating the ultimate petrol-head heaven, right in his own backyard.

Finnish Video Games Juho Kuorikoski, 2015-05-11
In the past three decades Finland's video game industry has become the backbone of Finnish cultural export. Angry Birds and Clash of Clans

are dominating sales around the world and the small Nordic nation has become a gaming superpower. Drawing on more than 60 interviews, this book covers the Finnish video game phenomenon as told by the people behind its success. The history of the industry is documented in detail for the first time. Two hundred game reviews are included, presenting the best (and worst) of commercial video games made in Finland.

A Corinthian Endeavour Paul Jones, 2015-06-10
Every year on the last weekend of October the death knell of the cycling season is sounded by the National Hill Climb Championship. It's been won by luminaries like Brian Robinson, Chris Boardman and Malcolm Elliott, and yet the story of the championship is one of ordinary people doing extraordinary things, of amateur cyclists prevailing against the professionals. The violence of the race is set against the beauty of the landscape, from the supernatural past of Pendle Moor to the granite outcrops of Dartmoor, from the glacial High Peak to the bucolic charms of the Cotswolds. This book traces the full history of the event from its inception in 1944 through to 2014, and the incorporation of a Women's Championship from 1998 onwards.

High-Performance Subaru Builder's Guide Jeffrey Zurschmeide, 2007
Now more than ever, Subaru fanatics have a wealth of factory and aftermarket performance upgrades at their disposal. In High-

Performance Subaru Builder's Guide, author Jeff Zurschmeide explains in detail the similarities and differences between the Subaru models, and describes how to modify each for performance on the street and at the track. He uses over 300 color photos to show you how to modify your Impreza, Legacy, WRX, or STI for improved acceleration, handling, braking, and style. The book provides detailed chapters explaining how to modify the intake, exhaust, turbocharger, and computer systems for more horsepower and torque--plus info on upgrading your drivetrain to handle all that power. If taking corners is your thing, you'll find chapters on the suspension, steering, chassis, brakes, and wheels and tires. A special chapter even shows you how to get started in your favorite type of racing, including examples of successful racers and their cars.

100 Greatest Cycling Climbs Simon

Warren,2013-04-01 Cycling is Britain's biggest boom sport and nowhere is the boom more evident than on the road: once seen as the preserve of serious racers, the road bike has recently found a new lease of life due to the popularity of challenge rides and Sportives. It is now possible for cyclists of all abilities to ride a well marked, well marshalled event just about any weekend of the year, usually based around one, two or sometimes as many as ten fearsome hills. Hangdog Days Jeff Smoot,2019-03-01 Fast-paced history-cum-memoir about rock climbing in the

wild-and-wooly '80s Highlights ground-breaking achievements from the era Hangdog Days vividly chronicles the era when rock climbing exploded in popularity, attracting a new generation of talented climbers eager to reach new heights via harder routes and faster ascents. This contentious, often entertaining period gave rise to sport climbing, climbing gyms, and competitive climbing--indelibly transforming the sport. Jeff Smoot was one of those brash young climbers, and here he traces the development of traditional climbing "rules," enforced first through peer pressure, then later through intimidation and sabotage. In the late '70s, several climbers began introducing new tactics including "hangdogging," hanging on gear to practice moves, that the old guard considered cheating. As more climbers broke ranks with traditional style, the new gymnastic approach pushed the limits of climbing from 5.12 to 5.13. When French climber Jean-Baptiste Tribout ascended To Bolt or Not to Be, 5.14a, at Smith Rock in 1986, he cracked a barrier many people had considered impenetrable. In his lively, fast-paced history enriched with insightful firsthand experience, Smoot focuses on the climbing achievements of three of the era's superstars: John Bachar, Todd Skinner, and Alan Watts, while not neglecting the likes of Ray Jardine, Lynn Hill, Mark Hudon, Tony Yaniro, and Peter Croft. He deftly brings to life the characters and events of this raucous, revolutionary time in rock climbing, exploring, as he says, "what happened and why it mattered, not only to me but to the people involved and those who have followed."

Model Driven Engineering Languages and Systems
Andy Schürr, Bran Selic, 2009-09-15 The pioneering
organizers of the 1st UML workshop in Mulhouse,
France in the

summer of 1998 could hardly have anticipated that, in
little over a decade,
their initiative would blossom into today's highly suc-
cessful MODELS conference series, the premier annual
gathering of researchers and practitioners focusing
on a very important new technical discipline:
model-based software and system engineering. This
expansion is, of course, a direct consequence of
the growing significance and success of model-based
methods in practice. The conferences have
contributed greatly to the heightened interest in
the field, attracting much young talent and leading
to the gradual emergence of its
corresponding scientific and engineering
foundations. The proceedings from the MODELS
conferences are one of the primary references for
anyone interested in a more substantive study of
the domain. The 12th conference took place in
Denver in the USA, October 4–9, 2009 along with
numerous satellite workshops and tutorials, as
well as several other related scientific
gatherings. The conference was exceptionally
fortunate to have three eminent, invited keynote
speakers from industry: Stephen Mellor, Larry
Constantine, and Grady Booch.
