The English Folly Gwyn Headley,Wim Meulenkamp,2020-06-24 If this were a novel, the tales of astounding wealth, sexual perversion, murder, munificence, rape, insanity, brutality, slavery, religious mania, selfishness, snobbery, charity, suicide, generosity, theft, madness, wickedness, failure and eccentricity which unfold in these pages would be too concentrated to allow for the willing suspension of disbelief. All these sins and virtues, and more, are displayed by the characters in this book, some exhibiting several of them simultaneously. Folly builders were not as we are. They never built what we now call follies. They built for beauty, utility, improvement; it is only we, struggling after them with our imperfect understanding, who dismiss their prodigious constructions as follies. Follies can be found around the world, but England is their spiritual home. Having written the definitive books on follies in Great Britain, Benelux and the USA, Headley & Meulenkamp have turned their attention to the folly builders themselves, people so blinded by fashion or driven by some nameless ideology that they expended great fortunes on making their point in brick, stone and flint. Most follies are simply misunderstood buildings, and this book studies the motives, characters, decisions and delusions of their builders. If there was madness in their building, fortunately there was no method in it.

The History of Stainless Steel Harold M. Cobb,2010-01-01 The History of Stainless Steel provides a fascinating glimpse into a vital material that we may take for granted today. Stainless steel, called the miracle metal and the crowning achievement of metallurgy by the prominent metallurgist Carl Zapffe, is a material marvel with an equally fascinating history of people, places, and technology. As stainless steel nears the hundredth anniversary of its discovery, The History of Stainless Steel by Harold Cobb is a fitting perspective on a vital material of our modern life. Aptly called the miracle metal by the renowned metallurgist Carl Zapffe, stainless steel is not only a metallurgical marvel, but its history provides an equally fascinating story of curiosity, competitive persistence, and entrepreneurial spirit. The History of Stainless Steel is the world's first book that captures the unfolding excitement and innovations of stainless steel pioneers and entrepreneurs. Many new insights are given into the work of famous pioneers like Harry Brearley, Elwood Haynes, and Benno Strauss, including significant technical contributions of lesser known figures like William Krivsky. This fascinating history of stainless steel exemplifies the great push of progress in the 20th Century. From the stainless steel cutlery of Brearley in 1913, stainless steel burst on the modern scene in many tangible ways. Excerpted text by William Van Alen, architect of the Chrysler Building, describes the early architectural use of stainless steel. Another historic application of stainless steel is the revolution in rail travel by the Edward G. Budd Company, which built the first light-weight stainless steel passenger trains--with an astounding 90% reduction in fuel costs. This remains recognized today as one of the technological marvels of the modern world. Harold Cobb, a metallurgist who has spent much of his career in the stainless steel industry, uncovers many interesting stories and insights, including a special perspective on the prominent role of stainless steel in the activities of emerging technical societies such as the American Society for Metals and the American Society for Testing and Materials. Amply illustrated and with a 78-page timeline, this publication truly evokes the inspirations created by and from stainless steel.

Souvenir Rolf Potts,2018-03-08 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. For as long as people have traveled to distant lands, they have brought home objects to certify the journey. More than mere merchandise, these travel souvenirs take on a personal and cultural meaning that goes beyond the object itself. Drawing on several millennia of examples--from the relic-driven quests of early Christians, to the mass-produced tchotchkes that line the shelves of a Disney gift shop--travel writer Rolf Potts delves into a complicated history that explores issues of authenticity, cultural obligation, market forces, human suffering, and self-presentation. Souvenirs are shown for what they really are: not just objects, but personalized forms of folk storytelling that enable people to make sense of the world and their place in it.' Object Lessons is published in partnership with an essay series in The Atlantic. Souvenir features illustrations by Cedar Van Tassel

1938: Modern Britain Michael John Law,2017-12-14 In 1938: Modern Britain, Michael John Law demonstrates that our understanding of life in Britain just before the Second World War has been overshadowed by its dramatic political events. 1938 was the last year of normality, and Law shows through a series of case studies that in many ways life in that year was far more modern than might have been thought. By considering topics as diverse as the opening of a new type of pub, the launch of several new magazines, the emergence of push-button radios and large screen televisions sets, and the building of a huge office block, he reveals a Britain, both modern and intrigued by its own modernity, that was stopped in its tracks by war and the austerity that followed. For some, life in Britain was as consumerist, secular, Americanized and modern as it would become for many in the late 1950s and early 1960s. Presenting a fresh perspective on an important year in British social history, illuminated by six engaging case studies, this is a key study for students and scholars of 20th-century Britain.

Biology of Methylootrophs Israel A. Goldberg,J. Stefan Rokem,2013-10-22 Biology of Methylootrophs introduces the reader to the study of methylootrophs - microorganisms that use reduced one-carbon compounds for growth. The book is divided into five parts. Part I covers the taxonomy, morphology, and ultrastructure of methylootrophic bacteria. Part II discusses the processes involved in their growth and metabolism. Part III talks about the possible applications of methylootrophs and their enzymes in industrial fields as well as chemistry. Part IV deals with the molecular genetics and the gene expression of methylootrophs, and Part V deals with their habitat and role in the environment. The text is recommended for microbiologists who would like to be acquainted with the subject or make further studies about methylootrophs.

Shelf Life Gideon Haigh,2021-12-01 Few journalists exemplify the creed 'without fear or favour' like Gideon Haigh. Shelf Life selects from twenty-one years of writing on myriad subjects by one of our clearest thinkers, sharpest stylists and most curious journalists. Architecture and airline food. Depression and doodling. Goya and Grossman. Weegee and Wire. When not wiring about cricket, Gideon Haigh has enjoyed taking journalism on unexpected journeys, where curiosity calls, into the past and future as well as the present. Edited by Russell Jackson, Shelf Life samples his work from the last two decades: essays, reportage, reviews, crisp analyses, deep dives into history, of no camp, and independent of the news cycle, from his shelves to yours.

A City Lost and Found Robyn Annear,2014-03-26 "Old landmarks fall in nearly every block ... and the face of the city is changing so rapidly that the time is not too far distant when a search for a building 50 years old will be in vain." — Herald, 1925. The demolition firm of Whelan the Wrecker was a Melbourne institution for a hundred years (1892-1992). Its famous sign – 'Whelan the Wrecker is Here' on a pile of shifting rubble – was a laconic masterpiece and served as a vital sign of the city's progress. It's no stretch to say that over three generations, the Whelan family changed the face of Melbourne, demolishing hundreds of buildings in the central city alone. In A City Lost and Found, Robyn Annear uses Whelan's demolition sites as

portals to explore layers of the city laid bare by their pick-axes and iron balls. Peering beneath the rubble, she brings to light fantastic stories about Melbourne's building sites and their many incarnations. This is a book about the making – and remaking – of a city.

The Architecture of East Australia Bill MacMahon, 2001 The story of Australian architecture might be said to parallel the endeavours of Australians to adapt & reconcile themselves with their home & neighbours. It is the story of 200 years of coming to terms with the land: of adaptation, insight & making do. Early settlers were poorly provisioned, profoundly ignorant of the land & richly prejudiced towards its peoples. They pursued many paths over many terrains. From the moist temperate region of Tasmania with heavy Palladian villas to the monsoonal north with open, lightweight stilt houses, the continent has induced most different regional building styles.
