An Ice Age Hunter Giovanni Caselli, 1985

EYR THE HUNTER Margaret Zehmer Searcy, Joyce

Haynes, 1995-10-31 Travel back 12,000 years and learn of Eyr, a youngster who saved his tribe from a woolly mammoth as they traveled from Siberia to Alaska . . . well told in metered verse that flows smoothly throughout...Realistic sketches in burnished colored pencil show details of clothing, family life, and geography. --

Children's Literature In this tale, a young Ice-Age boy plays a key role in the survival of his band more than twelve thousand years ago. Eyr's band is hungry and in need of new skins. The old seer predicts a coming snow, and without a good supply of meat, the band may starve or die of cold. Eyr walks over meadows and hills with the other hunters looking for tracks, but they return with little game. That night Eyr dreams of killing the great woolly mammoth with his sharp spear. He imagines how his band would dance and feast, with food to last them through the dark winter. The next morning the band's hunter-leader wakes him. Having reached the age that he can hunt alone, Eyr is sent to scout the large beasts that roam the tundra, especially the woolly mammoths. Taking only his cape, his knife, his spear, and a smoldering ember,

Eyr sets out to become a man and save his band. Told in rhyming couplets, just as many ancient storytellers told the epic tales of the past, *Eyr the Hunter: A Story of Ice-Age America* is based upon many facts. Margaret Zehmer Searcy is a cultural anthropologist who has taught classes about Native Americans and their customs for more than two decades in the Department of Anthropology at the University of Alabama. She has visited archaeological sites and is familiar with the kinds of animals that existed in the Ice-Age landscape. Joyce Haynes has won numerous local, state, and national awards for her illustrations. She has illustrated more than a dozen books and is the author of *Drawing Wild Animals*. She lives in Southwest Missouri. A story both involving and entertaining, *Eyr the Hunter: A Story of Ice-Age America* is made all the more moving by its wonderful rhythms and use of vivid detail. A children's book that can be likened to the *Clan of the Cave Bear* series, this book can also be useful for explaining how the earliest Americans led their lives. It is a wonderful tie-in to any discussion about native cultures around the world as well.

*An Ice Age Hunter* Lucilla Watson, John James, 1987 Describes the day-to-day life of Ice Age people and discusses their weapons, methods of hunting, homes, clothing, and physical environment.

*Ice Age Hunters of the Rockies* Dennis J. Stanford, Jane Stevenson Day, 1992 *Ice Age Hunters of the Rockies* explores the many questions that still surround the Pleistocene cultures of 12,000 years ago and the adaptations of these early civilizations to the last great ice age, covering issues such as the time of arrival of the first Americans, adaptation to various environments, and the use by early people of high-altitude sites.

*Ice Age: Dawn of the Dinosaurs: Buck the Amazing Dino Hunter!* Annie Auerbach, 2009-06-02 Surviving among the fierce and enormous creatures, Buck is a weasel who has become the master navigator of a mysterious world deep beneath the tundra. He is the only one who can keep Manny, Diego, Ellie, Crash, and Eddie safe from his archenemy, Rudy—a vicious dino who is out for revenge! Buck leads the Ice Age gang on a new adventure in the jungle, where they find danger, excitement, and unexpected new friends.

*Winds Across Beringia* Benjamin H Barnette, 2020-01-30 Fans of Ice Age prehistoric fiction settings ala Jean Auel's 'Earth's Children' series will relish the setting and events in *Winds Across Beringia*, which is set in the last Ice Age on a narrow channel connecting Alaska with Siberia. --Midwest Book Review

*Winds Across Beringia* Nearly 15,000 years ago, a daring young mammoth hunter named Harjo sets out on a life-changing journey across the now inundated ancient land bridge that once connected Alaska and Siberia called Beringia. He is bound for the land of the sea mammal hunting people on the coast of the Bering Sea. There, he encounters a beautiful, mysterious servant girl named Onna; the likes that no one had ever seen before or imagined existed. She was taken captive from an unknown land far to the west, across the great massive glaciers that all believed were impassable. Together, they began an incredible adventure to return to Harjo's people and his river valley homeland within interior Beringia. Their

saga tells the story of their life-long relationship thorough many wondrous escapades, harsh, desperate struggles, and an intimate romance within the backdrop of the lost land of Beringia--a wondrous world that was once bursting with breathtaking sights and sounds and teeming with exotic astonishing animals while providing an unforgiving perilous environment to those who ventured forth. Harjo's people, the mammoth hunters, and other prehistoric inhabitants of Beringia, are destined to be the ancient ancestors of all Native people of North and South America.

Reindeer Hunters of the Ice Age in Europe Laure Fontana,2022-09-26 This book undertakes a thorough study of Reindeer in the Upper Pleniglacial and Tardiglacial societies in France. It addresses two main topics – the economy of animal resources within the societies and the exploitation of Reindeer organized within the annual cycle, in terms of space and time, between 30,000 and 14,000 cal BP in France. The author proposes an analysis and hypothesis regarding the economy of animal resources and the nomadic cycle of the last Paleolithic hunter-

gatherer societies, in order to identify a “Reindeer system.” The author discusses the relationship between Reindeer and human mobility and offers some conclusions regarding the annual cycles of nomadism. The volume scrutinizes the distinct eco systems in three regions and its effects on the movements of both human and animal. This book is of interest to zooarchaeologists and prehistorians.

**Journey to the Ice Age** Peter L. Storck, 2011-11-01 At the end of the Ice Age, small groups of hunter-gatherers crossed from Siberia to Alaska and began the last chapter in the human settlement of the earth. Many left little or no trace. But one group, the Early Paleo-Indians, exploded onto the archaeological record about 11,500 radiocarbon years ago and expanded rapidly throughout North America, sending splinter groups into Central and perhaps South America as well. *Journey to the Ice Age* explores the challenges faced by the Early Paleo-Indians of northeastern North America. A revealing, autobiographical account, this is at once a captivating record of Storck's discoveries and an introduction to the practice, challenges, and spirit of archaeology.

## THE STORY OF THE ICE AGE ROSE WYLER AND GERALD AMES,1967

Cro-Magnon Brian Fagan,2011-05-17 Cro-Magnons were the first fully modern Europeans--not only the creators of the stunning cave paintings at Lascaux and elsewhere, but the most adaptable and technologically inventive people that had yet lived on earth. The prolonged encounter between theCro-Magnons and the archaic Neanderthals, between 45,000 and 30,000 years ago, was one of the defining moments of history. The Neanderthals survived for some 15,000 years in the face of the newcomers, but were finally pushed aside by the Cro-Magnons' vastly superior intellectual abilities and cutting-edge technologies. What do we know about this remarkable takeover? Who were these first modern Europeans and what were they like? How did they manage to thrive in such an extreme environment? And what legacydid they leave behind them after the cold millennia? This is the story of a little known, yet seminal, chapter of human experience.--From publisher description.

**Atlas of a Lost World** Craig Childs,2019-04-09 The first people in the New World were few, their encampments fleeting. On a side of the planet no human had ever seen, different groups arrived

from different directions, and not all at the same time. The land they reached was fully inhabited by megafauna—mastodons, giant bears, mammoths, saber-toothed cats, enormous bison, and sloths that stood one story tall. These Ice Age explorers, hunters, and families were wildly outnumbered and many would themselves have been prey to the much larger animals. In *Atlas of a Lost World*, Craig Childs blends science and personal narrative to upend our notions of where these people came from and who they were. How they got here, persevered, and ultimately thrived is a story that resonates from the Pleistocene to our modern era, and reveals how much has changed since the time of mammoth hunters, and how little. Through it, readers will see the Ice Age, and their own age, in a whole new light.

**First Peoples in a New World** David J. Meltzer, 2021-10-07

Over 15,000 years ago, a band of hunter-gatherers became the first people to set foot in the Americas. They soon found themselves in a world rich in plants and animals, but also a world still shivering itself out of the coldest depths of the Ice Age. The movement of those first Americans was one of the greatest journeys undertaken by ancient peoples. In this book, David Meltzer explores the world of Ice Age Americans, highlighting

genetic, archaeological, and geological evidence that has revolutionized our understanding of their origins, antiquity, and adaptation to climate and environmental change. This fully updated edition integrates the most recent scientific discoveries, including the ancient genome revolution and human evolutionary and population history. Written for a broad audience, the book can serve as the primary text in courses on North American Archaeology, Ice Age Environments, and Human evolution and prehistory.

Lost World Tom Koppel, 2010-05-11 For decades the issue seemed moot. The first settlers, we were told, were big-game hunters who arrived from Asia at the end of the Ice Age some 12,000 years ago, crossing a land bridge at the Bering Strait and migrating south through an ice-free passage between two great glaciers blanketing the continent. But after years of sifting through data from diverse and surprising sources, the maverick scientists whose stories Lost World follows have found evidence to overthrow the big-game hunter scenario and reach a new and startling and controversial conclusion: The first people to arrive in North America did not come overland -- they came along the coast by water. In this groundbreaking book, award-winning journalist Tom Koppel

details these provocative discoveries as he accompanies the archaeologists, geologists, biologists, and paleontologists on their intensive search. *Lost World* takes readers under the sea, into caves, and out to the remote offshore islands of Alaska, British Columbia, and California to present detailed and growing evidence for ancient coastal migration. By accompanying the key scientists on their intensive investigations, Koppel brings to life the quest for that Holy Grail of New World prehistory: the first peopling of the Americas.

*A Woman of the Ice Age* L. P. Gratacap, 2016-05-30 ravel back in time to the land of the mighty Mastadon hunted by the ferocious Sabre-Toothed Cat to the furthest western regions of the North American Continent. Travel Wit Ogga the Mastadon hunter and the Woman he meets and witness their struggles and triumphs. A classical Stone-Age adventure not to be missed.
