Awesome Sauce Josh Stock,2022-08-17 This playful book by award-winning educator Josh Stock shows teachers how to make simple videos to improve student learning and classroom culture, and connect with parents. The ability to use video to

communicate has become a basic element of literacy – inside and outside the classroom. This fun-to-read book shows educators how to make simple videos that explain assignments, welcome students to new schools and grades, differentiate lessons for a range of learning levels and more. The book also helps teachers use video to address common issues like enhancing classroom culture and managing parent communication. Structured like a cookbook, *Awesome Sauce* discusses both the “why” and the “how” behind the strategies. Each section begins with the story of why Stock uses the strategy, demonstrating what teachers will get out of trying it with their students. These explanations are followed by “how-to” recipes that guide readers in creating the “awesome sauce” their videos will become. The book:

- Provides practical ways to create videos for the classroom to boost learning outcomes.
- Offers a creative and fresh approach to PD with manageable layout and friendly, accessible voice.
- Offers an accessible solution for all classroom teachers, regardless of tech skills, including basic setups that yield great results.

Since the boom of social media in the mid-2000s, tens of millions of people have started their own platforms in hopes of creating success on their own terms. But with great visibility comes great vulnerability. We become riddled with self-doubt and trapped performing a version of what they believe will be acceptable to others—optimized for more external approval and algorithmic success. Enter *Followed: The Content Creator's Guide to Being Seen, Facing Judgment, and Building an Authentic Personal Brand*. By embracing self-discovery through self-expression, you can learn to see exposure as an opportunity for personal development—and break free from the imaginary boxes that were always too small for you, anyway. Digital Platforms and Algorithmic Subjectivities

Emiliana Armano, Marco Briziarelli, Elisabetta Risi, 2022-11-01 Algorithms are a form of productive power – so how may we conceptualise the newly merged terrains of social life, economy and self in a world of digital platforms? How do multiple self-quantifying practices interact with questions of class, race and gender? This edited collection considers algorithms at work – for what purposes encoded data about behaviour, attitudes, dispositions, relationships and preferences are deployed – and black box control, platform society theory and the formation of subjectivities. It details technological structures and lived experience of algorithms and the operation of platforms in areas such as crypto-finance, production, surveillance, welfare, activism in pandemic times. Finally, it asks if platform cooperativism, collaborative design and neomutualism offer new visions. Even as problems with labour and in society mount, subjectivities and counter subjectivities here produced appear as conscious participants of change and not so much the servants of algorithmic control and dominant platforms.
