The Global Brain Mohanbir Sawhney,Satish Nambisan,2007-10-12 All the talk about open innovation and externally-focused innovation assumes that one size fits all in terms of what network-centric innovation is and how companies should harness external creativity. But the reality is that there is no one right way to master this tool. For instance, loosely governed community-based innovation projects are a very different animal from tightly-orchestrated development projects driven by a large firm. As the landscape of network-centric innovation becomes more diverse and more confusing, there is a desperate need to structure the landscape to better understand different models for network-centric innovation. This book brings clarity to the confusion. Further, it argues that managers cannot rely on anecdotal success stories they read about in the press to implement a network-centric innovation strategy. They need rigorous and analytical advice on what role their company should play in an innovation network, what capabilities they need to create, and how they need to prepare their organization for this significant shift in the innovation approach. This book offers a practical and detailed roadmap for planning and implementing an externally-focused innovation strategy.

The Policies of Inclusion Juhani Laurinkari,Merja Tarvainen,2015-01-15 Welfare policies and the ideas of well-being are linked with the ideas of good life. However, the meaning of good life, i.e. what is considered as 'good life' gets its meanings contextually. This means that we need to study the ideas of good life in time. The ideas of good life express social and political values and they are articulated in particular terms in particular time and place. The changing ideas of welfare and the ideas of changing approaches on welfare, well-being and knowledge

production related to them have been discussed widely in international and Finnish research contexts. This volume is the second – and last – part of publications which stem from the 20th Anniversary Seminar of the Research Unit on Disability at University of Eastern Finland. It offers a multivoiced collection of research discussions from research in the fields of welfare and inclusion.

The Dispositif Valerie Larroche, 2019-04-30 The notion of the dispositif (dispositive) is particularly relevant for understanding phenomena where one can observe the reproducibility of distributed technical activities, operational or discursive, between human and non-human actors. This book reviews the concept of the dispositive through various disciplinary perspectives, analyzing in turn its technical, organizational and discursive dimensions. The relations of power and visibility enrich these discussions. Regarding information and communication sciences, three main uses of this concept are presented, on the one hand to illustrate the heuristic scope of issues integrating the dispositive and, on the other hand, to demonstrate its unifying aspect in this disciplinary field. The first use concerns the complexity of media content production; the second relates to activity traces using the concept of the “secondary information dispositive”; finally, the third involves the use of the dispositive in contexts of digital participation.

The Selected Canterbury Tales: A New Verse Translation

Geoffrey Chaucer, 2012-04-09 A truly remarkable achievement.

—Barry Unsworth In the tradition of Seamus Heaney's *Beowulf* and Marie Borroff's *Sir Gawain and the Green Knight*, Sheila Fisher's *The Selected Canterbury Tales* is a vivid, lively, and readable translation of the most famous work of England's premier medieval poet. Preserving Chaucer's rhyme and meter, Fisher makes these tales accessible to a contemporary ear while inviting readers to the Middle English original on facing pages. Her informative introduction highlights Chaucer's artistic originality in his memorable portrayals of surprisingly modern women and men from across the spectrum of medieval society.

Children at Risk in America Roberta Wollons, Roberta Lyn Wollons, 1993-01-01 This collection of essays addresses twentieth-century historical and contemporary issues regarding children who are considered to be at risk. The essays explore the language of risk as it is used by the courts, the schools, governmental agencies, and child advocates, those who discover risks and create correctives for children who both need protection and threaten to disturb the social order. The tasks require an exploration of differing, often contradictory, concepts of the child and society that are embedded in public policy debates. Deepening the complexity of the problems, institutions to which we look for solutions are too often faced with conflicts that arise when the needs of the child are at variance with the needs of the institutions themselves. These dilemmas are central to understanding our failure to achieve adequate public policy solutions for children at risk.

Implementing Institutional Controls at Brownfields and Other Contaminated Sites Amy L. Edwards,2003 Most

brownfields cleanups have relied on institutional and engineering controls as part of the remedy, although the implementation, monitoring, and enforcement of these controls is one of the most difficult issues affecting contaminated property cleanup and redevelopment. The critical role of institutional controls has recently been highlighted by the 2001 Brownfields Amendments, and as a result a key element in the future success of brownfields redevelopment will rest on understanding and effectively using risk-based corrective action, including institutional and

engineering controls. Implementing Institutional Controls at Brownfields and Other Contaminated Sites, the first book on this important and evolving topic, provides a thorough grounding in the history and current use of institutional controls. Emphasizing federal, state and public perspectives, this compendium of articles written by over 43 experts in the field offers real estate and environmental practitioners a state-of-the-art review of a subject that is integral to the success and growth of brownfields redevelopment projects. also examines some of the emerging tools that can be used in brownfields redevelopment, including custodial trusts, one-call systems, and web-based tracking systems. It also discusses the benefits of the proposed uniform model law on environmental covenants (UECA). Part II addresses the federal perspective, including the statutory and regulatory framework for the use of institutional controls in CERCLA and RCRA. The state perspective is covered in Part III, looking at the varying use of these controls in several states, including Arizona, California, Illinois, Massachusetts, New Jersey, and Maine. Experience in the Field is the focus of Part IV, which reviews how these controls have been used, highlights recent case studies, and draws conclusions on what can be learned from these successes and failures. documents and forms, including the flow chart from the ASTM Standard Guide on the Use of Activity and Use Limitations, Including Institutional and Engineering Controls (E 2091), final fact sheets from the Environmental Protection Agency for site managers at Superfund and RCRA sites, guidance from the Department of Defense, and state documents referenced in the text.

Dialogical Inquiry in Mathematics Teaching and Learning Nadia Stoyanova, Eva Marsal, 2023-10-31 The collection of papers in this anthology represents what may be a broad exploration of the role of philosophical inquiry in the classroom

and in mathematics teacher education, a topos characterized by multiple, intersecting themes, all of which converge on a central question: what is the role of mathematics in the construction of the realities we live by, and could that role be different if we became aware of its invisible power? In the age of the Anthropocene - an era in which technological intervention plays an ever more central role in the way we build, develop and attempt to maintain our increasingly fragile and risk-prone human and natural world, what are the implications of the hegemonic epistemic status of mathematics in those processes? Does mathematics define the conditions of possibility of all knowledge, whether expressed in a theory or silently invested in a practice? Does or can mathematics and its presumed value-neutrality serve to limit, constrain, suppress, and even preclude other, perhaps more valuable forms of knowledge? Alternatively, can philosophical dialogue about mathematics serve to clarify, unmask, reframe and recreate our understanding of mathematics and its symbolic power in the human and material world, and act as an emancipatory form of knowledge in culture and society? What would such dialogues look like in the mathematics classroom? The papers in this volume address these questions in various contexts and registers, and provide prospective and in-service teachers with compelling and suggestive ways of responding to them. A must-read for math educators everywhere. Nadia Stoyanova Kennedy, Associate Professor of Mathematics Education, City University of New York, USA. Eva Marsal, Professor of Philosophy, University of Education, Karlsruhe, Germany & University of Warsaw, Poland.
