Nature, Tourism and Ethnicity as Drivers of (De)Marginalization Stanko Pelc, Miha Koderman, 2017-08-01 This book considers de-marginalization attesting that marginal regions have the potential for de-marginalization and are anchored in developmental terms on the following core themes: nature; tourism; ethnicity and general factors including migration. Adding to the discussion on marginality and sustainability this book contributes a number of case studies on a diverse selection of topics and regions in which these crucial issues connect. It delivers a reflection of (de)marginalizing processes in today's globalized world where an increasing number of people, groups, societies and regions are marginalized and vulnerable not only from social and economic factors, but also from natural causes such as natural hazards. This book addresses the unsustainable practices in the past that have often generated difficult conditions for sustainable development in the future. Marginal regions that have not been developed are given much needed consideration as they may now enjoy the benefits of having not been exploited in the past to their present-day developmental advantage. The overview offered by this book is significant in that marginal regions with relatively unspoiled and attractive natural (and cultural) landscapes have a great potential for sustainable tourism. Contributions include the (de)marginalization of ethnic groups, the role of education and migration in the process, and different economic and political perspectives. Considering the topics covered, the book should be appreciated by all those involved in creation of social policies, urban and regional planning – coordinating economic with spatial and social development and by those studying in the fields where competencies for such activities are important part of the study program.

Resort Spatiality Zelmarie Cantillon, 2018-10-16 This book theorises resorts as distinct kinds of urban milieux, capturing the complexity of destinations famous for 'sun, sand and sex' mass tourism. Drawing on qualitative field research (participant observation, interviews and photography), the book discusses examples from six international resort destinations spread across four continents: the Gold Coast, Australia; Phuket and Koh Phangan, Thailand; Cancún, Mexico; Miami, USA; and Ibiza, Spain. The book reviews the material and symbolic production of lived spaces in these resorts, considering the mutually constitutive, mutually transformative relations between their spatial formations, built environments, popular imaginaries, representations, narratives of identity, rhythms, and the experiences and practices of both tourists and locals. In doing so, it argues for more nuanced ways of conceptualising tourism, globalisation and spatiality, reimagining how these phenomena unfold in lived spaces. Taking a cultural studies approach to urban analysis, the book demonstrates the value in embracing complexity, fluidity, partiality and uncertainty. It will be of interest to students and researchers of tourism, geography, cultural studies, development studies, anthropology and sociology.

Tourism Innovation Vanessa Ratten, Vitor Braga, Jose Álvarez-García, Maria de la Cruz del Rio-Rama, 2019-06-26 Tourism can take many different forms and types but increasingly it is viewed as one of the most innovative industries. This book showcases the innovations in tourism through a creativity, sustainability and technology perspective. Tourism Innovation: Technology, Sustainability and Creativity addresses the growing use and importance of tourism innovation in society. Readers of this book will gain a global perspective on how the tourism industry is changing and

taking advantage of emerging technologies, which will help them to foresee potential changes in the industry and plan for the future. Tourism innovation is defined as innovating in a cost-efficient manner by taking into account the available resources. Most of the focus on tourism innovation has been on developing countries but it is also used by companies in other locations. This book explores the way in which tourism innovation differs from other types of innovation and offers a creative solution to issues about sustainability and the circular economy. In this vein, it includes chapters addressing issues related to the following but not limited subjects: co-creation in innovation, social issues in innovation, leadership and innovation, forms of innovation, government innovation and innovation research. This book is suitable for tourism industry professionals, researchers and policy experts who are interested in how innovation is embedded in the tourism industry.

Disneyization of Drug Use Tim Turner, 2022-12-30 Disneyization of Drug Use offers an innovative, ground-up understanding of the atypical patterns of illegal drug use that often permeate multi-day party zones such as nightlife tourist resorts and music festivals. Drawing on ethnographic research conducted over three summers in Ibiza, the book contextualizes the drug and alcohol-related experiences of tourists and seasonal workers operating in the island's infamously hedonistic party spaces. Through an innovative application of Alan Bryman's (2004) seminal work, *The Disneyization of Society*, the book argues how the same marketing principles that generate consumption in the legal economy of Disney theme parks also drives illicit drug use in Ibiza and music festivals, where the line between legal and illegal substances rapidly blurs to the point of collapse. This highly innovative book offers rich insights into the complex interplay between drug and alcohol use, agency, pleasure, risk, consumerism, and social context. It will be of great appeal to academics and students interested in the fields of cultural criminology, deviant leisure, drug and alcohol studies, youth culture, and ethnographic research methods.

Responses to Geographical Marginality and Marginalization Etienne Nel, Stanko Pelc, 2020-08-13 This book examines regional responses to marginality by highlighting social innovation, local capacity and new path formations in what are often seen as economically weak regions where policy and institutional considerations play a key role. Divided into three parts, it covers a wide range of topics related to geographical marginality from various angles, on both regional and local scales. The first part focuses on the role of social innovation and illustrates the themes of social innovation and new localism, local revitalization and social entrepreneurship. The second part then addresses the issues of economic responses, valorization, resource use and local action in response to marginalization. Lastly, the third part explores various policies and measures taken to respond to marginality and intensify regional development in marginal areas.

Rave On Matthew Collin, 2018-10-09 Peace, Love, Unity, and Respect. Cultural liberation and musical innovation. Pyrotechnics, bottle service, bass drops, and molly. Electronic dance music has been a vital force for more than three decades now, and has undergone transformation upon transformation as it has taken over the world. In this searching, lyrical account of dance music culture worldwide, Matthew Collin takes stock of its highest highs and lowest lows across its global trajectory. Through firsthand reportage and interviews with clubbers and DJs, Collin documents the itinerant musical form from its underground beginnings in New York, Chicago, and Detroit in the 1980s, to its explosions in Ibiza and Berlin, to today's mainstream music scenes in new frontiers like Las Vegas, Shanghai, and Dubai. Collin shows how its dizzying array of genres—from house, techno, and garage to drum and bass, dubstep, and psytrance—have given voice to locally specific struggles. For so many people in so many different places, electronic dance music has been caught up in the search for free cultural space: forming the soundtrack to liberation for South African youth after Apartheid; inspiring a psychedelic party culture in Israel; offering fleeting escape from—and at times into—corporatization in China; and even undergirding a veritable “independent republic” in a politically contested slice of the former Soviet Union. Full of admiration for the possibilities the music has opened up all over the world, Collin also unflinchingly probes where this utopianism has fallen short, whether the culture maintains its liberating possibilities today, and where it might go in the future.

Popular Music Fandom Mark Duffett, 2013-11-07 This book explores popular music fandom from a cultural studies perspective that incorporates popular music studies, audience research, and media fandom. The essays draw together recent work on fandom in popular music studies and begin a dialogue with the wider field of media fan research, raising questions about how popular music fandom can be understood as a cultural phenomenon and how much it has changed in light of recent developments. Exploring the topic in this way broaches questions on how to define, theorize, and empirically research popular music fan culture, and how music fandom relates to other roles, practices, and forms of social identity. Fandom itself has been brought center stage by the rise of the internet and an industrial structure aiming to incorporate, systematize, and legitimate dimensions of it as an emotionally-engaged form of consumerism. Once perceived as the pariah practice of an overly attached audience, media fandom has become

a standardized industrial subject-position called upon to sell box sets, concert tickets, new television series, and special editions. Meanwhile, recent scholarship has escaped the legacy of interpretations that framed fans as passive, pathological, or defiantly empowered, taking its object seriously as a complex formation of identities, roles, and practices. While popular music studies has examined some forms of identity and audience practice, such as the way that people use music in daily life and listener participation in subcultures, scenes and, tribes, this volume is the first to examine music fans as a specific object of study.

Both individual and collective labour relations are covered in ample detail, with attention to such underlying and pervasive factors as employment contracts, suspension of the contracts, dismissal laws and covenant of non-competition, as well as international private law. The author

Building on a clear overview of labour law and labour relations, the book offers practical guidance on which sound preliminary decisions may be based. It will find a ready readership among lawyers representing parties with interests in Austria, and academics and researchers will appreciate its value in the study of comparative trends in laws affecting labour and labour relations.

Campaigning on Facebook in the 2019 European Parliament Election Jörg Haßler, Melanie Magin, Uta Russmann, Vicente Fenoll, 2021 This book investigates how political parties from 12 European countries used Facebook to inform, interact with and mobilise voters at the 2019 European Parliament election. Following a joint theoretical framework and method, the results of a content analysis of more than 14,000 Facebook posts are presented. Country specific chapters are followed by analyses of European parties Facebook campaigning, the spread of populism and the use of Facebook ads by the parties. The final chapter compares all countries showing that campaigns are more strongly shaped by the national than by the European political context. Facebook is used for campaigning as usual; parties inform and persuade but neglect the platforms mobilisation and particularly interactive affordances.
