Biodiversity Hotspot of the Western Ghats and Sri Lanka T. Pullaiah, 2024-02-20

Biodiversity is declining at an alarming rate due to anthropogenic activities around the world. This book is the first volume in the new series Biodiversity Hotspots of the World, which highlights the 36 hotspot regions of the world, regions that were designated as reaping maximum benefit from preservation efforts. This series is our humble attempt to document these hotspots as a conservation and preservation measure. This first volume in the series focuses on the Western Ghats and Sri Lanka, construed as forming a community of species because of their shared biogeographical history. The volume explores the diversity and conservation efforts of the extraordinarily rich species found here, including plants, many of which are found nowhere else in the world; forests, which face tremendous population pressure and have been dramatically impacted by demands for timber and agricultural land; as well as the hotspot's diverse mammals, birds, insects, and amphibian species, and more. The volumes in this series will be essential resources for researchers and practitioners in the fields of conservation biology, ecology, and evolution.

Water Risk Hotspots for Agriculture Organisation for Economic Co-Operation and Development (OECD), 2017-12-15 Agriculture is expected to face increasing water risks that will impact production, markets, trade and food security - risks that can be mitigated with targeted policy actions on water hotspots. This report develops the hotspot approach, provides an application at the global scale, and presents a mitigation policy action plan. The People's Republic of China, India and the United States are identified as countries facing the greatest water risks for agriculture production globally. A global simulation shows that, in the absence of action, water risks in Northeast China, Northwest India and the Southwest United States in particular could have significant production, price and trade

consequences. Agriculture water risks could also result in broader socio-economic and food security concerns. Farmers, agro food companies, and governments can all play a role in responding to water risks at hotspot locations. A three-tier policy action plan is proposed to confront water risk hotspots, encompassing targeted responses, adapted national policies, strengthened market integration and international collaboration.

OECD Studies on Water Risk Hotspots for Agriculture OECD,2017-09-25 Agriculture is expected to face increasing water risks that will impact production, markets, trade and food security - risks that can be mitigated with targeted policy actions on water hotspots.

Hotspot Networks Daniel Minoli,2002-09-25 The first-to-market, detailed guide to hotspots--the killer app for 802.11--provides need to know information on these open-to-the-public wireless networks that are springing up in hotels, airports, cafes, and even parks. Using this resource, engineers can cost, design, configure, implement, and install hotspots, or develop service applications in this hot new market. Written by Dan Minoli, one of the top voices in networking, this reference tells readers how to deliver wireless Internet and telecom that's 40 times faster and 1/10th the cost of conventional networks. * Walks designers through components, design options, cost benefits, and operating obstacles of hotspot networks * Reports on the early players in the field and details what products are coming to market * Brings developers up-to-speed on WiFi (Wireless Fidelity) technology * Overcome operating glitches * Find solutions to security problems * Explains enabling technologies, components, and design options

Oceanic Hotspots Roger Hekinian,Peter Stoffers,Jean-Louis Cheminée,2012-12-06 Ocean Hotspots provides a comprehensive overview of recent and ongoing research on intraplate volcanism in the ocean basins with special emphasis on the Pacific Ocean. The geology of the seamounts and

their associated seamount chains is described, along with detailed geophysical, geochemical and hydrothermal observations made by a multi-disciplinary group of marine geoscientists. These observations lead to a deeper understanding of how the ascending mantle melts, represented by hotspots, are able to penetrate the lithosphere, build seamounts, and enhance hydrothermal circulation. The fixed hotspot-generated seamount chains also provide key constraints on plate tectonic reconstructions on the Earth's crust.

Property Hotspots in Spain Ajay Ahuja, 2004 The author provides quality information for the growing number of UK investors in Spanish property. The text identifies the best areas in which to buy for specific needs and investment goals - whether retirement, worker, holiday or business investors.

Microbial Diversity and Ecology in Hotspots Aparna Gunjal, Sonali Shinde, 2021-11-26 Microbial Diversity in Hotspots provides an introduction to microbial diversity and microbes in different hotspots and threatened areas. The book gives insights on extremophiles, phyllosphere and rhizosphere, covers fungal diversity, conservation and microbial association, focuses on biodiversity acts and policies, and includes cases studies. Microbes explored are from the coldest to the hottest areas of the world. Although hotspots are zones with extremely high microbiology activities, the knowledge of microbial diversity from these areas is very limited, hence this is a welcome addition to existing resources. Provides an introduction to microbial biotechnology Addresses novel approaches to the study of microbial diversity in hotspots Provides the basics, along with advanced information on microbial diversity Discusses the techniques used to examine microbial diversity with their applications and respective pros and cons for sustainability Explores the importance of microbial genomes studies in commercial applications

Global Innovation Hotspots: A case study of São Paulo's innovation ecosystem local capabilities

and global networks World Intellectual Property Organization, Araujo, Veneziano, Coda-Zabetta, Massimiliano, García, Renato, Miguelez, Ernest, Raffo, Julio, 2022-09-02 This report presents an in-depth study of the innovation ecosystem of São Paulo (Brazil). We use georeferenced patent, scientific publication, and economic data to characterize one of the few global innovation hotspots in Latin America and the southern hemisphere. It attempts to understand what makes São Paulo different from the rest of Brazil and the Latin American region by mapping what its main potentialities and drawbacks are. The report finds that São Paulo is rich in scientific activity, but lags behind with respect to patent production. At the same time, it is a patent leader in Brazil and the region with characteristics resembling the large innovation hotspots of the world. The report also shows where São Paulo is in the global knowledge space, and how it can leverage scientific production and global networks to upgrade into more complex technological activities. The report also reviews the main innovation policies at national and subnational level, which may partially explain the São Paulo's success story.

South Asia's Hotspots Muthukumara Mani, Sushenjit Bandyopadhyay, Shun Chonabayashi, Anil Markandya, 2018-07-12 South Asia is particularly vulnerable to climate change. Most previous studies have focused on the projected impacts of sea-level rise or extreme weather - droughts, floods, heatwaves and storm surges. This study adds to that knowledge by identifying the impacts of long-term changes in the climate †“ rising temperatures and changes in precipitation patterns †“ on living standards. It does so by first building an understanding of the relationship between current climate conditions and living standards across South Asia. The study also identifies the set of climate models that are best suited for projecting long-term changes in climate across South Asia. This novel understanding of living standards and climate change is then combined to project impacts of long-

term changes in climate on living standards in South Asia. The study finds that higher temperatures will reduce living standards for most of South Asia, with the severity impacts depending on future global greenhouse gas emissions. The study projects “hotspots”, which are locations where long-term changes in climate will have negative impacts on living standards. Many hotspots are in locations that hitherto have not been identified as particularly vulnerable to climate change. Moreover, hotspots have distinguishing features that vary from country to country. This detailed assessment provides a mosaic of information that enriches our understanding of how climate change will impact people and which populations are most vulnerable. The report also provides guidance on the kinds of actions are most likely to reduce impacts of climate change in each country. The study is a major contribution to our understanding of how increasing temperatures and changing precipitation patterns interact with social and economic structures at a fine granular level across South Asia.

Natural Disaster Hotspots Case Studies Margaret Arnold, 2006-01-01 These case studies complement the earlier groundbreaking work of *Natural Disaster Hotspots: A Global Risk Analysis* published in April 2005. Three case studies address specific hazards: landslides, storm surges and drought. An additional, three case studies address regional multi-hazard situations in Sri Lanka, the Tana River basin in Kenya, and the city of Caracas, Venezuela.

Biodiversity Hotspots Frank E. Zachos, Jan Christian Habel, 2011-09-15 Biodiversity and its conservation are among the main global topics in science and politics and perhaps the major challenge for the present and coming generations. This book written by international experts from different disciplines comprises general chapters on diversity and its measurement, human impacts on

biodiversity hotspots on a global scale, human diversity itself and various geographic regions exhibiting high levels of diversity. The areas covered range from genetics and taxonomy to evolutionary biology, biogeography and the social sciences. In addition to the classic hotspots in the tropics, the book also highlights various other ecosystems harbouring unique species communities including coral reefs and the Southern Ocean. The approach taken considers, but is not limited to, the original hotspot definition *sensu stricto* and presents a chapter introducing the 35th hotspot, the forests of East Australia. While, due to a bias in data availability, the majority of contributions on particular taxa deal with vertebrates and plants, some also deal with the less-studied invertebrates. This book will be essential reading for anyone involved with biodiversity, particularly researchers and practitioners in the fields of conservation biology, ecology and evolution.

Indian Hotspots Chandrakasan Sivaperuman, Krishnamoorthy Venkataraman, 2018-02-01 This book offers a comprehensive account of India's four biodiversity hotspots: the Himalaya, Indo-Burma, Western Ghats and Sri Lanka and Andaman and Nicobar Islands. With a focus on tropical rainforests, it includes more than 30 chapters covering different vertebrate fauna e.g. fishes, amphibians, reptiles, birds, and mammals, as well as topics such as conservation and management aspects. Written by experts in the field of biodiversity conservation and management, it offers ample new insights into a number of subjects related to the faunal communities of tropical forest ecosystems, providing a valuable resource for conservationists and researchers in the field of flora and fauna diversity.

The Hot Spot Charles Williams, 2012-09-18 For Madox, a dull town, a beautiful woman, and an easy bank heist spell doom In a town so small that Main Street is only three blocks long, there isn't a lot to do—other than work, ogle women, and think about fast ways to get rich. After a year of aimless wandering, Madox has landed here, nearly broke and with no prospects but a dead-end job selling

cars to yokels. Until one afternoon a fire at the burger joint draws the attention of everyone in town—including the men who are supposed to be guarding the bank. It's almost too good to be true, but there it is—\$15,000 lying around, watched by no one. Now all Madox needs is a little nerve and a second distraction. And while one woman will give him the nerve, another will make him ready to kill.

Hot Spot Michael Craft, 2003-06-04 During his distinguished career as a journalist, Mark Manning has seen it all--riots, murder, political corruption, and every manifestation of the dark heart of the human species. But even his proven emotional resources will be stretched when the home he shares with his lover, architect Neil Waite, and his ward and nephew, Thad Quatrain, becomes the site of one of the most daunting, taxing, and potentially dangerous of all human rituals--a wedding. Roxanne Exner, best friend to both Mark and Neil, is having her nuptial ceremony at their house in the normally bucolic Dumont, Wisconsin, partly because Carl Creighton, her husband to be, is in the final weeks of his campaign for lieutenant governor of Illinois. For Roxanne, Dumont will afford some needed distance from the campaign, and for the city of Dumont, it will be the social event of the season. The wedding, despite everyone's fears, comes off with nary a hitch. The reception, however, takes a disastrous turn when a local matron, who happens to be a major donor to the campaign of Creighton's rival, is killed in what appears to be a freak electrical mishap. Authorities soon discover that the electrocution was no accident. Then another shocker--Roxanne herself becomes the prime suspect. If Roxanne is ever to enjoy her honeymoon, and if Carl and his running mate are to stand a chance of election, Mark finds himself in a race against the clock to solve a most perplexing murder.

Hot Spots Lynda Gratton, 2007-02-19 You always know when you are in a Hot Spot. You feel energized and vibrantly alive. Your brain is buzzing with ideas, and the people around you share your

joy and excitement. Things you've always known become clearer, adding value becomes more possible. Ideas and insights from others miraculously combine with your own to create new thinking and innovation. When Hot Spots arise in and between companies, they provide energy for exploiting and applying knowledge that is already known and genuinely exploring what was previously unknown. Hot Spots are marvelous creators of value for organizations and wonderful, life-enhancing phenomena for each of us. Lynda Gratton has spent more than ten years investigating Hot Spots--discovering how they emerge and how organizations can create environments where they will proliferate and thrive. She has studied dozens of companies and talked to hundreds of employees, managers, and executives in the US, Europe, and Asia. She has asked the important questions: Why and when do Hot Spots emerge? What is it about certain groups of people that support the emergence of Hot Spots? What role do leaders play? She's discovered a host of elements that together contribute to the emergence of Hot Spots--creating energy and excitement, and supporting and channeling that energy into productive outcomes. In this groundbreaking book, Gratton describes four crucial qualities that an organizational culture must have to support the emergence of Hot Spots, looks at what leaders can do to encourage them, and offers activities and tools you can use in your own company to increase the probability of them arising. In these days when traditional organizational boundaries are becoming barriers to progress, Gratton offers advice and guidance that you can use right now to increase the probability of Hot Spots emerging in your organization.

"Hot Spots" in the Climate System Hisashi Nakamura, Atsuhiko Isobe, Shoshiro Minobe, Humio Mitsudera, Masami Nonaka, Toshio Suga, 2016-03-17 This book consists of the articles from the special issue of "'Hot Spots' in the Climate System" in the Journal of Oceanography, Vol. 71 No. 5, 2015, comprising 9 chapters that cover a wide spectrum of topics. This spinoff book is a collection of papers on the scientific outcomes of a nationwide 5-year project funded by the Japanese Ministry of Education, Culture, Sports, Science and Technology (MEXT) and known internationally as the "Hot-Spot Project." The academic achievement of the project has gained international recognition, making substantial contribution to unveiling the climatic role of warm western boundary ocean currents,

including the Kuroshio, and associated oceanic fronts characterized by sharp temperature gradients and active meso-scale oceanic eddies. Specifically, those warm currents may be called “hot spots” in the climate system, as they intensively release heat and moisture to the atmosphere, thereby acting to organize clouds and precipitation systems and set conditions favorable for recurrent development of storms. This spinoff is a unique collection of the outcome of the particular project. The collected papers cover a wide range of aspects of ocean-atmosphere interaction characteristic of the oceanic fronts and continental marginal seas, unveiled through observational, theoretical, analytical, and numerical investigations. Most of the readers of the book are assumed to be researchers and graduate students who study climate dynamics, physical oceanography, atmospheric science, and air-sea interaction.
