The Mediator A.J. Llewellyn, 2014-12-19 Icarus Smith has two problems, and they both want him...their Mediator. Icarus Smith has just landed an unusual assignment. A licensed mediator used to handling squabbling spouses, he's been hand-picked to negotiate a forty-million-dollar welterweight championship title fight. The problem is, these two world boxing champions hate each other. Worst of all, Icarus has discovered that one of them, Italian superstar Paolo de Luca, is the man with whom he had a passionate affair in Italy the previous summer. Paolo cruelly dumped him, and Icarus realizes he is still devastated. Can he overcome his personal feelings to work with Paolo and the boxer's arch-nemesis, US champion Adam Wyler? So far, the fight scheduled to take place at New York's Madison Square Garden is a bust. Fans have bought tickets, and Pay-Per-View sales are through the roof. Just like Lady Di's face once adorned dishcloths, these guys have their faces on buttons, badges, posters, TV and print ads. And they don't care. But Icarus has an even bigger problem. He's just accepted promoter Thaddeus Halsey's huge wad of cash to broker this deal and Icarus wants the money for a restoration project in his hometown in Las Vegas. Can Icarus go through with mediation? Can he persuade the man who broke his heart to face the guy who now apparently wants it?

Is Birdsong Music? Hollis Taylor, 2017-05-01 "A ground-breaking study of the songs of the pied butcherbird . . . intellectually engaging and also very entertaining as a fieldwork memoir." —The Music Trust How and when does music become possible? Is it a matter of biology, or culture, or an interaction between the two? Revolutionizing the way we think about the core values of music and human exceptionalism, Hollis Taylor takes us on an outback road trip to meet the Australian pied butcherbird. Recognized for their distinct timbre, calls, and songs, both sexes of this songbird sing in duos, trios, and even larger choirs, transforming their flute-like songs annually. While birdsong has long inspired artists, writers, musicians, and philosophers, and enthralled listeners from all walks of life, researchers from the sciences have dominated its study. As a field musicologist, Taylor spends months each year in the Australian outback recording the songs of the pied butcherbird and chronicling their musical activities. She argues persuasively in these pages that their inventiveness in song surpasses biological necessity, compelling us to question the foundations of music and confront the remarkably entangled relationship between human and animal worlds. Equal parts nature essay, memoir, and scholarship, *Is Birdsong Music?* offers vivid portraits of the extreme locations where these avian choristers are found, quirky stories from the field, and an in-depth exploration of the vocalizations of the pied butcherbird. "Hollis Taylor has given us one of the most serious books ever written on animal music. *Is Birdsong Music?* is so engaging that all who care about humanity's place on Earth should read it. We are certainly not the only musicians on this planet." —David Rothenberg, author of *Why Birds Sing*

One Red Paperclip Kyle MacDonald, 2015-08-25 Meet Kyle MacDonald. He has one red paperclip and one big dream. And he can write. Only problem is he's between jobs, and his girlfriend is supporting him. Now is the time for Kyle MacDonald to get creative. And that is where this amazing story begins. Kyle takes his paperclip and puts an ad on Craigslist. In just fourteen trades, Kyle MacDonald turned that paperclip into a fish pen, then a doorknob, and then a camping stove. Next, he trades the camping stove for a generator. Soon, Corbin Bernsen, Alice Cooper, and a small town in Canada are involved, and before long Kyle MacDonald turns his paperclip into a house! *One Red Paperclip* is an inspiring story about a man with the courage and moxie to think outside the box. It is the most unlikely of stories and an example of how we can create and do amazing things with the right amount of know-how and determination. Let Kyle MacDonald inspire you to find your own one red paperclip. You just never know where it could lead . . .

With a Little Help Cory Doctorow, 2015-07-16 *With a Little Help* is my first serious experiment in self-publishing. I've published many novels, short story collections, books of essays and so on with publishers, and it's all been very good and satisfying and educational and so on, but it seems like it's time to try something new. *With a Little Help* consists of 12 stories, all reprints except for *Epoch* (commissioned by Mark Shuttleworth).

Liquid Gold Rustyna Lynne, 2013-04 Financial crisis, possible divorce, murdered parents, state water loss, ranchers moving East, a near death experience, running from the law, and more murders make this action packed life of Pris Trace an almost complete disaster. Here's what readers are saying about *Liquid Gold* (LG): I gave up reading mysteries always the same mundane scenarios...I was asked to do a read for Rustyna. I found myself involved! If Rustyna decided to write a sequel to this mystery and or a different mystery I will read those novels as well. Also all her other novels she may write. - Mary Usually I put down a mystery, not necessarily wanting to return to the book right away. I foresee the plot before the third chapter. Guess what ... I never put it down ... stayed up all night reading this novel; an excellent change in mysteries. - Ron (LG) takes place here in the Verde Valley, Arizona where I live and it's quite factual. Also for the first time ever, an author made me curious enough to do my own research to find the problems ever changing, up to date! We need to think differently and make changes. -

Hidden Girl Shyima Hall, Lisa Wysocky, 2014-01-21 The author relates how she was sold by poor parents into slavery and forced to endure brutal servitude in California until a neighbor's anonymous call to the police began her journey to freedom and her subsequent efforts to fight for child slaves.

The Digital Turn Wim Westera, 2012-12 This book is about digital media. Even more, the book is about us. It explains how the ever-growing flood of digital media affects our perceptions of the world, change our behaviors and eventually transform our very existence. In the era of Facebook, Twitter, Google, and Apple, being online is the standard. We spend many hours a day gazing at our screens, traversing the virtual realm, and posting our tweets, tags, and likes. Billions of years of evolution have prepared us for life at the savannas. It took us less than two decades to radically transform our biotope. Being online is no less than a fundamentally different mode of being. It is likely to produce a fragmented, detached, and distorted view of the world. What will be our understanding of the world when all certainties that result from living in a material world become useless? What will be our role and position when computer intelligence surpasses human intelligence? How can we avoid losing grip of the significance of identity, friendship, social engagement, and eventually life at large? The book explains the mechanisms and consequences of engaging in online spaces. It offers an accessible means for attaining a better understanding of the ways digital media influence our lives. It is a compact guide to becoming media literate and to preparing us for the advanced digital services that are yet to come. This makes the book an indispensable aid for every twenty-first-century citizen.

Music's Meanings Philip Tagg, 2013-03-03 "In addressing a pedagogical problem —how to talk about music as if it meant something other than itself - Philip Tagg raises fundamental questions about western epistemology as well as some of its strategically mystifying discourses. With an unsurpassed

authority in the field, the author draws on a lifetime of critical reflection on the experience of music, and how to communicate it without resorting to exclusionary jargon. This is a must-read book for anyone interested in music, for whatever reason: students, teachers, researchers, performers, industry and policy stakeholders, or just to be able to talk intelligently about the musical experience.” (Prof. Bruce Johnson)

Songs of Place and Time ,2021-02-28 There is an established understanding that birdsong is rooted on the premise that each singing bird is only, or predominantly, concerned with intra-specific communication. Yet, on listening to the mass of birds singing at dawn we have intuitively described the phenomenon as a 'chorus'. A close analysis of the whole auditory scene suggests inter-specific structure as well as intra-specific relationships, giving rise to the 'chorus' impression, rather than random cacophony. This publication explores how the arts can represent bird song in general and the dawn chorus in particular through ways that underline each chorus' specific nature of space and place, whilst avoiding the trap of projecting human phenomena onto the more-than-human world.

Supernatural Graham Hancock,2006-09-01 Publisher’s Note: A new, expanded edition has replaced this book under the new title Visionary: The Mysterious Origins of Human Consciousness, ISBN 9781637480069 This definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release. Less than fifty thousand years ago mankind had no art, no religion, no sophisticated symbolism, no innovative thinking. Then, in a dramatic and electrifying change, described by scientists as the greatest riddle in human history, all the skills and qualities that we value most highly in ourselves appeared already fully formed, as though bestowed on us by hidden powers. In Supernatural Graham Hancock sets out to investigate this mysterious beforeandafter moment and to discover the truth about the influences that gave birth to the modern human mind. His quest takes him on a detective journey from the stunningly beautiful painted caves of prehistoric France, Spain, and Italy to rock shelters in the mountains of South Africa, where he finds extraordinary Stone Age art. He uncovers clues that lead him to the depths of the Amazon rainforest to drink the powerful hallucinogen Ayahuasca with shamans, whose paintings contain images of supernatural beings identical to the animalhuman hybrids depicted in prehistoric caves. Hallucinogens such as mescaline also produce visionary encounters with exactly the same beings. Scientists at the cutting edge of consciousness research have begun to consider the possibility that such hallucinations may be real perceptions of other dimensions. Could the supernaturals first depicted in the painted caves be the ancient teachers of mankind? Could it be that human evolution is not just the meaningless process that Darwin identified, but something more purposive and intelligent that we have barely begun to understand?

Machine Audition: Principles, Algorithms and Systems Wang, Wenwu,2010-07-31 Machine audition is the study of algorithms and systems for the automatic analysis and understanding of sound by machine. It has recently attracted increasing interest within several research communities, such as signal processing, machine learning, auditory modeling, perception and cognition, psychology, pattern recognition, and artificial intelligence. However, the developments made so far are fragmented within these disciplines, lacking connections and incurring potentially overlapping research activities in this subject area. Machine Audition: Principles, Algorithms and Systems contains advances in algorithmic developments, theoretical frameworks, and experimental research findings. This book is useful for professionals who want an improved understanding about how to design algorithms for performing automatic analysis of audio signals, construct a computing system for understanding sound, and learn how to build advanced human-computer interactive systems.
