Animals with Human Faces Beryl Rowland,1974

Faces around the World Margo DeMello,2012-02-14 This book provides a comprehensive examination of the human face, providing fascinating information from biological, cultural, and social perspectives. Our faces identify who we are—not only what we look like and what ethnicities we belong to, but they can also identify what religions we practice and what personal ideologies we have. This one-of-a-kind A-Z reference explores the ways we change, beautify, and adorn our faces to create our personalities and identities. In addition to covering the basics such as the anatomical structure and function of parts of the human face, the entries examine how the face is viewed around the world, allowing students to easily draw connections and differences between various cultures around the world. Readers will learn about a wide variety of topics, including identity in different cultures; religious beliefs; folklore; extreme beautification; the evil eye; scarification; facial piercing and facial tattooing masks; social views about beauty including cosmetic surgery and makeup; how gender, class and sexuality play a role in our understanding of the face; and skin, eye, mouth, nose, and ear diseases and disorders. This encyclopedia is ideal for high school and undergraduate students studying anthropology, anatomy, gender, religion, and world cultures.

Face to Face with Animals Peter Atterton,Tamra Wright,2019-04-16 This is the first volume of primary and secondary source material dedicated solely to the animal question in Levinas. Drawing on previously unpublished material, including the recent discovery and digitization of the original French recording of an interview with Levinas that took place in 1986, it seeks to give fresh impetus to the debate surrounding the moral status of animals in Levinas's work. The book offers ten essays by leading scholars, along with a general introduction that places Levinas's philosophy in the context of the growing field of animal ethics. The aim of the volume is to encourage dialogue on how we can extend Levinas's ethics beyond its traditional human confines and to spur further research on the opportunities and challenges it raises.

Introduction to Human-Animal Interaction Laëtitia Maréchal,Emile van der Zee,2024-01-29 Introduction to Human-Animal Interaction focuses on the human dimension of interacting with other animals. This book introduces recent developments, theories, and debates in the relatively new research area of Human-Animal Interaction (HAI) and focuses on the social and life sciences aspect of these interactions. Experts from different academic disciplines provide an overview for students and professionals interested in how humans and other animals interact, and what advantages and disadvantages emerge for both parties in this relationship. The book starts with the theories and mechanisms supporting our interactions with animals, such as human-animal communication, and it then covers the implications of HAI in terms of ethics and welfare. After discussing cultural differences and forensic aspects in human-animal interaction (e.g., wildlife crime and animal abuse), the book examines evidence in the area of animal-assisted intervention. The final chapters give an overview of current research in specific human-animal interaction systems: human-pet, human-livestock and human-wildlife interaction. The book offers a scientific, evidence-based perspective on human-animal interaction, providing pedagogical tools to make a systematic, critical and constructive evaluation of research in HAI possible. It offers a range of in-text pedagogical features like a subject index, chapter MCQs, open questions, further reading, and additional digital resources including videos which are accessible via QR codes or through the associated website. This textbook provides the fundamental tools for achieving a comprehensive, current, and critical overview of the HAI field and is an integral text for undergraduate and postgraduate students undertaking modules in human-animal interaction, in social sciences such as anthropology, cultural studies, criminology, ethics and laws or in life sciences such as animal behaviour, conservation and welfare, biology, neuroscience, physiology, psychology, public health and those studying veterinary science.

Animal Faces at Night Hannah Kate Sackett,2003 Animal Faces is a new series of books that captures the wonderful diversity of nature in the faces of animals. So much about an animal can be understood by looking at the characteristics of it's face—how it survives, how it sees, hears, tastes, and smells, how it stench danger, how it communicates, and even how it attracts a mate or lures prey within striking distance. The characteristics of each of the faces featured in this book help animals thrive in at night. Learn how the flightless kiwi uses its keen sense of smell to find its food on the dark forest floor, and how the aye-aye uses its large eyes and ears to search the trees for insect prey. The colorful, detailed, and accurate portraits of animal faces—big and small—give a new meaning to in-your-face artwork. Whether in the rain forest or a cave, in the ocean or the sky, animal faces At Night creates an amazing animal adventure you're sure to enjoy!

Animals and the Human Imagination Aaron S. Gross,Aaron Gross,Anne Vallely,Jonathan Safran Foer,2012 This interdisciplinary and cross-cultural collection reflects the growth of animal studies as an independent field and the rise of 'animality' as a critical lens through which to analyze society and culture, on par with race and gender.

Humans in an Animal's World – How Non-Human Animals Perceive and Interact with Humans Christian Nawroth,Luigi Baciadonna,Nathan J. Emery,2021-10-20

God, Human, Animal, Machine Meghan O'Gieblyn,2022-07-12 A strikingly original exploration of what it might mean to be authentically human in the age of artificial intelligence, from the author of the critically-acclaimed Interior States. • At times personal, at times philosophical, with a bracing mixture of openness and skepticism, it speaks thoughtfully and articulately to the most crucial issues awaiting our future. —Phillip Lopate “[A] truly fantastic book.”—Ezra Klein For most of human history the world was a magical and enchanted place ruled by forces beyond our understanding. The rise of science and Descartes's division of mind from world made materialism our ruling paradigm, in the process asking whether our own consciousness—i.e., souls—might be illusions. Now the inexorable rise of technology, with artificial intelligences that surpass our comprehension and control, and the spread of digital metaphors for self-understanding, the core questions of existence—identity, knowledge, the very nature and purpose of life itself—urgently require rethinking. Meghan O'Gieblyn tackles this challenge with philosophical rigor, intellectual reach, essayistic verve, refreshing originality, and an ironic sense of contradiction. She draws deeply and sometimes humorously from her own personal experience as a formerly religious believer still haunted by questions of faith, and she serves as the best possible guide to navigating the territory we are all entering.

Considering Animals Carol Freeman,Elizabeth Leane,Yvette Watt,2016-12-05 Considering Animals draws on the expertise of scholars trained in the biological sciences, humanities, and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals. Taking their cue from the specific 'animal moments' that punctuate these interactions, the essays engage with contemporary issues and debates central

to human-animal studies: the representation of animals, the practical and ethical issues inseparable from human interactions with other species, and, perhaps most challengingly, the compelling evidence that animals are themselves considering beings. Case studies focus on issues such as animal emotion and human 'sentimentality'; the representation of animals in contemporary art and in recent films such as March of the Penguins, Happy Feet, and Grizzly Man; animals' experiences in catastrophic events such as Hurricane Katrina and the SARS outbreak; and the danger of overvaluing the role humans play in the earth's ecosystems. From Marc Bekoff's moving preface through to the last essay, Considering Animals foregrounds the frequent, sometimes uncanny, exchanges with other species that disturb our self-contained existences and bring into focus our troubled relationships with them. Written in an accessible and jargon-free style, this collection demonstrates that, in the face of species extinction and environmental destruction, the roles and fates of animals are too important to be left to any one academic discipline.

Phenomenology and the Non-Human Animal Corinne Painter,Christian Lotz,2007-07-26 The question of the relation between human and non-human animals in theoretical, ethical and political regards has become a prominent topic within the philosophical debates of the last two decades. This volume explores in substantial ways how phenomenology can contribute to these debates. It offers specific insights into the description and interpretation of the experience of the non-human animal, the relation between phenomenology and anthropology, the relation between phenomenology and psychology, as well as ethical considerations.

Animals Make Us Human Temple Grandin,Catherine Johnson,2009 The author of Animals in Translation employs her own experience with autism and her background as an animal scientist to show how to give animals the best and happiest life.

Teaching the Animal Margo DeMello,2010 Originally published as part of: Teaching the animal: human/animal studies across the disciplines.

The Human Animal in Western Art and Science Martin Kemp,2007-10-01 From the lazy, fiddling grasshopper to the sneaky Big Bad Wolf, children's stories and fables enchant us with their portrayals of animals who act like people. But the comparisons run both ways, as metaphors, stories, and images—as well as scientific theories—throughout history remind us that humans often act like animals, and that the line separating them is not as clear as we'd like to pretend. Here Martin Kemp explores a stunning range of images and ideas to demonstrate just how deeply these underappreciated links between humans and other fauna are embedded in our culture. Tracing those interconnections among art, science, and literature, Kemp leads us on a dazzling tour of Western thought, from Aristotelian physiognomy and its influence on phrenology to the Great Chain of Being and Darwinian evolution. We learn about the racist anthropology underlying a familiar Degas sculpture, see paintings of a remarkably simian Judas, and watch Mowgli, the man-child from Kipling's The Jungle Book, exhibit the behaviors of the beasts who raised him. Like a kaleidoscope, Kemp uses these stories to refract, reconfigure, and echo the essential truth that the way we think about animals inevitably inflects how we think about people, and vice versa. Loaded with vivid illustrations and drawing on sources from Hesiod to La Fontaine, Leonardo to P. T. Barnum, The Human Animal in Western Art and Science is a fascinating, eye-opening reminder of our deep affinities with our fellow members of the animal kingdom.

The Routledge International Handbook of Human-Animal Interactions and Anthrozoology Aubrey H. Fine,Megan K. Mueller,Zenithson Y. Ng,Alan M. Beck,Jose M. Peralta,2023-09-26 This diverse, global, and interdisciplinary volume explores the existing research, practice, and ethical issues pertinent to the field of human-animal interactions (HAIs), interventions, and anthrozoology, focusing on the perceived physical and mental health benefits to humans and the challenges derived from these relationships. The book begins by exploring the basic theoretical principles of anthrozoology and HAI, such as the evolution and history of the field, the importance of language, the economic costs and current perspectives to physical and mental wellbeing, the origins of domestication of animals, anthropomorphism, and how animals fit into human societies. Chapters then move onto practice, covering topics such as how animals help childhood and adulthood development, pet ownership, disability, the roles of pets for people with psychiatric disorders, the links between animal and domestic abuse, and then more widely into the therapeutic roles of animals, animal-assisted therapies, interactions outside the home, working animals, animals in popular culture, and animals in research, for leisure, and food. Including chapters on a wide range of animals, from domesticated pets to wildlife, this collection examines the benefits yet also reveals the complexity, and often dark side, of human-animal relations. Interweaving accessible commentaries with revealing chapters throughout the text, this collection would be of great interest to students and practitioners in the fields of mental health, psychology, veterinary medicine, zoology, biology, social work, history, and sociology.
