Applications and Innovations in Intelligent Systems VIII Ann Macintosh, Mike Moulton, Frans Coenen, 2012-12-06 Ann Macintosh Napier University, UK The papers in this volume are the refereed application papers presented at ES2000, the Twentieth SGES International Conference on Knowledge Based Systems and Applied Artificial Intelligence, held in Cambridge in December 2000. The scope of the Application papers has expanded over recent years to cover not just innovative applications using traditional knowledge based systems, but also to include applications demonstrating the whole range of AI technologies. This volume contains thirteen refereed papers describing deployed applications or emerging applications, together with an invited keynote paper by Dr. Daniel Clancy of NASA Ames Research Centre. The papers were subject to refereeing by at least two expert referees. All papers which were controversial for some reason were discussed in depth by the Application Programme Committee. For the application stream, a paper is acceptable even if it describes a system which has not yet been installed, provided the application is original and the paper discusses the kinds of things that would help others needing to solve a similar problem. Papers have been selected to highlight critical areas of success (and failure) and to present the benefits and lessons learnt to other developers. Papers this year cover topics as diverse as: KBS for maintaining offshore platforms; Data Mining to predict corporate business failure; integrated AI techniques to support field service engineers; Natural Language applied to the Data Protection Act; knowledge management and the application of neural networks.

A Manager's Primer on e-Networking Dragan Nikolic, 2012-09-10 The implementation of Enterprise Networks or e-Networking is of paramount importance for organisations. Enterprise-wide networking would warrant that the components of information architecture are organised to harness more out of the organisation's computing power on the desktop. This would also involve establishment of networks that link the various but important subsystems of the enterprise. Our firm belief is that in order to gain a competitive edge the organisations need knowledge and sound strategy. This conviction is particularly true today, considering the pressures from international competition, environmental concerns and complicated ethical issues. This book, entitled A Manager's Primer on e-Networking, negotiates the hyper dimensions of the Internet through stories from myriad of Web sites with its fluent presentation and simple but chronological organisation of topics highlighting numerous opportunities and providing a solid starting point not only for inexperienced entrepreneurs and managers but anyone interested in applying information technology in the business. I sincerely hope the book will help as well many small and medium size companies and organisations to launch corporate networking successfully in order to attain their strategic objectives. The Life of Langston Hughes Arnold Rampersad, 2002-01-10 February 1, 2002 marks the 100th birthday of Langston Hughes. To commemorate the centennial of his birth, Arnold Rampersad has contributed new Afterwords to both volumes of his highly-praised biography of this most extraordinary and prolific American writer. The second volume in this masterful biography finds Hughes rooting himself in Harlem, receiving stimulation from his rich cultural surroundings. Here he rethought his view of art and radicalism, and cultivated relationships with younger, more militant writers such as Richard Wright, Ralph Ellison, James Baldwin, and Amiri Bakara. Rampersad's Afterword to volume two looks further into his influence and how it expanded beyond the literary as a result of his love of jazz and blues, his opera and musical theater collaborations, and his participation in radio and television. In addition, Rampersad explores the controversial matter of Hughes's sexuality and the possibility that, despite a lack of clear evidence, Hughes was homosexual. Exhaustively researched in archival collections throughout the country, especially in the Langston Hughes papers at Yale University's Beinecke Library, and featuring fifty illustrations per volume, this anniversary edition will offer a new generation of readers entrance to the life and mind of one of the twentieth century's greatest artists.

The Internet and the Madonn Paolo Apolito,Antony Shugaar,2010-10-19 In 1994, a devout Catholic woman from Vermont began having religious visions and hearing the voice of the Virgin Mary. To spread word about her mystical experiences, she turned to the Internet. As Paolo Apolito records here, she is only one of many people who use the Web as a tool of religious devotion. Every day, thousands of Catholics - from Italy and Latin America to the United States and Bosnia - use the Internet to describe and celebrate apparitions of Mary, to exchange relics and advice in chat rooms, to make pilgrimages to religious Web sites, and to practice the rites of their faith online. But how has this potent new mix of technology and religiosity changed the way Catholics view their faith? And what challenges do the autonomous qualities of the Internet pose to the broader authority of Catholicism? Does the democratic nature of access to digital technologies constitute a return to a more archaic and mystical form of Catholicism that predates the modernizing reforms of the Second Vatican Council? In working through these questions, Apolito considers visions of Mary on the Web over the past two decades, revealing a great deal about religion as it is now experienced through new information technologies. The Internet, he explains, has made possible a decentralized community of the devoted, even as it has absorbed God into the shifts and complexities of electronic circuitry. And this profound development in religious life will only accelerate as use of the Internet spreads around the world. An indispensable guide to the future of Catholicism, *The Internet and the Madonna* offers a compelling glimpse into the spiritual life of the connected soul.
