*Smartphone Smart Marketing* Robb Wallace, 2021-01-01 It is time to become the content creator and marketer you always dreamed of being? If you have a smartphone, then you are ready to create and build an audience for your brand or business. You have the technology and this book will give you the knowledge and practical skills to use it. *Smartphone Smart Marketing* is the follow-up book to the successful title *Smartphone Media Production*. It is written by award-winning filmmaker, professional digital marketer and content creator Robb Wallace. Robb has over sixteen years of experience in the field as well as an award-winning degree in Broadcast Production. In 2016 *Smartphone Media Production* showed its readers how to plan, capture, edit and distribute content (branded photography, audio, video and live streams) with only their phones. In this updated and fully revised version, Robb is back with even more great content including chapters on content marketing, social media channels and social media strategies. Who is this book for? It is for people who; Don't know how to create content to market their brand. Don't have the funds for a marketing manager but are willing to put in the hard work and learn the skills. Don't have a big budget for expensive things like promo videos, marketing images, social media campaigns. Don't know where to start when launching a new business or product. Have tried and failed to create engaging content for social media and are looking for a guide. Aspire to be a social media influencer. Wish to enter employment as a marketing professional. Interested in digital marketing. Need real-world digital skills to grow their business. Are interested in entrepreneurial skills. Are looking to create better images, videos or live streams. So if you want a solid, no-nonsense, practical overview to content marketing and media production, using only your smartphone, *Smartphone Smart Marketing* is the book for you. The book includes cheat guides, best apps, worked examples and more. Let's get to

work, buy your copy, grab your phone, it's time to leave the competition behind. Acclaim for Smartphone Media Production from 2016 "Received! Dove in - Liked what I saw! Really useful stuff". Peter Shankman "This book is fantastic and would highly recommend it for anyone starting to get into making videos on their phone." Stewart Richardson professional photographer. "This book has helped me increase my understanding and develop some really good strategies on maximising the use of smartphones and social media in a variety of ways, from personal use through to improving business reach. Excellent stuff!" Amazon. "So impressed I hired him" Peter Syme adventure specialist and business owner. "As a self-employed business owner, keeping up with changes in technology can be overwhelming, I found this book full of great information, presented in a clear and practical way - full of advice and resources to keep you on your toes." Chris Wain Unique Adventure Tours Scotland. "I am a gent of a certain age and have had to embrace technology and the Internet as an adult and not something that I have grown up with or was taught at school. I run a Facebook page and a small stall making and selling custom props and toys and wanted to take things to the next level and having no experience in media production this sounded perfect. From my perspective the book is full of all the basic information I needed to get started making the most of my Facebook page and filming video, taking photographs and getting them out there on social media to get the most impact. Then the book is also full of everything else needed to take things even further, how to follow up on the social media interest and even loads of information coming from a business point of view which I'm sure I will use down the line as I take things further. Overall this book had everything I needed to get me up and running on social media, producing what I feel is way better quality content than I could have ever imagined I was capable of and all with a single piece of hardware, my Smartphone, it's amazing." Big Al Monkeytron Collective.

**“We’re better, connected”** Sönke Graf,2019-11-19 How to improve science teacher effectiveness? In order to find answers to this question a first step in this study is a close observation and critical reflection on the level of science teacher training courses. During an international science teacher training course, which had been previously developed in a three-year European project (CAT4U), informal conversations of the participants were recorded and analysed allowing genuine insight in the ways that teachers exchange about profession-related content among themselves. This work is a first exploratory step into a fairly new field of professional development research, which hopes to come up with some reasonable hypotheses gained from the combination of current research literature and from deeper analyses of field data, that hopefully serves as an inspiration for teacher trainers in practice as well as for further educational research.

Peterson,2007-04-27 This book provides for the first time a general overview of research activities related to location and map-based services. These activities have emerged over the last years, especially around issues of positioning, spatial modelling, cartographic communication as well as in the fields of ubiquitous cartography, geo-pervasive services, user-centered modelling and geo-wiki activities. The innovative and contemporary character of these topics has lead to a great variety of interdisciplinary contributions, from academia to business, from computer science to geodesy. Topics cover an enormous range with heterogenous relationships to the main book issues. Whilst contemporary cartography aims at looking at new and efficient ways for communicating spatial information the development and availability of technologies like mobile networking, mobile devices or short-range sensors lead to interesting new possibilities for achieving this aim. By trying to make use of available technologies, cartography and a variety of related disciplines look specifically at user-centered and conte- aware system development, as well as new forms of supporting wayfinding and navigation systems. Contributions are provided in five main sections and they cover all of these aspects and give a picture of the new and expanding field of Location Based Services and TeleCartography.
