International Classification of Non-Tariff Measures 2019 United Nations,2019-10-14 Non-tariff measures are generally defined as policy measures other than ordinary customs tariffs that can potentially have an economic effect on international trade in goods, changing quantities traded, or prices or both. Since this definition is broad, a detailed classification is of critical importance so as to better identify and distinguish among the various forms of non-tariff measures. The classification of non-tariff measures presented here is a taxonomy of all those measures considered relevant in international trade today. It builds on an old UNCTAD classification known as the Coding System of Trade Control Measures and was developed by several international organizations forming what is called the MAST group (Multi-Agency Support Team) set up to support the Group of Eminent Persons on Non-tariff Barriers established by the Secretary General of UNCTAD in 2006. The MAST team discussed and proposed this classification, and is composed of: FAO, IMF, ITC, OECD, UNCTAD, UNIDO, World Bank and WTO. The classification is seen as evolving and should adapt to the reality of international trade and data collection needs.

Prices for interior materials, hardware, and components change quickly - new designs require new estimating techniques. To keep pace, designers and builders need resources to get special prices quickly. Means Interior Cost Data 2006 is that comprehensive resource.

Trade and Non-tariff Measures Adam Heal,Giovanni Palmioli,2015 The focus of this report is particularly on the consequences of non-tariff measures (NTMs) for developing economies and also South-South trade. This is because (i) barriers to South-South trade need to be tackled if it is to fulfil its potential as a future driver of growth; and (ii) regional developing economies are increasingly the source of new NTMs as well as being their 'victims'. Chapter 1 provides an overview of global and regional trends in trade, tariffs and non-tariff measures and highlights the growing importance of NTMs. Chapter 2 surveys methodological problems that arise when evaluating NTMs and trade. Chapters 3 and 4 consider in more details two of the most prominent and widely-used types of NTM, respectively Sanitary and Phytosanitary (SPS) Measures and Technical Barriers to Trade (TBTs). Chapter 5 concludes by reviewing mechanisms for streamlining NTMs and promoting developing countries' trade, particularly at the regional level
