Black Holes Sean Alan Hayward,2013 Black holes, once just fascinating theoretical predictions of how gravity warps space-time according to Einstein's theory, are now generally accepted as astrophysical realities, formed by post-supernova collapse, or as supermassive black holes mysteriously found at the cores of most galaxies, powering active galactic nuclei, the most powerful objects in the universe. Theoretical understanding has progressed in recent decades with a wider realization that local concepts should characterize black holes, rather than the global concepts found in textbooks. In particular, notions such as trapping horizon allow physically meaningful quantities and equations, describing how a black hole evolves. This has led to discoveries in fields as diverse as classical and numerical general relativity, differential geometry, thermodynamics, quantum field theory, and quantum gravity. There is heretofore no one volume which covers all the main aspects, so this volume collects together summaries and recent research, each chapter written by an expert or experts in a given field. This is intended for readers at a graduate level upwards, who wish to learn about the wide range of research concerning black holes.

Groups of Homotopy Self-Equivalences and Related Topics Ken-ichi Maruyama,John W. Rutter,2001 This volume offers the proceedings from the workshop held at the University of Milan (Italy) on groups of homotopy self-equivalences and related topics. The book comprises the articles relating current research on the group of homotopy self-equivalences, homotopy of function spaces, rational homotopy theory, classification of homotopy types, and equivariant homotopy theory. Mathematicians from many areas of the globe attended the workshops to discuss their research and to share ideas. Included are two specially-written articles, by J.W. Rutter, reviewing the work done in the area of homotopy self-equivalences since 1988. Included also is a bibliography of some 122 articles published since 1988 and a list of problems. This book is suitable for both advanced graduate students and researchers.

The Great Plague Evelyn Lord,2014-04-29 Focusing on Britain’s peasants, shopkeepers, and other commoners, this history of the deadly Black Plague is a “local account of the countrywide calamity” (The Times). In this intimate history of the extraordinary Black Plague pandemic that swept through the British Isles in 1665, Evelyn Lord focuses on the plague’s effects on smaller towns, where every death was a singular blow affecting the entire community. Lord’s fascinating reconstruction of life during plague times presents the personal experiences of a wide range of individuals, from historical notables Samuel Pepys and Isaac Newton to common folk who tilled the land and ran the shops. The Great Plague brings this dark era to vivid life—through stories of loss and survival from those who grieved, those who fled, and those who hid to await their fate. The New Rules of Lead Generation David Scott,2013-03-13 From amidst the clutter of lead generation tactics, this strategic guide teaches marketers how to make the many available lead generation tactics work together to produce the maximum number of quality leads. Marketing expert David T. Scott identifies the seven most successful tactics--including email, direct mail, and search engine marketing; banner and social media advertising; cold calling; and trade shows--and reveals: when to use which tactics, how to use them cost-effectively, how each tactic has changed in recent years, and how lead generation tactics will continue to evolve in the future. Most importantly, he shares how marketers can achieve the best results--actionable leads for their products and services--and help their companies succeed. Featuring valuable tools for tracking costs and measuring results and indispensable advice that’s been thus-far absent from this emerging and in-demand field, The New Rules of Lead Generation takes a critical look at the most popular lead-generation strategies and shows marketers everywhere how to test new approaches on a limited budget, how to combine multiple tactics for a more powerful, integrated campaign, and how to capture the leads they need.
