**The River** Edward Hooper,2000 A British medical journalist offers a meticulously researched look at HIV and its potential source, discussing the history of this lethal epidemic, analyzing a number of theories concerning its origins, and investigating current scientific inquiries into HIV, AIDS, and the search for a cure. Reprint. 15,000 first printing.

**Living with HIV** Mark Cichocki, RN,2017-04-04 In its updated and expanded second edition, this helpful guide offers a wealth of information for people living with HIV and for people caring for HIV-positive loved ones. All aspects of HIV/AIDS are discussed, including opportunistic and associated infections, dental care, exercise and nutrition, substance use and abuse and emotional treatment. New information will help the newly diagnosed adjust to their illness and long-term survivors to improve their quality of life. Up-to-date discussion of the latest medications covers the growing practice of using HIV drugs as preventatives. Essential Internet resources are provided that help patients live a longer, healthier life.

**Living with HIV and Dying with AIDS** Lesley Doyal,2016-05-13 There is now a vast literature on HIV and AIDS but much of it is based on traditional biomedical or epidemiological approaches. Hence it tells us very little about the experiences of the millions of people whose living and dying constitute the reality of this devastating pandemic. Doyal brings together findings from a wide range of empirical studies spanning the social sciences to explore experiences of HIV positive people across the world. This will illustrate how the disease is physically manifested and psychologically internalised by individuals in diverse ways depending on the biological, social, cultural and economic circumstances in which they find themselves. A proper understanding of these commonalities and differences will be essential if future strategies are to be effective in mitigating the effects of HIV and AIDS. Doyal shows that such initiatives will also require a better appreciation of the needs and rights of those affected within the wider context of global inequalities and injustices. Finally, she outlines approaches to address these challenges. This book will appeal to everyone involved in struggles to improve the well-being of those with HIV and AIDS. While academically rigorous, it is written in an accessible manner that transcends specific disciplines and, through its extensive bibliography, provides diverse source material for future teaching, learning and research.

**Teenagers, HIV, and AIDS** Maureen E. Lyon, Lawrence D'Angelo,2006-09-30 Who will want me now? It's a heart-wrenching question for teenagers infected with HIV. The number of HIV/AIDS-infected teenagers in the United States is increasing. Nearly 35,000 U.S. teenagers now have AIDS. Far more have been diagnosed with HIV, and an undetermined number have the virus and do not yet know. Each year, some 1,700 young people aged 13 to 24 are diagnosed with the ravaging end result of this infection: AIDS. In this volume, experts who work with HIV/AIDS-infected teenagers examine the psychological and social fallout compounding the frightening medical issues faced by adolescents who've received the diagnosis. Readers share the challenge with teens as they face the stigma of HIV/AIDS and the tough decisions about who to tell of their infection and when to do it. We learn the hard truth about health care, self care, and new treatment options for affected teens. And we read about the heartbreaking end-of-life care issues for dying adolescents. Perhaps most important, the authors offer resources teens and their families can turn to for information and support. And they explain what family, friends, teachers, and other professionals can do to help infected teens maximize their mental health and their quality of life.

**The Impact of AIDS: Psychological and Social Aspects of HIV Infection** Jose Catalan, Barbara Hedge,1997-05-22 This volume contains a selection of key contributions to the discussion on the psychological and social implications on HIV infection. It contains up-to-date and authoritative papers by senior practitioners and researchers in the field of the psychological and social aspects of HIV infection. The book will appeal to those involved in providing care

**Primary HIV/AIDS Care** Clive Evian,2003 A user-friendly, practical guide for doctors, nurses, counsellors, social workers, therapists, pharmacists, and alternative health care professionals in treating and managing people with HIV infection at the primary care level.

**Learning from HIV and AIDS** George Ellison, Melissa Parker, Catherine Campbell,2003-10-30 Different professional and academic disciplines have addressed the HIV/AIDS pandemic from a variety of perspectives, using different analytical approaches. By bringing these together in one volume, Learning from HIV/AIDS provides a more complete picture of this multi-faceted disease - from the biological and social factors which facilitate HIV transmission - to the powerful cultural and political forces which fuel the pandemic. Chapters from contributors working on the aetiology, treatment and prevention of HIV/AIDS identify how their work has helped predict the spread of HIV and has improved the survival of those infected. Yet interventions to reduce the spread of HIV have had limited success, and few HIV-infected individuals have access to combination drug therapies. Written for students and researchers, and taking an interdisciplinary perspective, this book demonstrates that progress in developing effective and acceptable interventions can only be achieved through collaboration between the biological, medical and social sciences.

**HIV/AIDS** Nancy Dumais,2017-02-22 With increasing efficacy of antiretroviral therapy, HIV/AIDS has shifted from a disease with high mortality to a chronic illness with substantial longevity. However, researchers, physicians and social workers still face many challenges, and it is important to raise awareness on several aspects that people living with HIV/AIDS have to deal in their daily lives. This book has assembled an array of chapters on the medical, social and economic aspects of HIV/AIDS. The chapters were written by experts from around the globe reflecting the importance of the topic. This book will be of great interest not only to graduate students but also to active academics and practitioners.

**Quicksand** Anonymous,2012-11-13 An accessible, informative, insider's view, this book reminds readers that there is still a long way to go. — Kirkus Reviews Weaving together her own story with straightforward questions and answers, the author explains the real ways that HIV/AIDS can be transmitted and explores the common experiences and emotions that might be encountered by friends and family members of someone who has the virus. She also discusses why HIV/AIDS is often still kept a secret and the importance of treating this condition like any other. With up-to-date medical information that has been thoroughly vetted by experts, this first-person narrative offers an invaluable look at what it is like to watch someone you know battle HIV/AIDS. Back matter includes a glossary, a bibliography, and resources for further information.

**HIV Screening and Access to Care** Institute of Medicine, Board on Population Health and Public Health Practice, Committee on HIV Screening and Access to Care,2011-05-21 Increased HIV screening may help identify more people with the disease, but there may not be enough resources to provide them with the care they need. The Institute of Medicine's Committee on HIV Screening and Access to Care concludes that more practitioners must be trained in HIV/AIDS care and treatment and their hospitals, clinics, and health departments must receive sufficient funding to meet a growing demand for care.

**Surgeon General's Report to the American Public on HIV Infection and AIDS.** ,1994 Infection with human immunodeficiency virus (HIV), the virus that causes acquired immunodeficiency syndrome (AIDS), is one of our country's greatest health challenges. Today 1 million Americans-1 in every 250-are infected with HIV. About 1 in 100 men and 1 in 800 women are now infected with HIV. Most of them look and feel healthy, since it takes an average of 10 years before a person with HIV develops AIDS. For infants and some adults, this time may be much shorter. AIDS is becoming more prominent in the young and in heterosexual men and women. AIDS is now one of the three main causes of death for women and men 25 to 44 years old in this country. It is among the top 10 causes of death for children 1 to 4 years old. AIDS is now becoming a disease of families. Today, most of the people with AIDS are young adults. Although survival times have improved greatly for people who are diagnosed early and receive medical treatment, the disease is usually fatal. Survival times today are about the same for men and women when they find out about their infection early and receive comparable medical treatment.

**Surviving HIV/AIDS in the Inner City** Sabrina Marie Chase,2011 Based on her work with minority women living, in Newark, New Jersey, Sabrina Marie Chase illuminates the hidden traps and land mines burdening our current health care system as a whole. For the women she studied, alliances with doctors, nurses, and social workers could literally mean the difference between life and death. By applying the theories of sociologist Pierre Bourdieu to the day-to-day experiences of HIV-positive Latinas, Chase explains why some struggled and even died while others flourished and thrived under difficult conditions. These gripping, true-life stories advocate for those living with chronic illness (continued from front flap) --

**100 Questions & Answers About HIV and AIDS** Paul E. Sax,2020-03-25 Offering both doctor and patient perspectives, 100 Questions & Answers About HIV and AIDS, Fifth Edition provides authoritative and practical answers to the most commonly asked questions by patients and their

loved ones. What is the difference between HIV and AIDS? How can HIV infection be prevented? How do I find the right medical care? Along with the answers to these and other questions, this book provides information on diagnosis, treatment, living with HIV and more. Updated to provide the latest information, 100 Questions & Answers About HIV and AIDS, Fifth Edition is an invaluable resource for anyone coping with the physical and emotional uncertainty of this disease.

*HIV and AIDS* Alan Whiteside,2016 Providing an introduction to HIV and AIDS, this work explains the science, the international and local politics, the demographics, and the devastating consequences of the disease. This book is aimed at general readers interested in the science, the epidemiology and the social effects of the disease which has killed 20 million.

*HIV Screening and Access to Care* Institute of Medicine,Board on Population Health and Public Health Practice,Committee on HIV Screening and Access to Care,2011-01-22 More than 200,000 people in the United States living with HIV/AIDS do not know they are infected. The Institute of Medicine's Committee on HIV Screening and Access to Care held a workshop and reviewed literature to explore barriers and facilitators to more widespread HIV testing. This book contains the committee's conclusions.

**HIV Mental Health for the 21st Century** Mark G. Winiarski,1997-03 As we approach the 21st century, we also approach the third decade of the AIDS epidemic. Mental health care providers must face the crucial fact that the human immunodeficiency virus (HIV) and the condition it causes, Acquired Immune Deficiency Syndrome (AIDS) is the leading cause of death among Americans aged 25-44 years. HIV Mental Health for the 21st Century provides a roadmap for mental health professionals who seek to develop new strategies aimed at increasing the longevity and quality of life for people living with HIV/AIDS, as well as at controlling the future spread of the disease. Divided into five sections, this volume covers basic concepts in HIV/AIDS mental health; specialized aspects of HIV/AIDS clinical care; models of clinical care; program evaluation; and HIV mental health policy and programs. Chapters treat issues such as feelings of caregivers, the role of spirituality in mental health care, rural practice, mental health home care, and working with children.

*Lethal Decisions* Arthur J. Ammann,2017-02-21 This first-person account by one of the pioneers of HIV/AIDS research chronicles the interaction among the pediatric HIV/AIDS community, regulatory bodies, governments, and activists over more than three decades. After the discovery of AIDS in a handful of infants in 1981, the next fifteen years showed remarkable scientific progress in prevention and treatment, although blood banks, drug companies, and bureaucrats were often slow to act. 1996 was a watershed year when scientific and clinical HIV experts called for treating all HIV-infected individuals with potent triple combinations of antiretroviral drugs that had been proven effective. Aggressive implementation of prevention and treatment in the United States led to marked declines in the number of HIV-related deaths, fewer new infections and hospital visits, and fewer than one hundred infants born infected each year. Inexplicably, the World Health Organization recommended withholding treatment for the majority of HIV-infected individuals in poor countries, and clinical researchers embarked on studies to evaluate inferior treatment approaches even while the pandemic continued to claim the lives of millions of women and children. Why did it take an additional twenty years for international health organizations to recommend the treatment and prevention measures that had had such a profound impact on the pandemic in wealthy countries? The surprising answers are likely to be debated by medical historians and ethicists. At last, in 2015, came a universal call for treating all HIV-infected individuals with triple-combination antiretroviral drugs. But this can only be accomplished if the mistakes of the past are rectified. The book ends with recommendations on how the pediatric HIV/AIDS epidemic can finally be brought to an end.

**Positive Living with HIV/AIDS, An Issue of Nursing Clinics** Ken Phillips,2018-02-09 Dr. Phillips has assembled well-published authors on optimizing patient outcomes in those living with HIV and AIDS. The clinical reviews in this issue will provide nurses with the current clinical information they need to incorporate best practices into their patient care and management. Articles are devoted to the following topics: Exercise and Positive Living in HIV/AIDS; Managing Other Chronic Illnesses in PLWHA; Nutritional Issues and Positive Living in HIV/AIDS; Spiritual Dimensions/Resilience; Positive Thinking in HIV/AIDS; Health Promotion in HIV/AIDS; Mental Health in HIV/AIDS; Promoting Cardiovascular Health in PLWHA; Pharmacological Considerations in HIV/AIDS; and Sleep Disturbances Associated with HIV/AIDS.

Structural Interventions for HIV/AIDS Prevention Richard A. Crosby,Ralph J. DiClemente,2018-11-23 A COMPREHENSIVE NEW REFERENCE WORK ON STRUCTURAL APPROACHES TO PREVENTING HIV Structural interventions -- changes to environment aimed at influencing health behaviors -- are the most universal and cost-effective tool in preventing new incidences of HIV. They are not easy to get right, however. Structural Interventions for HIV Prevention offers an authoritative reference for both understanding these programs and instituting them to greatest effect. Whether through changes to policy, environment, social/community norms, or a combination of each, this volume offers actionable and attainable blueprints to creating and evaluating programs in any setting or country. It is an essential resource for researchers and practitioners in the continuing fights against HIV.
