Proxies Brian Blanchfield,2016-06-22 Past compunction, expressly un beholden, these twenty-four single-subject essays train focus on a startling miscellany of topics - Foot Washing, Dossiers, Br'er Rabbit, Housesitting, Man Roulette, the Locus Amoenus - that begin to unpack the essayist himself and his life's rotating concerns: sex and sexuality, poetry and poetics, subject positions in American labor (not excluding academia), and his upbringing in working-class, Primitive Baptist, central-piedmont North Carolina. In Proxies an original constraint, a total suppression of recourse to authoritative sources, engineers Brian Blanchfield's disarming mode of independent intellection. The repeatable experiment to draw only from what he knows, estimates, remembers, and misremembers about the subject at hand often opens onto an unusually candid assessment of self and situation. The project's driving impulse, courting error, peculiar in an era of crowd-sourced Wiki-knowledge, is at least as old as the one Montaigne had when, putting all the books back on the shelf, he asked, What do I know?

Proxies Dylan Mulvin,2021-08-17 How those with the power to design technology, in the very moment of design, are allowed to imagine who is

included--and who is excluded--in the future. Our world is built on an array of standards we are compelled to share. In *Proxies*, Dylan Mulvin examines how we arrive at those standards, asking, To whom and to what do we delegate the power to stand in for the world? Mulvin shows how those with the power to design technology, in the very moment of design, are allowed to imagine who is included--and who is excluded--in the future. For designers of technology, some bits of the world end up standing in for other bits, standards with which they build and calibrate. These proxies carry specific values, even as they disappear from view. Mulvin explores the ways technologies, standards, and infrastructures inescapably reflect the cultural milieus of their bureaucratic homes. Drawing on archival research, he investigates some of the basic building-blocks of our shared infrastructures. He tells the history of technology through the labor and communal practices of, among others, the people who clean kilograms to make the metric system run, the women who pose as test images, and the actors who embody disease and disability for medical students. Each case maps the ways standards and infrastructure rely on prototypical ideas of whiteness, able-bodiedness, and purity to control and contain the messiness of reality. Standards and infrastructures, Mulvin argues, shape and distort the possibilities of representation, the meaning of difference, and the levers of change and social justice.

Multi-Agent Systems and Applications IV Michal Pechoucek,Paolo Petta,Laszlo Zsolt Varga,2005-10-03 The aim of the CEEMAS conference series is to provide a biennial forum for the presentation of multi-agent research and development results. With its particular geographical orientation towards Central and Eastern Europe, CEEMAS has become an internationally recognised event with participants from all over the world. After the successful CEEMAS conferences in St. Petersburg (1999), Cracow (2001) and Prague (2003), the 2005 CEEMAS conference takes place in Budapest. The programme committee of the conference series consists of established researchers from the region and renowned international colleagues, showing the prominent rank of CEEMAS among the leading events in multi-agent systems. In the very competitive field of agent oriented conferences and workshops

nowadays (such as AAMAS, WIIAT, EUMAS, CIA, MATES) the special profile of CEEMAS is that it is trying to bridge the gap between applied research achievements and theoretical research activities. Our ambition is to provide a forum for presenting theoretical research with an evident application potential, implemented application prototypes and their properties, as well as industrial case studies of successful (but also unsuccessful) agent technology deployments. This is why the CEEMAS proceedings volume provides a collection of research and application papers. The technical research paper section of the proceedings (see pages 11–499) contains pure research papers as well as research results in application settings while the application papers section (see pages 500–530) contains papers focused on application aspects. The goal is to demonstrate the real life value and commercial reality of multi-agent systems as well as to foster communication between academia and industry in this field.

Configuration of Microsoft ISA Proxy Server and Linux Squid Proxy Server Dr. Hidaia Mahmood Alassouli, 2020-04-02 a lot of technicians switch between ISA server and Squid server, I decided to write this paper to present some reference when configuring ISA and Squid. There are a lot of issues that are not covered, and you can go to the manual of ISA server and Squid server for detailed configuration of ISA and Squid. The paper is composed of two parts: 1. Microsoft ISA server 2004 Configuration 2. Linux Squid Server Configuration. Note that, this work was done without proper simulation, because of the lack of resources, as testing firewall configuration requires many computers, with one of them should have many network cards. Also the ISA server is not used in the computer center now. **KEYWORDS:** Internet Security Acceleration Server, ISA Server, Squid Server, Proxy, Firewall.
