The Best Camera Is The One That's With You Chase Jarvis,2009-09-18 A beacon of creativity with boundless energy, Chase Jarvis is well known as a visionary photographer, director, and social artist. In *The Best Camera Is The One That's With You*, Chase reimagines, examines, and redefines the intersection of art and popular culture through images shot with his iPhone. The pictures in the book, all taken with Chase's iPhone, make up a visual notebook—a photographic journal—from the past year of his life. The book is full of visually-rich iPhone photos and peppered with inspiring anecdotes. Two megapixels at a time, these images have been gathered and bound into a book that represents a stake in the ground. With it, Chase underscores the idea that an image can come from any camera, even a mobile phone. As Chase writes, "Inherently, we all know that an image isn't measured by its resolution, dynamic range, or anything technical. It's measured by the simple—sometimes profound, other times absurd or humorous or whimsical—effect that it can have upon us. If you can see it, it can move you." This book is geared to inspire everyone, regardless of their level of photography knowledge, that you can capture moments and share them with our friends, families, loved ones, or the world at the press of a button. Readers of *The Best Camera Is The One That's With You* will also enjoy the iPhone application Chase Jarvis created in conjunction with this book, appropriately named *Best Camera*. *Best Camera* has a unique set of filters and effects that can be applied at the touch of a button. Stack them. Mix them. Remix them. *Best Camera* also allows you to share directly to a host of social marketing sites via www.thebestcamera.com, a new online community that allows you to contribute to a living, breathing gallery of the best iPhone photography from around the globe. Together, the book, app, and website, represent a first-of-its-kind ecosystem dedicated to encouraging creativity through picture taking with the camera that you already have. *The Best Camera Is The One That's With You*—shoot!

Waking Up Sam Harris,2014-09-09 For the millions of Americans who want spirituality without religion, Sam Harris's latest New York Times bestseller is a guide to meditation as a rational practice informed by neuroscience and psychology. From Sam Harris, neuroscientist and author of numerous New York Times bestselling books, *Waking Up* is for the twenty percent of Americans who follow no religion but who suspect that important truths can be found in the experiences of such figures as Jesus, the Buddha, Lao Tzu, Rumi, and the other saints and sages of history. Throughout this book, Harris argues that there is more to understanding reality than science and secular culture generally allow, and that how we pay attention to the present moment largely determines the quality of our lives. *Waking Up* is part memoir and part exploration of the scientific underpinnings of spirituality. No other book marries contemplative wisdom and modern science in this way, and no author other than Sam Harris—a scientist, philosopher, and famous skeptic—could write it.

Rude Awakenings Turquoise Grace, There's no one in her life that Kate Grayson despises more than Colton James; he's inconsiderate, rude,

irresponsible and perverted, and yet he has an effect on her she can't even begin to explain. Determined not to fall for the resident bad boy, Kate falls into a vicious cycle of being pulled into his attractive charm before forcing herself to stay away. For his part, Colton finds Kate intriguing and when he warns his friend away from her, he realizes that perhaps her lack of desire for him only enhances his own desire for her.

Tracing the Roles of Soft Law in Human Rights Stéphanie Lagoutte,Thomas Gammeltoft-Hansen,John Cerone,2016-11-10 Soft law increasingly shapes and impacts the content of international law in multiple ways, from being a first step in a norm-making process to providing detailed rules and technical standards required for the interpretation and the implementation of treaties. This is especially true in the area of human rights. While relatively few human rights treaties have been adopted at the UN level in the last two decades, the number of declarations, resolutions, conclusions, and principles has grown significantly. In some areas, soft law has come to fill a void in the absence of treaty law, exerting a degree of normative force exceeding its non-binding character. In others areas, soft law has become a battleground for interpretative struggles to expand and limit human rights protection in the context of existing regimes. Despite these developments, little attention has been paid to soft law within human rights legal scholarship. Building on a thorough analysis of relevant case studies, this volume systematically explores the roles of soft law in both established and emerging human rights regimes. The book argues that a better understanding of how soft law shapes and affects different branches of international human rights law not only provides a more dynamic picture of the current state of international human rights, but also helps to unsettle and critically question certain political and doctrinal beliefs. Following introductory chapters that lay out the general conceptual framework, the book is divided in two parts. The first part focuses on cases that examine the role of soft law within human rights regimes where there are established hard law standards, its progressive and regressive effects, and the role that different actors play in the incubation process. The second part focuses on the role of soft law in emerging areas of international law where there is no substantial treaty codification of norms. These chapters examine the relationship between soft and hard law, the role of different actors in formulating new soft law, and the potential for eventual codification.

Religious Education in a Mediatized World Ilona Nord,Hanna Zipernovszky,2017-05-10 In religious education, digitization and mediatization processes result in the transformation of conventional media formats. This leads to the development of new media formats, which in turn necessitates a redefinition of the relationship between religious education and the media. Keeping this in mind, this volume first examines the importance of media for specific theological disciplines, and then discusses current media-pedagogical and media-didactic approaches. Later in the book, the authors develop didactic perspectives on various methods; these include internet-based archive work and the use of digital teaching materials. They also deal with current questions regarding religious education, such as inclusion and cyber bullying, etc. Finally, they identify some of the main didactic challenges for religious instruction in a mediatized world. This volume is a plea for a wider understanding of education, and is based in part on a German-Swedish teaching and research cooperation. Following this example, it focuses on a future-oriented networking of plural forms of education. This resource is designed for students of theology and religious sciences as well as for religious education teachers.

Human Rights in Criminal Law Ben Douglas-Jones KC,Daniel Bunting,Paul Mason,Benjamin Newton,2023-02-16 The law of human rights permeates every area of law. This title focuses on the impact of human rights law at every stage of the criminal process. It addresses the principal human rights issues that apply during an investigation and prior to a suspect knowing that they are a suspect, powers of arrest and search, and treatment at the police station. It considers every stage of the criminal process, including appeal before the domestic courts and the European Court of Human Rights.

Part 1 covers the fundamental principles of the European Convention on Human Rights and the Human Rights Act 1998 and their application in domestic law, particularly in relation to criminal appeals, as well as taking a case to the European Court of Human Rights. Parts 2 to 4 address the three broad phases of a criminal case – investigation, pre-trial and trial – providing an analysis of human rights law as it applies in each phase. This book offers a comprehensive analysis of the often complex interactions between criminal law and human rights; with a wide range of experienced contributors drawn from the legal profession and academia, under the general editorship of Ben Douglas-Jones KC, Daniel Bunting, Paul Mason and Benjamin Newton.
