Peter Zhang

Exploitive No Limit Holdem Paul Ratchford,2014-06-26 My

biggest strength at the poker table is my ability to adapt in real time to my opponents. Exploitive No Limit Holdem was written not just to help you understand advanced NLHE theory, but more importantly to help you apply that knowledge exploitively at the poker table. I focus more on the attacking side of poker than the defending side. In many ways I feel like a good defense will come naturally for those who have a good offense. If you understand how and why you are targeting an opponent, you will also notice when you are the mark. When you finish reading this book I am confident that you will be a better player. Wherever possible I try to give you real world examples of the concepts I am discussing. Theory without applications is useless, and I recognize that my readers need more than just theory to help them improve. Included in Exploitive No Limit Holdem is an extensive discussion of how to improve your red line, the mental game, math, expected value, game theory, and risk management. Very little in poker is “solved” and that makes teaching the game challenging. Exploitive No Limit Holdem focuses not only on how to fix leaks in your game and attack opponents’ weaknesses, but also on how you can keep

growing as a player after reading this book. Exploitive No Limit Holdem can help you deepen your understanding of No Limit Holdem, which will enable you to adapt and stay profitable in a dynamic and rapidly changing industry like poker.

Advanced Hold'Em Volume 2 Ryan Sleeper, 2018-04-12

Texas Hold'Em Made Easy Walt Hazelton, 2015-08-12 In the early 1900s, Charles Goren developed a simple point-count system for the game of bridge. It quickly became the most widely used process for evaluating a players hand. It remains to this day the most commonly used process. Its popularity rests with its simplicity since it is so easy to remember. In this book, a similar point-count system is described for the game of Texas Holdem. It allows players to quickly evaluate the strength of their cards and thereby eliminates the need to utilize, or remember, the many tables of probabilities that are typically included in most of the other books on Texas Holdem. It takes into consideration more than just the initial two cards a player receives, such as position at the table, size of other bets, stage of a tournament, stack size, and special combinations of cards, such as connected and/or suited cards. After the initial development of this process, it was tested while playing over ten thousand actual hands with solid results. During this time, it was clear that many players enter hands by overrating their cards, which then often leads to unnecessary loss of chips. By

using this point-count system, only those cards with a relatively high probability of success are played. Admittedly, there is the unique aspect of Holdem in which bluffing is important, so topics such as that are also included. This book was written specifically to allow an amateur player to quickly learn a process in which steady winnings are achieved in playing in no-limit Holdem tournaments. Such tournaments can be a single-table tournament or one with many tables. Such tournaments are available in all the casinos, in cruise ships, or in local friendly games. They are also available online, so there are plenty of opportunities to enjoy this game.

New Age High Stakes No Limit Hold'em Secrets For Consistent Profits Peter Zhang, 2015-12-28 Visit SafeGlobalPoker.com To Play honest fair poker online with low rake. The idea of this book is to convey to you a complete system to take down the high stakes No Limit Hold'em tables for consistent profits. Before I begin on this journey with you I will ask you to forget everything you know

about this game. I know it will be hard to do, because you will probably have played hundreds of thousands to millions of poker hands. I believe you yourself have noted that even after knowing everything what poker books have taught you and even after applying GTO strategies you are not getting the profits you deserve. As I mentioned consistency is extremely important in this trade, you don't want to have streaks of winnings in which you go over the high tide, but then suffer losing downswings which last long. I will also explain why downswings are so bad and what can you do to stop these downswings. When I thought I had become perfect in live play, in GTO, I straight away went to Macau to play the 25/50 stakes but I came back broken by sick bad beats and downswing that wouldn't stop. It made my resolve stronger to develop a system that will allow me to consistently beat the game. To do so I had to throw out of my brain everything that I had learnt till that point of time. I perfected this system out of unique innovative ideas that allowed me to make a killing at the 25/50 games and grow my bankroll to enable me to take shots at the higher stakes. This information is not available in any existing book and is not a copy paste job from any other book. This is written by a serious poker professional for other serious poker professionals

for whom every buy-in and every win is extremely serious to the point of it being the bread and butter. I don't think that I will raise much competition in my games by sharing this information because I believe that for it to be the case hundreds of thousands of players will need to buy this book but that will already make me a millionaire. So I think I can sell this material at a high price and expect to not lose a penny worth of my knowledge. All the strategies are for 5/10 No Limit Hold'em and above stakes and 25/50 stakes which will allow a live professional to make a comfortable living playing only poker. If it is your dream to make a living being a live poker professional and just play poker then this is the book for you. I will cover everything that I know that will enable you to crush the stakes, survive as a live poker professional in this age of poker in which it is not uncommon to see at the table online phenomenon and crazy maniacs who like to push all in without seeing their cards. This book promises you to deliver all the secrets that a live poker professional needs to grind the 5/10 stakes and above to make a comfortable living. I have been a member of the twoplustwo forums and I believe the information that I will convey to you will be up-to date as I will inherit the ideas of several professionals based in Las Vegas who have survived for

years like DGIHARRIS of the twoplustwo forums and several others notable personalities like BOBAFETT, WCGRIDER and several others. I believe that the information that I will provide also inculcates and inherits from all the poker knowledge out there at various sites like DeucesCracked, TPE, CardRunners, Ivey League, RunItOnce, The Poker Bank Articles, Pocket Fives Articles, most modern poker literature including Professional No Limit Hold'em. Apart from inculcating ideas from several notable poker personalities like Annie Duke, Viktor Blom, Annette Obrestad, Stu Ungar, Doyle Brunson, Scotty Ngyuen, Daniel Negreanu, Daniel Colman and much more. Still I will be presenting the ideas for a live poker professionals who is just going to start or is already in the live poker rooms looking to heighten and sky rocket his profits on a consistent basis. Don't wait and discard the knowledge that can win you big long term. Learn from the player who has been there and done that, and focus on winning not mistaking!
