An Armenian Historical Grammar in Latin Characters: Morphology, Etymology, Old Texts Stuart Edward Mann,1968
Advances in Cryptology - ASIACRYPT 2005 Bimal Kumar Roy,2005-11-16 This book constitutes the refereed proceedings of the 11th International Conference on the Theory and Application of Cryptology and Information Security, ASIACRYPT 2005, held in Chennai, India in December 2005. The 37 revised full papers presented were carefully reviewed and selected from 237 submissions. The papers are organized in topical sections on algebra and number theory, multiparty computation, zero knowledge and secret sharing, information and quantum theory, privacy and anonymity, cryptanalytic techniques, stream cipher cryptanalysis, block ciphers and hash functions, bilinear maps, key agreement, provable security, and digital signatures.

The political aesthetics of the Armenian avant-garde Angela Harutyunyan,2017-03-17 This book addresses late-Soviet and post-Soviet art in Armenia in the context of turbulent transformations from the late 1980s to 2004. It explores the emergence of 'contemporary art' in Armenia from within and in opposition to the practices, aesthetics and institutions of Socialist Realism and National Modernism. This historical study outlines the politics (liberal democracy), aesthetics (autonomous art secured by the gesture of the individual artist), and ethics (ideals of absolute freedom and radical individualism) of contemporary art in Armenia and points towards its limitations. Through the historical investigation, a theory of post-Soviet art historiography is developed, one that is based on a dialectic of rupture and continuity in relation to the Soviet past. As the first English-language study on contemporary art in Armenia, the book is of prime interest for artists, scholars, curators and critics interested in post-Soviet art and culture and in global art historiography.

Analysis of Three-dimensional Inviscid Supersonic Flow Between a Body and an Outer Wall W. C. Armstrong,R. C. Bauer,1976 The three-dimensional inviscid supersonic flow equations are solved for the flow over a body located within a duct. Numerical solutions are obtained by use of the reference plane method of characteristics technique. Results of the analysis are compared with experimental test body pressure distributions obtained with an off-design jet stretcher system. The analysis is sufficiently general so that a variety of internal flows may be predicted. A computer program listing and an example problem are presented.

Constelaciones interdisciplinarias Víctor Manuel Toledo Manzur,2023-11-10 Víctor Manuel Toledo, un destacado referente académico en el pensamiento ambiental, presenta en su libro una antología de sus contribuciones teóricas y metodológicas. Sus planteamientos se materializan en experiencias concretas, enriqueciendo el libro. Toledo analiza ecos históricos y se destaca como un crítico comprometido, iluminando posibilidades en medio de la crisis. No se conforma con la descomposición, sino que identifica resistencias y semillas de transformación. El autor abarca temas interdisciplinarios, etnoecología, axioma biocultural, agroecología, espiritualidad, ecología política y metabolismo social. Su obra es un lienzo donde traza proposiciones y conceptos que enseñan y provocan. Además, reflexiona sobre la ciencia y su relación con paradigmas, promoviendo un enfoque integrador y espiritual. Su estilo claro y directo lo convierte en un retratista crítico de la realidad, un hombre rebelde que desafía lo establecido. Esta ofrece herramientas esenciales para comprender el mundo y destaca la importancia de la imaginación y la resistencia en tiempos desafiantes.

Fillers, Pauses and Placeholders Nino Amiridze,Boyd H. Davis,Margaret MacLagan,2010 Fillers are items that speakers insert in spontaneous speech as a repair strategy. Types of fillers include hesitation markers and placeholders. Both are used to fill pauses that arise during planning problems or in lexical retrieval failure. However, while hesitation markers may not bear any resemblance to lexical items they replace, placeholders typically share some morphosyntactic properties with the target form. Additionally, fillers can function as a pragmatic tool, in order to replace lexical items that the speaker wants to avoid mentioning for some reason. The present volume is the first collection on the topic of fillers and will be a useful reference work for future investigations on the topic. It consists of typological surveys and in-depth studies exploring the form and use of fillers across languages and sections of different populations, including cognitively impaired speakers. The volume will be interesting to typologists and linguists working in discourse studies.

The Linguistics of Temperature Maria Koptjevskaja-Tamm,2015-02-11 The volume is the first comprehensive typological study of the conceptualisation of temperature in languages as reflected in their systems of central temperature terms (hot, cold, to freeze, etc.). The key issues addressed here include questions such as how languages categorize the temperature domain and what other uses the temperature expressions may have, e.g., when metaphorically referring to emotions ('warm words'). The volume contains studies of more than 50 genetically, areally and typologically diverse languages and is unique in considering cross-linguistic patterns defined both by lexical and grammatical information. The detailed descriptions of the linguistic and extra-linguistic facts will serve as an important step in teasing apart the role of the different factors in how we speak about temperature - neurophysiology, cognition, environment, social-cultural practices, genetic relations among languages, and linguistic contact. The book is a significant contribution to semantic typology, and will be of interest for linguists, psychologists, anthropologists and philosophers.
