Advances in Artificial Intelligence Eleni Stroulia, Stan Matwin, 2003-06-29 AI 2001 is the 14th in the series of Artificial Intelligence conferences sponsored by the Canadian Society for Computational Studies of Intelligence/Société canadienne pour l'étude de l'intelligence par ordinateur. As was the case last year too, the conference is being held in conjunction with the annual conferences of two other Canadian societies, Graphics Interface (GI 2001) and Vision Interface (VI 2001). We believe that the overall experience will be enriched by this conjunction of conferences. This year is the silver anniversary of the conference: the first Canadian AI conference was held in 1976 at UBC. During its lifetime, it has attracted Canadian and international papers of high quality from a variety of AI research areas. All papers submitted to the conference received at least three independent reviews. Approximately one third were accepted for plenary presentation at the conference. The best paper of the conference will be invited to appear in Computational Intelligence.

No Hill for a Climber Rodney R. Brown, Franklin L. "Max" Grose, Ronald S. Martin, Richard Lind Swenson, 2019-04-30 Memories aren't made on ordinary days, when things go according to plan. It was those other days that are remembered by aircrews of the 147th Assault Support Helicopter Company, the Hillclimbers. These young men answered their nation's call and did their duty with honor, but then faced a thankless, shameful, and sometimes hostile reception upon their return. Here, they share some of those enduring memories of those extraordinary days. Come aboard, strap in, and ride along as they relive the challenges, the uncertainties, the danger, and the dark of the Mekong Delta of South Vietnam. These are the stories of events indelibly etched into their memories, and that are shared at their reunions. When these aging veterans gather, 'war stories' abound. As one tells a story, from within another, long forgotten memories emerge. This is a collection of war stories... the memories of events when things didn't go as planned. Some include details of long-lost letters home. What was it like to be there? Conceived during a Hillclimber reunion, this book recounts the danger, the humor, and the unusual and unexpected events they experienced. These are the common unifying bonds of kinship for those who have been there. How appropriate their motto, No Hill for a Climber!

Hierarchical Bayesian Optimization Algorithm Martin Pelikan, 2005-02 This book provides a framework for the design of competent optimization techniques by combining advanced evolutionary algorithms with state-of-the-art machine learning techniques. The book focuses on two algorithms that replace traditional variation operators of evolutionary algorithms by learning and sampling Bayesian networks: the Bayesian optimization algorithm (BOA) and the hierarchical BOA (hBOA). BOA and hBOA are theoretically and empirically shown to provide robust and scalable solution for broad classes of nearly decomposable and hierarchical problems. A theoretical model is developed that estimates the scalability and adequate parameter settings for BOA and hBOA. The performance of BOA and hBOA is analyzed on a number of artificial problems of bounded difficulty designed to test BOA and hBOA on the boundary of their design envelope. The algorithms are also extensively tested on two interesting classes of real-world problems: MAXSAT and Ising spin glasses with periodic boundary conditions in two and three dimensions. Experimental results validate the theoretical model and confirm that BOA and hBOA provide robust and scalable solution for nearly decomposable and hierarchical problems with only little problem-specific information.
